

## ASX Announcement

### Encouraging Mapping and Rock Chip Sample Results E69/2377

Golden West Resources Limited (“GWR” or “the Company”) through its 100% owned subsidiary Iron West Resources Pty Ltd has received encouraging results from a geological mapping and rock chip sampling program recently completed at the Lee Steere Project, where GWR is earning its 55% interest from Dragon Energy Limited (ASX Code: DLE and “Dragon”).

The 155km<sup>2</sup> Lee Steere Project consists of two exploration licences E69/2126 and E69/2377 which are located in the Earaheedy Basin approximately 200km north east of Wiluna (Figure 1). Dragon holds the two tenements with the iron ore rights being subject to a joint venture between Dragon and Polaris Metals Pty Ltd a wholly owned subsidiary of Mineral Resources Limited (ASX Code: MIN). A portion of GWR’s, 1,380km<sup>2</sup> and 100% owned Earaheedy project abuts E69/2377 (Figure 2). The Earaheedy Basin is highly prospective for iron and manganese deposits, with iron mineralisation associated with the Frere Formation.

Previous exploration in the 1970s, principally by Amax and BHP, identified hematite and goethite mineralisation along the Frere Formation. Recently there has been a surge of exploration activity within the region with Anglo American executing a joint venture agreement with Cazaly Resources and Vector Resources in 2011 on ground adjacent to the Lee Steere Project. Anglo can earn up to 75% via staged payments of up to \$51M and completing a BFS. Other ASX listed companies active in the region are Atlas Iron Limited (Giralia), Zenith Minerals Limited and Enterprise Metals Limited.

The geological mapping and rock chip sampling program recently completed by GWR has identified significant outcropping hematite mineralisation occurring in six discrete lenses having a cumulative strike length of 8.4km. The mineralisation is hosted by the Frere Formation, which is present over the entire 20km length of E69/2377. All the rock chip sample results are listed in Appendix 1 with highlights in Table 1.

Iron results range from a maximum of 65.8% Fe to a minimum of 8.5% Fe, with 33% of samples returning grades  $\geq$ 60% Fe and 61% of samples returning grades  $\geq$ 55% Fe. Several samples also returned high values of Mn with one sample recording 42.7% Mn. The rock chip samples indicate high-grade iron values at surface, however, the depth extent of this possible DSO mineralisation will not be known until drilling has been undertaken.

GWR plans to carry out a detailed aerial magnetic survey over its 100% owned E69/3022 and upon the Lee Steere Project tenements E69/2126 and E69/2377 during February 2013. Detailed satellite imagery has also been acquired for E69/2126 and interpretation of the data is underway.

The terms of the Farm-in Agreement between Iron West and Dragon were summarised in the ASX announcement dated 24 December 2012. Upon completion of the farm-in commitment by Iron West the interest of the respective parties in minerals on the tenements will be as follows:

Name of party	Iron Ore	Other minerals
Iron West	55%	55%
Dragon	20%	45%
Polaris	25%	Nil

#### Competent Person's Statement

The information in this report which relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Brian Varndell, who is a Fellow of the Australasian Institute of Mining & Metallurgy ("AusIMM") and independent consultant to the Company. Mr Varndell is a consultant of Al Maynard & Associates Pty Ltd and has 40 years of experience in exploration and mining in a variety of mineral deposit styles. Mr Varndell has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Varndell consents to inclusion in the report of the matters based on his information in the form and context in which it appears.
