**BULLANT ORE PROCESSING AGREEMENT
SIGNED WITH NORTON GOLD FIELDS LIMITED**

Kalgoorlie Mining Company (ASX:KMC) is pleased to announce the signing of an ore processing agreement (Agreement) with Norton Gold Fields (ASX:NGF) for the sale of up to 280,000 tonnes of ore from the Bullant Gold Mine.

The Agreement allows for the processing of Bullant ore at NGF's Paddington Processing Facility near Kalgoorlie (3.3Mtpa), where it will be blended with other feed sources.

A Summary of the Agreement terms are:

- Sale to NGF of up to 280,000 tonnes of ore with deliveries commencing April 2013 and continuing until December 2014. The term may be extended by mutual consent.
- Ore batches of up to 20,000 dry tonnes per month from the Bullant Run Of Mine (ROM) Pad, hauled and processed by NGF for a processing charge per dry ore tonne.
- A bulk sample per ore batch will be crushed and sampled at Paddington, then assayed to determine grade and moisture content.

The Agreement represents a critical milestone for KMC as another step towards achieving the stated goal of returning the Bullant Gold Mine to production.

With certainty achieved in the ore processing arrangements and with the completion of the Mining Plan which is being finalised, KMC can now move confidently to the formal tender process for the underground mining contract and the restart of mining.

James Croser
