**GALOC-5H AND GALOC-6H DRILLING UPDATE**

**Highlights:**

- **Weekly drilling update for Galoc-5H and 6H development wells.**

Otto Energy Limited (“Otto”) (ASX:OEL), as operator of the producing Galoc oilfield joint venture offshore the Philippines, provides the following update on the Galoc-5H and Galoc-6H drilling campaign in SC14C, part of the Galoc Phase II development project approved in 2012.

**Progress**

During the period from 0600 hours (AWST) on 18 September 2013 to 0600 hours (AWST) on 25 September 2013, successfully completed running of the G-5H lower completion and continued operations to run the upper completion and assembly on G-5H.

**Forward Plan**

The forward plan is to complete running of the G-5H and G-6H upper completions and assemblies and to rig up for the well clean-up flow to surface for both wells.

**OTTO AT A GLANCE**

- ASX-listed oil and gas company with a strategy to grow its integrated oil and gas business across exploration, development and production
- Focused on South East Asia and East Africa
- Operator of the producing Galoc oil field in the Philippines, which provides cashflow
- Opportunity rich with substantial exploration prospects and leads

### Location and Proposed Depth

The Galoc field is located in Service Contract SC14C (Galoc Sub Block) in 290 metres of water approximately 65km North West of Palawan Island and 350km south of Manila in the Republic of the Philippines. The Galoc-5H and Galoc-6H development wells are being drilled within the existing producing field that has delivered over 10 MMbbls of production since the field was commissioned in 2008.

The Galoc-5H and Galoc-6H development wells will be drilled to a total vertical depth of 2,190 metres with 1,777 metres of horizontal completion in the G-5H well and 1,389 metres of horizontal completion in the G-6H well. Drilling is expected to take approximately 115 days including the flowing of the wells for clean-up.

After drilling of both Galoc-5H and Galoc-6H is completed, the DOF operated Skandia Skansen construction vessel will be used to install the subsea equipment and complete the hook-up of both wells to the FPSO Rubicon Intrepid.

First oil from the Phase II wells is expected in November 2013.

**APPENDIX A: SUMMARY**

<b>SC14C Galoc-5H and Galoc-6H Development Wells</b>	
Location	Palawan Basin, Philippines
Permit	SC14C
Well Type	Horizontal development wells
Target	Turbiditic sandstone in Miocene Galoc Classic Unit
Water Depth	Approximately 311 metres
Planned total depth	Approximately 2,190 metres vertical Total drilled length of 4,497 metres for the G-5H well Total drilled length of 3,958 metres for the G-6H well
Duration	115 days (including well clean-up flow)

Note: Depth is measured in total metres drilled below the rig rotary table or drilling floor
