PACNET expands Asia Pacific Data Centre Platform into NEXTDC's M1

The Directors of NEXTDC Limited (ASX: NXT) (“the Company” or “NEXTDC”) are pleased to announce that global provider of integrated network services and data centre platforms, Pacnet, have chosen NEXTDC’s M1 facility to launch their Melbourne data centre.

Details of the arrangement involve Pacnet consolidating three existing data centres in Melbourne, into a large caged suite in NEXTDC’s M1 facility to house approximately 100 racks. This significant commitment indicates Pacnet’s trust in NEXTDC’s next generation facilities in enabling them to deliver premium services to meet the demands of their Australian based customers.

“We are excited to partner with NEXTDC to expand our Asia Pacific integrated data centre platform into Melbourne. Coupled with our Sydney facility and network, this new footprint will enable Pacnet to offer leading edge managed data, including providing geographically diverse colocation facilities underpinned by major network services to the Australian market for domestic and international solutions” ,said Nigel Stitt, Pacnet Australia CEO.

“The addition of the M1 data centre to the Pacnet Australia platform creates operational efficiencies for our network and allows us to combine our services and ecosystem with NEXTDC”, stated Jim Fagan, President of Managed Services at Pacnet.

‘We are delighted to welcome Pacnet to the NEXTDC ecosystem. The addition of Pacnet further diversifies the service provider offering within our data centres, giving our customers greater

reach into international markets through Pacnet’s global credentials”, said Craig Scroggie, NEXTDC CEO.

About NEXTDC

NEXTDC is an ASX 300 company and is the only independent data centre operator with strategic footprint in all major growth markets in Australia. NEXTDC offers a range of highly flexible, scalable, resilient and secure colocation services to corporate, government and IT services companies. NEXTDC’s purpose-built facilities have been designed to address the market’s growing appetite for energy-efficient, independent data centres in which organisations can host their critical IT infrastructure, and also to address the emergence and growth of cloud (internet-based) computing. As a cloud enabler, NEXTDC’s enterprise-class data centre facilities address the challenges of security, connectivity and neutrality that have hindered the wider acceptance of cloud computing.
