Facsimile:	(07) 3156 7776

ENDS

For and on behalf of the Board

Morne Engelbrecht

Acting Chief Executive Officer

ABOUT CARBON ENERGY

Carbon energy specialises in underground coal gasification (UCG). Our proprietary keyseam® technology is the key to unlocking new energy sources, transforming stranded, deep or otherwise inaccessible coal resources into high-value fuels with lower carbon emissions.

Carbon Energy's complete end-to-end UCG services deliver world-class gas projects from initial project assessment through to commercial project development, operations, site decommissioning and rehabilitation.

Carbon Energy achieved Proof of Concept of its technology following 10 years of research with Australia's premier scientific research agency, the Commonwealth Scientific and Industrial Research organisation (CSIRO), 5 years of in-field trials and over \$150 million investment in technology development.

By successfully proving our keyseam technology, we have earned a reputation for delivering consistent, high quality product gas which can be used to produce power, fertilisers and pipeline quality gas. keyseam maximises resource efficiency, extracting up to 20 times more energy from the same resource than coal seam gas (CSG), whilst preserving groundwater quality.

Carbon Energy also has previously announced three wholly-owned assets available for development:

- 1.4 billion tonnes¹ of JORC Inferred Coal Resource in southeast Queensland's Surat Basin which is part of a 4 to 8 billion tonnes of Exploration target for coal;
- 910 million tonnes² of JORC Inferred Coal Resource in Wyoming USA plus an additional 423 million tonnes exploration potential; and
- 743PJ of Certified 2P syngas reserves³ in southeast Queensland's Surat Basin.

The Company is headquartered in Brisbane, Australia, listed on the Australian securities Exchange (ASX) as CNX and is quoted on the OTCQX International Exchange as CNXAY in the united states. Carbon Energy is developing potential UCG projects in Australia, China, Chile and the United States.
