NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

These interim consolidated financial statements are general purpose financial statements prepared in accordance with the requirements of the Corporations Act 2001, applicable accounting standards including AASB 134 'Interim Financial Reporting', Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board ('AASB'). Compliance with AASB 134 ensures compliance with IAS 34 'Interim Financial Reporting'.

The condensed consolidated financial statements are for the consolidated entity consisting of Canyon Resources Limited and its subsidiaries.

This condensed consolidated interim financial report does not include full disclosures of the type normally included in an annual financial report. Therefore, it cannot be expected to provide as full an understanding of the financial performance, financial position and cash flows of the Group as in the full financial report.

It is recommended that the interim financial report be read in conjunction with the annual financial report for the year ended 30 June 2012 and any public announcements made by Canyon Resources Limited during the half-year in accordance with continuous disclosure requirements arising under the Corporations Act 2001 and the ASX Listing Rules.

Basis of preparation

The interim report has been prepared on a historical cost basis, except for the revaluation of certain financial instruments to fair value. Cost is based on the fair value of the consideration given in exchange for assets. The company is domiciled in Australia and all amounts are presented in Australian dollars, unless otherwise noted.

For the purpose of preparing the interim report, the half-year has been treated as a discrete reporting period.

Significant accounting judgments and key estimates

The preparation of interim financial reports requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expense. Actual results may differ from these estimates.

In preparing this interim report, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial report for the year ended 30 June 2012.

Adoption of new and revised Accounting Standards

In the half-year ended 31 December 2012, the Directors have reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to the Group's operations and effective for annual reporting periods beginning on or after 1 July 2011.

It has been determined by the Directors that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on the Group's business and, therefore, no change is necessary to Group accounting policies.

The Group has also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the half-year ended 31 December 2012. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on the Group's business and, therefore, no change necessary to Group accounting policies.

Financial assets

Financial assets in the scope of AASB 139 Financial Instruments: Recognition and Measurement are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-forsale investments, as appropriate. When financial assets are recognised initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. The Group determines the classification of its financial assets after initial recognition and, when allowed and appropriate, reevaluates this designation at each financial year-end. All regular way purchases and sales of financial assets are recognised on the trade date i.e. the date that the Group commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets under contracts that require delivery of the assets within the period established generally by regulation or convention in the marketplace.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial assets (continued)

Available-for-sale investments

Available for sale investments are those non-derivative financial assets that are designated as available for sale or are not classified as any other category. After initial recognition available-for sale investments are measured at fair value with gains or losses being recognised as a separate component of equity until the investment is derecognised or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is recognised in profit or loss.

The fair value of investments that are actively traded in organised financial markets is determined by reference to quoted market bid prices at the close of business on the balance date. For investments with no active market, fair value is determined using valuation techniques. Such techniques include using recent arm's length market transactions; reference to the current market value of another instrument that is substantially the same; discounted cash flow analysis and option pricing models.

Impairment of financial assets

The Group assesses at each balance date whether a financial asset or group of financial assets is impaired.

Available-for-sale investments

If there is objective evidence that an available-for-sale investment is impaired, an amount comprising the difference between its cost and its current fair value, less any impairment loss previously recognised in profit or loss, is transferred from equity to the statement of comprehensive income. Reversals of impairment losses for equity instruments classified as available-for-sale are not recognised in profit or loss. Reversals of impairment losses for debt instruments are reversed through profit or loss if the increase in an instrument's fair value can be objectively related to an event occurring after the impairment loss was recognised in profit or loss.

NOTE 7: COMMITMENTS

a) Exploration expenditure commitments

In order to maintain current rights of tenure to mining tenements and permits, the Group has the following discretionary exploration expenditure requirements up until expiry of leases. These obligations, which are subject to renegotiation upon expiry of the leases, are not provided for in the financial statements and are payable:

	31 December 2012	30 June 2012
	\$	\$
Within one year	1,901,284	1,147,125
Later than one year but not later than 5 years	7,605,136	4,588,500
	9,506,420	5,735,625
b) Operating lease commitments		
Within one year	83,702	46,928
Later than one year but not later than 5 years	15,267	80,154
	98,969	127,082

Included in commitments is the minimum annual expenditure of AUD\$726,979 required to maintain rights to the Derosa project in Burkina Faso. The project is the subject of a Farm-out agreement with Rumble Resources Limited. Rumble can earn a 75% interest in the project through expenditure of \$3,000,000.

If the Company decides to relinquish certain leases and/or does not meet these obligations, assets recognised in the statement of financial position may require review to determine the appropriateness of carrying values. The sale, transfer or farm-out of exploration rights to third parties will reduce or extinguish these obligations.

NOTE 8: CONTINGENT LIABILITIES

Project acquisition contingent liabilities

At the reporting date the consolidated entity has the following contingent liabilities under agreements entered into for the acquisition of exploration projects.

In November 2011 the consolidated entity acquired the Pinarello project in Burkina Faso. Under the agreement consideration comprises the following contingent liabilities:

- US\$240,000 on the second anniversary of the signing of the agreement
- US\$310,000 on the third anniversary of the signing of the agreement

At any time after the first payment Canyon may elect not to proceed with the acquisition in which case Canyon would not be liable for any further cash payments to the vendor, resulting in the full impairment of carried forward costs at that time.

Under the agreement to acquire the Derosa project the consolidated entity is required to make the following payments and share issues:

- US\$100,000 on the second anniversary of the permits being granted
- US\$290,000 and the issue of 100,000 shares on the third anniversary of the permits being granted

Canyon may withdraw from the agreement at any time however, should Canyon not make the purchase payments the agreement will be terminated and Canyon will forfeit its right to ownership and will not have the right to be reimbursed.

NOTE 9: EVENTS SUBSEQUENT TO BALANCE DATE

Subsequent to the balance date the Company completed a capital raising of \$1,209,000 before issue costs through the issue of 9.3 million shares at an issue price of \$0.13 each and \$569,400 via a Share Purchase Plan.

No matter or circumstance, other than the above, has arisen which has significantly affected, or may significantly affect the operations of the Group, the result of those operations, or the state of affairs of the Group in subsequent financial years.
