### Applications Lodged for Offshore Petroleum Licences

Eneabba Gas Limited (“Eneabba” or “the Company”) is pleased to announce that it has lodged four applications for petroleum exploration licences in Australian Commonwealth waters.

Eneabba has submitted these applications through its newly incorporated oil & gas exploration subsidiary, Eneabba Petroleum Pty Ltd, which is jointly owned together with a team of oil & gas technical consultants.

Results of the application round for these licences are expected to be released in the first quarter of 2014.

The Company continues to assess development options and search for funding partners for its other energy projects, being the Sargon underground coal gasification / coal bed methane project and the gas fired Centauri-1 168MW Power Station project and is seeking to generate value for shareholders through new energy opportunities including coal and oil & gas exploration.

For further information, please contact:-
