MOU with Brisanzia Technologies Pvt Ltd for a potential DiCOM™ facility in India

AnaeCo Limited (“AnaeCo”) and Brisanzia Technologies Pvt Ltd (“Brisanzia”) of New Delhi have signed a MOU to cooperatively explore the implementation of AnaeCo’s DiCOM™ Alternative Waste Technology (AWT) at a suitable site in India.

Under the terms of the MOU the parties will consider the technical and commercial feasibility of deploying AnaeCo’s patented DiCOM™ solution, under licence in India. AnaeCo would manage the design and commissioning of the facility and Brisanzia would have project management, construction, operations and maintenance responsibilities.

“India is experiencing unprecedented growth in volumes of waste and we are pleased to be able to offer AnaeCo’s world leading solution to address this burgeoning issue. AnaeCo’s innovative technology provides municipalities and waste management companies with a sustainable solution for waste management” said Ziaul Hasan Rizvi-Director, Brisanzia.

“We are pleased to have the opportunity to work with an experienced company such as Brisanzia in order to provide a solution for the essential service of waste management. Brisanzia’s strengths align well with AnaeCo’s capabilities and our strategy for the Indian market,” said Patrick Kedemos, Managing Director & CEO of AnaeCo.

About AnaeCo

AnaeCo delivers Alternative Waste Technology (AWT) facilities based on the patented DiCOM™ bioconversion process. The system incorporates advanced sorting, recycling, anaerobic digestion and aerobic composting to recycle municipal solid waste (MSW) into renewable energy from biogas, agricultural grade compost and recyclables such as steel, aluminium, glass and plastics, thus ensuring maximum diversion from landfill and ensuring social, economic and environmentally sustainable management of MSW.

The DiCOM™ process enables resource recovery intervention closer to source, with enhancement of existing waste transfer stations now a viable waste management option. AnaeCo's experienced team provides design, construction, commissioning, operation and maintenance services for DiCOM™ AWT facilities, as well as management of all outputs including renewable energy, compost, recyclable materials and non-recyclable residuals.
