Siana mine site – Typhoon Haiyan

Super Typhoon Haiyan passed approximately 200km north of the Siana gold mine. Whilst the site experienced high wind strengths and levels of precipitation, no material damage was recorded.

The Company emergency response teams were activated to protect the site and provide assistance to the communities in the region.

The mine site remains on care-and-maintenance with the Cease and Desist Order still in place. Dialogue with the Mines and Geosciences Bureau and the Environmental Management Bureau is on-going.

Re-instatement of earthmoving activities, procurement of consumables and re-engagement of a mine workforce will commence once the Cease and Desist Order is rescinded. Proposed capital expenditures on additional site facilities are also on hold.

Steve Norregaard
Managing Director
