By Electronic Lodgement

Dear Sir/Madam,

**LODGE MENT OF 2012 PRELIMINARY FINAL REPORT (APPENDIX 4E)**

In accordance with the Listing Rules, please find attached the Preliminary Final Report (Appendix 4E) for XTEK Limited (XTE) for the financial year ended 30 June 2012.

Should you require any further information in respect to this matter please contact the Chairman, Mr Uwe Boettcher at [Uwe.Boettcher@xtek.net](mailto:Uwe.Boettcher@xtek.net) or 02 6232 0601 in the first instance.

Yours sincerely,

Lawrence A. Gardiner  
Company Secretary

Attachment: Appendix 4E – 2012 Preliminary Final Report for XTEK Limited.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**

**Comments by Directors**

With significantly reduced Government expenditure on Defence and Homeland Security there has been a significant reduction in agency sales revenue resulting in a loss for Financial Year 2011/2012.

The Company has continued to review its business practices in light of the changing fiscal environment. Not only has it continued to drive down recurring operational expenditure but it has reinvigorated a number of its agency lines with cutting edge products and highly-proficient Sales Managers. It is believed that this will better position the Company to meet the challenges of the current economic climate.

Despite the difficult trading conditions the Company has successfully commercialised the XTclave™ Composite Consolidation Technology (CCT) and completed the large scale XTclave™ CCT plant on schedule. This is a significant achievement for the Company and positions the Company for a future that will now include XTclave™ CCT revenue. The XTclave™ production plant is now ready to satisfy an imminent order to supply a substantial quantity of body armour plates to a foreign Government Agency as part of the Company's Joint Venture with Armor Australia Pty Ltd (Armor Australia).

Looking forward, the focus of the Board and Management will be on the market development of the XTclave™ CCT. The Company, in conjunction with Armor Australia, has already manufactured and delivered significant quantities of high end body armour plates utilising XTclave™ as part of the initial acceptance process by the aforementioned foreign Government Agency. The Company is also working with Armor Australia to develop an advanced XTclave™ armour solution for the Protection Elements of the LAND 125 Phase 3B project for body armour for the Australian Defence Force. Further analysis of other market sectors in which XTclave™ technology may have potential is now required to ensure that we capitalise on the true value of our IP in a global composites market estimated to reach over US\$60bn in 2012.

**XTEK Business Analysis**

Even though gross sales are down, gross margins remain in line with the previous year whilst operational expenditure decreased significantly. Details of the agency sales of equipment and services are included in the business analysis table below:

	1st Half Dec 11 \$'000	1st Half Dec 10 \$'000	%	2nd Half Jun 12 \$'000	2nd Half Jun 11 \$'000	%	Full Year Jun 12 \$'000	Full Year Jun 11 \$'000	%

**Agency Profit before Tax**

The agency loss before tax was \$1.087m compared with a loss of \$0.816m in 2011.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012****Significant changes in the state of affairs**

- (a) On 29 June 2012, Brigadier Gregory Thomas (Rtd) resigned as a Director of the Company.
- (b) On 29 June 2012, Mr. Brian Malcolm was appointed as an Executive Director of the Company.

**Matters subsequent to the end of the financial year**

- (a) On 3 July 2012, the Company announced that the Company has successfully completed manufacture of its first large scale XTclave™ composite consolidation technology production plant in Adelaide. The XTclave™ production plant will be capable of processing more than 1,000 high tech body armour plates per day using the novel and patented XTclave™ technology process.
- (b) On 18 July 2012, the Company announced its intention to proceed with a pro-rata Non-Renounceable Rights Issue of up to 58,302,610 New Shares to raise up to approx \$1,515,868.
- (c) On 30 July 2012, the Company issued Non-Renounceable Rights Issue Offer Document to all eligible Shareholders and preserved the right to make presentations to Exempt Investors under section 708 of the Corporations Act 2001.
- (d) On 19 August 2012, the large XTclave™ composite consolidation technology production plant was transported from the XTEK Engineering Development Facility in Adelaide to Armor Australia production facilities in Sydney in preparation for the manufacture of significant quantities of high end body armour plates under the Joint Venture arrangements in place with Armor Australia.
- (e) On 20 August 2012, the Company announced that Non-Renounceable Rights Issue had been completed, with a total of 19,893,341 new ordinary shares issued at an issue price of \$0.026 per ordinary share, for a total value of \$517,226.00 (before issue costs). Following the allotment and issue of the 19,893,341 new ordinary shares, the issued capital of XTEK comprises 165,812,537 fully paid ordinary shares.
- (f) On 23 August 2012, the Company received an application from one of our major shareholders who for timing reasons was unable to participate in the Rights Issue, for the placement and issue of 7,700,000 New Shares at an issue price of \$0.026 per ordinary share in December 2012 to the value of \$200,200.

**Likely future developments**

The Company has developed an aggressive and focused strategy to reinvigorate its core agency business throughout FY12/13. This includes introducing new and innovative products and services to meet specified client requirements and closing underperforming business lines. This strategy is currently being implemented as a managerial priority across the Sales Division. It is anticipated that this strategy will complement the recent appointment of new, highly specialist Sales Managers and underlines XTEK's determination to consolidate its Sales capability whilst providing its clients with the very highest levels of contemporary technical advice, support and assistance.

The Company believes that its novel XTclave™ composite consolidation technology has significant potential beyond the manufacture of ballistic armour systems and will actively investigate opportunities to diversify into further technical fields. The Company expects to realise a share of profit from XTclave™ armour products through its Joint Venture Agreement with Armor Australia over the coming 12 months. XTEK is also working with Armor Australia to develop an advanced, lightweight XTclave™ body armour solution to satisfy the requirements of the Australian Defence Force Land 125 Phase 3B Protection Elements Project.

Following on from positive discussions held with the United States Office of the Secretary of Defense, Comparative Testing Office (CTO) towards the end of last year, the Company expects advice in Quarter 2 that the United States Army has secured Foreign Comparative Testing funding to assess XTclave™ technology as part of its program to develop future personal body armour solutions.

The Company continues to develop a range of precision weapon ancillaries for the Blaser Tactical 2 Sniper Rifle and other weapon systems currently in service with the Australian Defence Force and Government Agencies. The Company has already enjoyed considerable success with its specialist Tactical 2 Sniper Rifle folding chassis, with the rights for potential global sales having recently been secured by SIG SAUER Inc. from the United States.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**1. Summary of Significant Accounting Policies**

The principal accounting policies adopted in the preparation of the preliminary final report are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. The preliminary final report includes the financial statements for XTEK Limited as an individual entity.

**(a) Corporate Information**

The preliminary final report of XTEK Limited for the year ending 30 June 2012 was authorised for issue in accordance with a resolution of the directors on 31 August 2012.

XTEK Limited is a company limited by shares incorporated in Australia whose shares are publicly traded on the Australian Securities Exchange.

**(b) Going Concern Basis of Accounting**

The preliminary final report has been prepared on the going concern basis. The company has made a loss of \$1,087,830 for the year ended 30 June 2012 (year ended 30 June 2011: loss of \$802,153). Accumulated losses to 30 June 2012 total \$17,992,711 (accumulated losses to 30 June 2011: \$16,905,341). The balance of cash and cash equivalents was \$206,704 as at 30 June 2012 (as at 30 June 2011: \$295,312). The ability of the company to continue as a going concern is dependent on the company's ability to meet its debts as and when they fall due and payable. The company has prepared cash flow forecasts for the next twelve months which suggest that the company will be able to meet its debts as and when they fall due and payable. These cash flow forecasts are based on a number of assumptions in particular about the company's ability to meet projected revenue levels, timing of cash receipts, retention of overheads at budgeted levels and execution of an application from an investor for the placement and issue of shares in December 2012 to the value of \$200,200 subsequent to balance date as disclosed in note 13. The projected revenue levels referred to above also include estimates of the quantities of high end body armour plates manufactured and delivered utilising XTclave™ under the joint venture agreement with Armour Australia.

The directors also acknowledge no committed finance facility is presently in place to fund any unforeseen shortfall in forecast cash flows and are therefore monitoring cash flows on a weekly basis and tightly managing discretionary expenditure. The directors are however of the opinion that there are reasonable grounds to believe that the company will meet projected revenue within the agency business and XTclave™ joint venture arrangement, raise sufficient funds via a capital raising in December 2012 as disclosed in note 13; and retain overheads at budget levels. On this basis the directors believe the adoption of the going concern basis of accounting is justified.

However, achievement of the assumptions underlying the cashflow forecasts is uncertain, and if actual cashflows are materially less than forecast, the company may not be able to pay its debts as and when they fall due and may be required to raise additional equity or debt or realise assets and extinguish liabilities other than in the normal course of business and at amounts different from those stated in the financial statements. The preliminary final report does not include any adjustment relating to the recoverability and classification of recorded asset amounts nor to the amount and classification of liabilities that might be necessary should the company not continue as a going concern.

**(c) New Accounting Standards and Interpretations**

*(i) Changes in accounting policy and disclosures.*

The accounting policies adopted are consistent with those of the previous financial year.

*(ii) Adoption of new Australian Accounting Standard requirements*

Australian Accounting Standards and Interpretations issued or amended that are applicable to the current reporting period did not have a financial impact in the financial statements or performance of the Company, and are not expected to have a future financial impact on the Company.

*(iii) Future Australian Accounting Standard requirements*

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet effective have not been adopted by the Company for the annual reporting period ended 30 June 2012. It is anticipated that the new requirements will have no material financial impact on future reporting periods.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**(h) Intangible Assets**

*(i) Research and development*

Research costs are expensed as incurred.

Development expenditure incurred on an individual project is carried forward when its future recoverability can reasonably be regarded as assured. Following the initial recognition of the development expenditure, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Any expenditure carried forward is amortised over the period of expected future sales from the related project.

The carrying value of development costs is reviewed for impairment annually when the asset is not yet in use, or more frequently when an indicator of impairment arises during the reporting year indicating that the carrying value may not be recoverable. Where recognition criteria are not met development costs are recognised in the statement of comprehensive income as incurred.

Gains or losses from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of comprehensive income when the asset is derecognised.

**(i) Recoverable amount of assets**

At each reporting date, the Company assesses whether there is any indication that an asset may be impaired. Where an indicator of impairment exists, the Company makes a formal estimate of recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount the asset is considered impaired and is written down to its recoverable amount.

The recoverable amount is the greater of fair value less costs to sell and value in use for an individual asset, unless the asset's value in use cannot be estimated to be close to its fair value less costs to sell and it does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

**(j) Inventories**

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

- Raw materials - purchase cost on a first-in, first-out basis; and
- Finished goods and work-in-progress - cost of direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

**(k) Trade receivables**

Trade receivables are recognised and carried at original invoice amount less a provision for any uncollectable amounts. Receivables are non-interest bearing and are generally on 30 day terms, unless otherwise agreed with the customer. Collectability of trade receivables is reviewed on an ongoing basis. Debts that are known to be uncollectable are written off when identified. An allowance for doubtful debts is raised when there is objective evidence that the company will not be able to collect the debt.

Receivables from related parties are recognised and carried at amortised cost, with interest recognised using the effective interest rate method.

**(l) Cash and cash equivalents**

Cash and cash equivalents in the statement of financial position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less. For the purposes of the Statement of Cash Flows, cash and cash equivalents consist of cash and equivalents as defined above, net of outstanding bank overdrafts.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**(m) Provisions**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income net of any reimbursement.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time, is recognised as a finance cost.

**(n) Share-based payment transactions**

*(i) Equity-settled transactions*

The Company provides benefits to employees (including key management personnel) in the form of share-based payments, whereby employees render services in exchange for shares or rights over shares ('equity-settled transactions').

There are currently two plans in place to provide these benefits:

- the XTEK Long Term Incentive Performance Rights Plan (LTIPRP); and
- the Employee Share Ownership Plan (ESOP), which provides benefits to all employees.

The cost of these equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by reference to either the Black Scholes valuation or by an external valuer using a binomial model.

In valuing equity-settled transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of XTEK Limited ('market conditions') if applicable.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled (the vesting period), ending on the date on which the relevant employees become fully entitled to the award ('vesting date').

At each subsequent reporting date until vesting, the cumulative charge to the statement of comprehensive income is the product of (i) the grant date fair value of the award, (ii) the current best estimate of the awards that will vest, taking into account such factors as the likelihood of employee turnover during the vesting period and the likelihood of non market performance conditions being met; and (iii) the expired portion of the vesting period. The charge to the statement of comprehensive income for the period is the cumulative amount as calculated above less the amounts already charged in previous periods. There is also a corresponding credit to equity.

Until an award has vested, any amounts recorded are contingent and will be adjusted if more or fewer awards vest than were originally anticipated to do so. Any award subject to a market condition is considered to vest irrespective of whether or not the market condition is fulfilled, provided that all other conditions are satisfied.

If the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified. An additional expense is recognised for any modification that increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee, as measured at the date of modification.

If an equity-settled award is cancelled, it is treated as if it has vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately. However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new award are treated as if they were a modification of the original award, as described in the previous paragraph.

The dilutive effect, if any, of outstanding options is reflected as an additional share dilution in the computation of diluted earnings per share.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**(o) Revenue recognition**

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the entity and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

*(i) Sale of Goods*

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Risks and rewards of ownership are considered passed to the buyer at the time of delivery of the goods to the customer.

*(ii) Rendering of Services*

Revenue is recognised by reference to the stage of completion of a contract.

Stage of completion is measured by reference to labour hours incurred to date as a percentage of total estimated labour hours for each contract. When the contract outcome cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

*(iii) Interest revenue*

Revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

*(iv) Deferred Income*

Deferred income consists of customer deposits received. Deferred income is not recognised as revenue until such time when the ownership of the goods is transferred to the customer.

**(p) Taxes**

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the national income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses.

Deferred income tax is provided on all temporary differences at the statement of financial position date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognised for all taxable differences:

- except where the deferred income tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, except where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax assets and unused tax losses can be utilised:

- except where the deferred income tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements****(q) Taxes Continued**

Deferred income tax assets and liabilities are measured at all tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantially enacted at the statement of financial position date.

Income taxes relating to items recognised directly in equity are recognised in equity and not in the statement of comprehensive income.

**(r) Employee benefits**

Provision is made for employee benefits accumulated as a result of employees rendering services up to the reporting date. These benefits include wages and salaries, annual leave and long service leave.

Liabilities arising in respect of wages and salaries, annual leave and any other employee benefits expected to be settled within twelve months of the reporting date are measured at their nominal amounts based on remuneration rates which are expected to be paid when the liability is settled. All other employee benefit liabilities are measured at the present value of the estimated future cash outflow to be made in respect of services provided by employees up to the reporting date. In determining the present value of future cash outflows, the market yield as at the reporting date on national government bonds, which have terms to maturity approximating the terms of the related liability, are used.

Employee benefit expenses and revenues arising in respect of the following categories:

- wages and salaries, non-monetary benefits, annual leave, long service leave and other leave entitlements; and
- other types of employee entitlements,

are charged against surpluses on a net basis in their respective categories.

The contributions made to superannuation funds are charged to the statement of comprehensive income.

*(i) Long service leave*

The liability for long service leave is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on national government bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

*(ii) Termination benefits*

Termination benefits are payable when employment is terminated before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after statement of financial position date are discounted to present value.

**(s) Earnings per share***(i) Basic earnings per share*

Basic EPS is calculated as net profit attributable to members, adjusted to exclude costs of servicing equity (other than dividends) and preference share dividends, divided by the weighted average number of ordinary shares, adjusted for any bonus element.

*(ii) Diluted earnings per share*

Diluted EPS is calculated as net profit attributable to members, adjusted for:

- costs of servicing equity (other than dividends) and preference share dividends;
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- other non-discretionary charges in revenues or expenses during the period that would result from the dilution of potential ordinary shares;

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements****(t) Earnings per share continued**

- divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

**(u) Interest-bearing loans and borrowings**

All loans and borrowings are initially recognised at cost, being the fair value of the consideration received net of issue costs associated with the borrowing. After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any issue costs, and any discount or premium on settlement. Gains and losses are recognised in the statement of comprehensive income when the liabilities are derecognised and as well as through the amortisation process.

**(v) Trade and other payables**

These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

**(w) Contributed equity**

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or options for the acquisition of a business are not included in the cost of the acquisition as part of the purchase consideration.

**(x) Dividends**

No dividends were declared on or before or subsequent to the end of the financial year.

**(y) Other Taxes**

Revenues, expenses and assets are recognised net of the amount of GST except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

Cash flows are included in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

**(z) Loans and receivable**

Loans and receivables are non-derivative financial assets with fixed and determinable payments that are not quoted in an active market. Such assets are carried at amortised cost using the effective interest rate method. Gains and losses are recognised in profit and loss when the loans and receivables are derecognised or impaired, as well as through the amortisation process.

**Impairment of Loans**

If there is objective evidence that an impairment loss on receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced either directly or through use of an allowance account. The amount of the loss is recognised in profit or loss.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**(aa) Government grants**

Government grants are recognised when there is reasonable assurance that the grant will be received and all attaching conditions will be complied with.

When the grant relates to an expense item, it is recognised as income over the periods necessary to match the grant on a systematic basis to the costs that it is intended to compensate. They are not credited directly to shareholders equity.

When the grant relates to an asset, the fair value is credited to a deferred income account and is released to the statement of comprehensive statement over the expected useful life of the relevant asset by equal annual instalments.

**(ab) Leases**

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Company as a lessee

Finance leases, which transfer to the Company substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised as an expense in profit or loss.

Capitalised leased assets are depreciated over the shorter of the estimated useful life of the asset and the lease term if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term.

Operating lease payments are recognised as an expense in the statement of comprehensive income on a straight-line basis over the lease term. Lease incentives are recognised in the statement of comprehensive income as an integral part of the total lease expense.

Company as a lessor

Leases in which the Company retains substantially all the risks and benefits of ownership of the leased asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as rental income.

Income from leases relates only to property which is sub-let by the Company.

**2. Revenue**

*(i) Options and share performance rights*

Options and share performance rights granted to employees and directors that are considered to be potential ordinary shares have been included in the determination of diluted earnings per share to the extent to which they are dilutive. As at reporting date, the options and share performance rights have not been included in the determination of basic earnings per share.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

**7. Property, Plant and Equipment**

During the full year ended 30 June 2012, the company acquired assets with a cost of \$286,058 (2011: \$427,903), which include \$281,380 of work in progress associated with the construction of a XTclave™ (2011: \$335,020).

**8. Share Based Payments**

**(a) Expired Options and Share Performance Rights**

There were no options or share performance rights exercisable at the end of the year or any prior year. As at 30 June 2012 there were no unissued shares.

**(b) Weighted average share price**

The weighted average market price at 30 June 2012 was 2.4 cents.

**9. Interest Bearing Liabilities**

In June 2012 an unsecured loan of \$50,000 was provided to the company by a related party (Vasey Pty Ltd) with an interest rate of 14.5% to fund a short term cash flow deficit. There are no covenants associated with this loan which was repaid on 28 August 2012.

**10. Other Current Liabilities**

During the current financial year, the Company entered into a contractual arrangement that is in the legal form of a sale and operating leaseback arrangement with a related party (UDB Pty Ltd) associated with a Remote Positioning Vehicle. However, the substance of the arrangement and the relationship between the parties meant that revenue from the transaction was not recognised, but rather deferred within other current liabilities, to the amount of \$200,000. The recognition of revenue from this transaction will be re-assessed upon expiration of the lease term.

**11. Contributed Equity**

**(a) Share Capital**

<b>Movement in ordinary shares on issue</b>	<b>No of shares</b>	<b>\$</b>

Transaction costs on share issue	-	(16,545)
At 30 June 2012	<u>145,919,196</u>	<u>18,523,681</u>

**Ordinary Shares**

Fully paid ordinary shares carry one vote per share and carry the right to dividends.

**(b) Other Equity Securities**

**Movement in other equity securities**

At 1 July 2011 and at 30 June 2012	\$ 73,067
<b>Total Contributed Equity</b>	<u><u>18,596,748</u></u>

**12. Contingent Liabilities**

There are no contingent liabilities at 30 June 2012

No changes have been reported in contingent liabilities since the last annual reporting date.

**Appendix 4E**  
**Preliminary Final Report – 30 June 2012**  
**Notes to the Financial Statements**

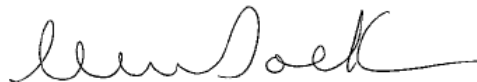

**13. Events occurring after the balance sheet date**

- (a) On 20 August 2012, the Company announced that Non-Renounceable Rights Issue had been completed, with a total of 19,893,341 new ordinary shares issued at an issue price of \$0.026 per ordinary share, for a total value of \$517,226.00 (before issue costs).
- (b) On 23 August 2012, the Company received an application from a sophisticated investor for the placement and issue of 7,700,000 New Shares at an issue price of \$0.026 per ordinary share in December 2012 to the value of \$200,200.
- (c) In August 2012, the loan to Vasey Pty Ltd was repaid in full by means of share script and cash.
- (d) In August 2012, the underwriting fee received from UDB Pty Ltd for the Rights Issue was repaid in share script.

**Compliance**

- 1. This report is based on accounts which are in the process of being audited.
- 2. The entity has a formally constituted audit committee.
