### **REVIEW OF OPERATIONS**

**Results Summary** 

• Half-year revenue of \$167,763.

### Klick Oil Field, Woods County Oklahoma

World Oil Resources Limited and CMX Inc ("CMX") each own a 49.2% NWI in the Klick East Oil Field which comprises 320 acres. CMX is the operator and Chesapeake Energy owns the remaining 1.6% NWI.

The Company's gross revenue from production was [\$167,763] for the six months ended 31 December 2012.

Joint venture production for this period was 5,259 Barrels and 16,632 mscf of gas. World Oil Resources Limited has a 40% share of this production after royalties.

Production was constrained during the half year because of limits to salt water disposal capacity resulting from an adjacent third party disposal well ceasing to take water. Options to increase Klick's production were reviewed during the half-year along with alternative salt water disposal arrangements.

### Wherry and Welch-Bornholdt Oil Fields Rice and McPherson Counties, Kansas USA (WLR 50% WI)

World Oil Resources Limited holds a 50% net working interest in approximately 15,000 acres (60.6 square kilometres) covering the field in Rice and McPherson Counties. CMX holds the remaining 50% NWI in the acreage and is operator. The acreage is generally held under 3 year leases with a further 2 year option to extend. During the period, the 2 year options were mostly exercised for leases acquired in late 2009 when the JV commenced its program to acquire acreage over the field.

In early 2012, the Joint Venture drilled the Socrates 1H appraisal well on the field. Excellent log results and strong oil shows from this well demonstrated the potential of the field's Mississippian reservoir. Production testing of the well continued during the year, however flow rates were disappointing due to problems stemming from a Packers Plus completion unit that deployed prematurely while being run into the well's lateral section.

### **Directors' Report (continued)**

A subsidiary of Shell Oil filed a Notice of Intent to Drill with the Kansas oil industry regulator for a horizontal well at a location approximately 5km to the South of Socrates 1H. This well will target the same Mississippian reservoir as Socrates 1H and Shell has indicated that it will spud early in 2013.

### Gavea Joint Venture, on-shore Brazil

Brazil's oil industry regulator the ANP reports regularly to the public on the status of production and development licences in the country. The Harpia and Guara oil fields (WLR 40%) continue to be reported, respectively, as production and development licenses.

### Corporate

New Directors were appointed to the Company. Mr John Ceccon was appointed during the half year as a Non-executive Director and Mr Christopher Manie was appointed as a Non-executive Director on 14 January 2013. Mr Amos Meltzer was appointed acting Chairman and subsequently resigned in February 2013.

Mr Philip Galloway resigned as Managing Director on 11 December 2012.

Mr Michael Goldhirsch retired as Chairman during the quarter after 25 years as a Director of the Company and Mr Stephen Shnider also retired as a Non-Executive Director, a position that he has held since 1987.

Mr John Weston remained on the Board. John is a petroleum geologist based in London with more than 30 years experience in the oil industry.

### Notes to the Half-Year Financial Statements

### FOR THE HALF-YEAR ENDED 31 DECEMBER 2012

### 1. BASIS OF PREPARATION OF THE HALF-YEAR FINANCIAL REPORT

### (a) Statement of compliance

The half-year financial report ended 31 December 2012 is a general purpose financial report that has been prepared in accordance with the requirements of the Corporations Act 2001 and AASB 134 Interim Financial Reporting.

(b)Basis of preparation

The half-year financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the financial performance, financial position, and financing and investing activities of the Company as the most recent annual financial report.

The half-year financial report should be read in conjunction with the annual financial report of World Oil Resources Limited as at 30 June 2012.

It is also recommended that the half-year financial report be considered together with any public announcements made by World Oil Resources Limited during the half-year ended 31 December 2012 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

The half-year financial report has been prepared on a historical cost basis, except for available-for-sale financial assets held at fair value and financial assets at fair value through profit and loss. All amounts are presented in Australian dollars.

(c) Significant accounting policies and methods of computation

The half-year consolidated financial statements have been prepared using the same accounting policies and methods of computation as used in the annual financial statements for the year ended 30 June 2012.

### (d) Going concern

As a developing business the Group has experienced half-year operating losses of \$7,239,894 (of which \$6,698,560 is an impairment charge against development assets) and net cash outflows from operating activities of \$247,426 for the half-year period ended 31 December 2012.

The continuing viability of the Group and its ability to continue as a going concern is dependent upon the following:

- the pro-rata non-renounceable rights issue offer (refer note 3)
- the unknown impact of the off-market takeover bid (refer note 3)
- the group being successful in realising its intangible assets

As a result there is significant uncertainty whether the Group will continue as a going concern and, therefore, whether it will realise its assets and settle its liabilities and commitments in the normal course of business and at the amounts stated in the financial report. However, the Directors believe that the Group will be able to access sufficient sources of funds and, accordingly, have prepared the financial report on a going concern basis.

Accordingly, no adjustments have been made to the financial report relating to the recoverability and classification of the asset carrying amounts or the amount and classification of liabilities that might be necessary should the Group not continue as a going concern.

Development assets, relating to the Harpia & Guara fields in Brazil, totaling \$6,698,560 have been impaired during the half-year period ended 31 December 2012.

Whilst the Directors believe that the Group will realise a value in excess of the current carrying value there is uncertainty in the future cash flows relating to these development assets. The Directors have decided to be conservative and impair the value of the development assets.

The directors are currently investigating the viability of the development assets, and believe that the assets have a value in excess of the revised carrying value mainly because our appointed Consultant has managed to recommence communication with the Brazilian Joint Venture partner.

Our responsibility is to express a conclusion on the consolidated half-year financial report based on our review. We conducted our review in accordance with the Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the Corporations Act 2001 including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 Interim Financial Reporting and the Corporations Regulations 2001. A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Independence

In conducting our review, we complied with the independence requirements of the Corporations Act 2001.

#### Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of World Oil Resources Ltd is not in accordance with the Corporations Act 2001, including:

- a giving a true and fair view of the consolidated entity's financial position as at 31 December 2012 and of its performance for the half-year ended on that date; and
- b complying with Accounting Standard AASB 134 Interim Financial Reporting and Corporations Regulations 2001.

#### Material uncertainty regarding continuation as a going

Without qualifying our opinion, we draw attention to Note 1 to the half-year financial report which indicates uncertainties regarding the going concern assumption, including successful negotiations to obtain additional financing. The uncertainty around the group's ability to obtain sufficient financing indicates the existence of a material uncertainty which may cast significant doubt about the company's ability to continue as a going concern and therefore, the company may be unable to realise its assets and discharge its liabilities in the normal course of business, and at the amounts stated in the financial report.
