Beam : Iridium Approves Worlds First Iridium Extreme Docking Solution

World Reach Limited announced today that it's wholly owned subsidiary Beam Communications Pty Ltd (Beam) has received notification by Iridium Communications Inc, www.iridium.com, of certification of Beam's Lite Iridium Extreme Docking solution. Beam is the first manufacturer in the world to receive official certification of a docking unit for the Iridium Extreme handset.

The Iridium Extreme was released by Iridium recently and the Beam range of docking solutions to compliment this new handset extends the functionality of the satellite handset so that it can be used indoors, in-vehicles, vessels and other remote locations. The docking solutions provide features like external GPS connectivity, the ability to use standard telephone equipment such as corded or cordless handsets or integrate to a PBX for in building or on vessel use. The in-vehicle unit provides a high quality fully integrated solution with hands-free communication.

The new range of Iridium Extreme Docking solutions by Beam has been specifically designed to meet market needs for land, sea and air applications and will interface straight out of the box with the tracking and SOS capabilities of the Iridium Extreme handset and the Beam MyBuddy service. Three specific models are being marketed: www.extreme9575.com,. The remaining two docking solutions are expected to receive certification in the coming week.

PotsDOCK Extreme

Beam has established itself in the international market place as the world leader in satellite docking solutions for both Iridium and Inmarsat handheld satellite telephones. The addition of the suite of Extreme Docks once again confirms this position.

Initial orders have already been received and shipping has commenced. The Extreme Handset will be distributed by Telstra, KDDI, Inmarsat, Vizada, AST UK and other regional distribution partners of Beam.

Yours faithfully

Michael Capocchi

Managing Director
