## QUARTERLY REPORT FOR QUARTER ENDING 31 March 2014

### HIGHLIGHTS

- Focus on Maiden South Limb Pod resource estimation
- Resource estimate QA/QC and audit file preparation continued
- Highly regarded consultants Hellman and Schofield retained to complete final resource estimate expected by mid-May 2014
- Drilling will also test for extensions to South Limb Pod beyond 225m vertical depth and other regional targets once resource estimate completed

---

### MT MULCAHY COPPER PROJECT, Murchison (PUN 100%)

Drilling data from the 2013 drilling program has been included into the project database for use in the maiden resource estimate for the South Limb Pod. Preparation of the QA/QC and audit file has continued. Highly regarded consultants Hellman & Schofield have been retained to complete the final resource estimation and JORC 2012 compliance.

It is expected that a resource estimate for South limb Pod will now be completed by mid-May 2014.

Following completion of the estimate ground and down hole electro-magnetic (EM) surveys will be completed followed by diamond drilling of selected targets.

The EM program will also include down hole EM surveys at the base of the South Limb pod to determine the detailed EM signature of South Limb pod to aid in profiling of ground EM anomalies and to more accurately determine the location of future drill holes to test the down plunge extension of the mineralisation.

The existing VTEM survey also shows that many of the 20 VMS targets identified to date at Mt Mulcahy contain signatures matching those from South Limb Pod (see Figure 3).

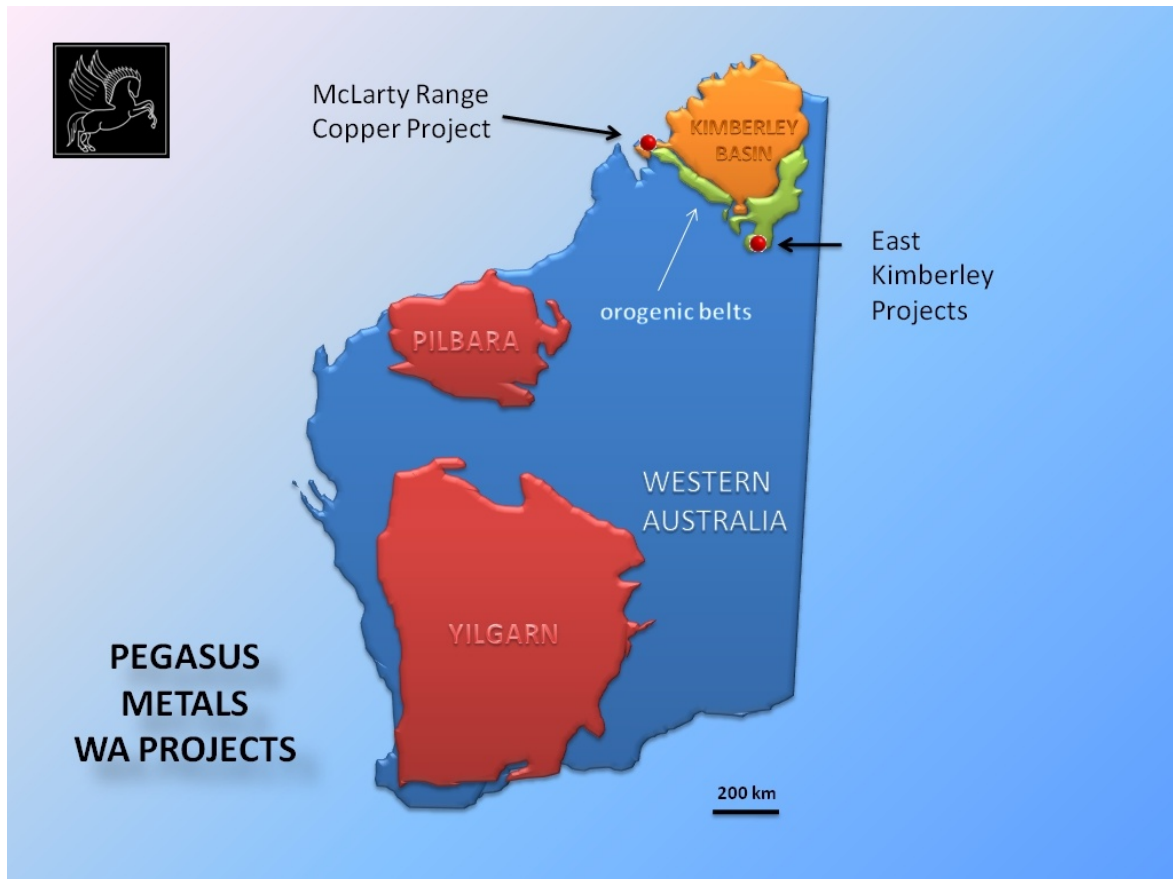

**MCLARTY RANGE COPPER PROJECT, West Kimberley (PUN option to earn 100%)**

Located some 250km northeast of Broome, within the West Kimberley region, the McLarty Range Copper Project covers a portion of the folded Proterozoic-aged Kimberley Basin. Drilling by the Company has confirmed the prospective nature of the copper-bearing, meta-sedimentary horizons which have extensive exposure in the project area. Significant intersections at the Bower Bird Prospect include 7m at 1.02 per cent copper, 10.9m at 0.31 per cent copper, 16m at 0.23 per cent copper and 24m at 0.25 per cent copper. Numerous other targets within the Main Syncline area at the McLarty Range Project area remain untested by drilling.

No field activity this quarter due to the onset of the wet season, activities focused on completion of annual technical reporting.

**NEW OPPORTUNITIES**

Pegasus is in the process of evaluating several copper – gold opportunities.

*The information in this report that relates to Exploration Potential and Results is based on information compiled by Mr Michael Fotios, who is a consultant geologist, director of Pegasus Metals Ltd and a Member of the Australian Institute of Mining and Metallurgy. The information in this report relating to exploration targets should not be misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature since there has been insufficient work completed to define the prospects as anything beyond exploration target. It is uncertain if further exploration will result in the determination of a Mineral Resource. Mr Fotios has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Fotios consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.*

**Notes**

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** - The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
