### **Consolidated Trends – Sales Revenue**

Revenue growth continues to trend positively driven by organic and acquisition growth......

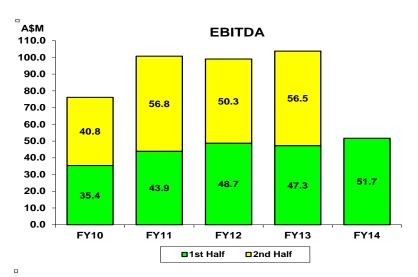

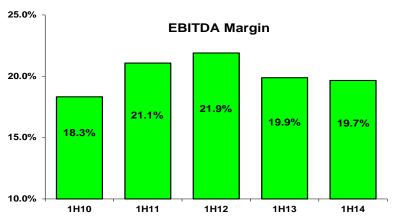

## Consolidated Trends – Underlying EBITDA<sup>1</sup>

Underlying EBITDA has "flatlined" and operating margins have fallen.

Restoring operating leverage through a focus on costs is a key short-term priority

1. Before the impact of significant charges

### **Outlook**

- From a business perspective we will continue to focus on:
  - > Completing the restructure of Compliance and managing the development of the next generation learning platform.
  - Positioning the Property business for manual and electronic conveyancing.
  - Implementing the recommendations flowing from the Information Technology review.
  - Rolling out the new support platforms.
  - Efficiency and productivity gains to improve margin and leverage at both an internal and customer level across the business.
- Each of the initiatives above will continue to require both capital investment and operational support during the second-half.
- The company has grown the cost base and invested heavily in capital projects over recent years; in part to address operational issues and globalise the business (Compliance Services); in part to accommodate major new business wins (Property Services) and in part to improve IT infrastructure generally across all of the company's operations (predominantly Assurance Services and Corporate).

### Outlook

- As the company begins to move on from this phase of its development there will be increased focus on efficiency and productivity gains to improve margins and the operating leverage across the business
- In February we reiterated full-year guidance as follows:
  - Revenue growth of 8-10% in FY14.
  - Lower growth in EBITDA for the reasons stated above.
  - > An NPAT result broadly in line with that achieved in FY13 (before the FY13 impairment charge).
- We are analysing opportunities to accelerate efficiency and productivity gains during the second-half.
- These initiatives will always be premised upon returning the business to profitable growth and improved operating margins as soon as practicable.
