End of announcement.

## ABOUT KINETIKO ENERGY

Kinetiko Energy Limited (ASX: KKO) is an Australian gas explorer focused on advanced coal bed methane (CBM) opportunities in rapidly developing markets in Southern Africa. South Africa has extensive gassy coal basins, extensive energy infrastructure and a growing gas demand which make it an attractive area for a rapidly emergent gas industry.

Kinetiko is an early mover in the region and is pursuing gas projects that will help supply clean energy and create jobs. Kinetiko has a growing South Africa exploration footprint:

- The Amersfoort Project (Kinetiko 49%, Badimo Gas 51%) covers an area of 1,601 Km<sup>2</sup> and has Prospective Resources of 2.4tcf GIP;
- Kinetiko has four granted TCPs (7,890Km<sup>2</sup>) and two lodged applications; combined these TCPs total a potential land tenure of 14,106 Km<sup>2</sup> (Kinetiko 100%);
- Gustavson Associates estimate Kinetiko's four TCP areas to have Prospective resources of Gas In Place (GIP) of 9.3tcf (P<sub>50</sub>). TCPs allow early evaluation and a unique right to apply for exploration licenses;
- Kinetiko's potential exploration or Amersfoort and the TCPs totals 15,707Km<sup>2</sup>. In addition, Badimo Gas has ~7,086Km<sup>2</sup> of applications pending for which Kinetiko has access to via an MOU.
