

QUARTERLY REPORT

Quarter Ended 31 December 2013

Exploration Portfolio – Indonesia

With the continuing difficulties surrounding operating in Indonesia, during the quarter, the Company finalised its arrangements with its Indonesian advisers, Corpac Pty Ltd and Ex-Mining Services Pty Ltd effective 27 November 2013. Finalising these arrangements included the payment of a termination payment to Corpac/Ex Mining, reaching agreement with the ODNI Vendors on the redemption of the 66M Performance Shares, cancellation of the 10M Class W Options, 20M Class X Options and the 8.33M Delayed Shares (that all formed part of the original ODNI Consideration Securities).

Following on from this, post 31st December 2013 Exalt has resolved to discontinue operations in Indonesia due to the reasons outlined above and the inability of the Company to attract acquisition/development finance to fund early stage, small scale coal production assets. As a result of this decision, the Company intends to effect a non-cash asset impairment in relation to ODNI assets of approximately \$7.9m (excluding tax). The impairment will be included in the half year financial report due out on 15 March 2014.

Exploration - New South Wales Projects

Work on the Brooklyn Iron Project progressing with 1,012m of RC drilling completed in December, results confirm the discovery of a significant body of iron mineralisation.

Brooklyn Iron Project

Eleven (11) holes were drilled; nine (9) holes returned consistently high iron grades. The new drilling has confirmed that the iron mineralisation extends for at least 140m by 100m and is between 88 and 127m deep; the deposit is open to the east and south.

Results include

- 136m @ 61.4% CaFe+Mn from 14m (*BNRC010*)
- 72m @ 62.1% CaFe+Mn from surface (*BNRC018*)
- 70m @ 62.6% CaFe+Mn from 10m (*BNRC017*)

The iron mineralisation is interpreted to be goethite replacement of a limestone possibly representing a previously unrecognised deposit style. The mineralisation is being evaluated to determine if a niche DSO goethite iron plus manganese product can be economically mined and sold.

Brooklyn is 63km by public road (52km of road train route) to the Transcontinental Railway at Condobolin.

Section - 6,384,630mN. BNRC005 reported previously. Note: iron mineralisation is open to the east and depth

*CaFe+Mn is calcined iron+ manganese calculated using the following formula $(Fe\%+Mn\%/(100-LOI\%)) \times 100$

Section – 6,384,580mN.

Note: iron mineralisation is open to the east and at depth

Further details of the results of this drilling program are in the Company's ASX release dated 16 January 2014.

Nyngan

Exalt has decided not to renew the Nyngan Exploration project EL 7667 due to previous exploration results not warranting further work.

Corporate

The following board changes occurred in the quarter

- 11 November 2013 Mr Edward Lee resigned as Non-Executive Director.
- 25 November 2013 Mr Robert Crossman resigned as Non-Executive Director.
- 28 November 2013 Mr Robert Whitton resigned as Non-Executive Chairman
- 28 November 2013 Mr Romy Soekarno was not re-elected as Non-Executive Director
- 28 November 2013 Mr Peter Bennetto was appointed Non-Executive Chairman

Competent Person's Statement

The information in this report that relates to New South Wales Exploration Results is based on information provided by Mr D Ward, Member of Australasian Institute of Mining and Metallurgy and a Consultant to Exalt Resources Limited. Mr Ward has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Ward, consent to the inclusion in the report of the matters based on his information in the form and context in which it appears.
