About Nufarm

Nufarm is a global crop protection and seed technologies company that helps farmers and businesses meet the global challenges of food, feed, fibre and sustainable fuel production. Nufarm brings its proven agility, innovation capabilities and partnerships to help its customers in a rapidly changing world. Established over 100 years ago, it is listed on the Australian Securities Exchange (ASX:NUF) with its head office in Melbourne, Australia. Nufarm is the first company to develop and commercialise plant based omega-3 and has developed and commercialised advanced bioenergy feedstock technology.

7. Commentary

Additional Appendix 4D disclosure requirements and further information including commentary on significant features of the operating performance, results of segments, trends in performance and other factors affecting the results for the current period are contained in the interim financial report for the 6 months ended 31 March 2025. The condensed consolidated financial statements contained within the interim financial report for the 6 months ended 31 March 2025, on which this report is based, have been reviewed by KPMG.

Directors' Report

In accordance with a resolution of the board of directors (the board), the directors present their report on the consolidated entity (Nufarm Limited) consisting of Nufarm Limited and the entities it controlled at the end of or during the 6 months ended 31 March 2025.

Directors

The directors of the company at any time during the 6 months ended 31 March 2025 and until the date of this report are:

Name	Tenure
John Gillam BCom, MAICD, FAIM Independent non-executive chair	Director since 31 July 2020 and chair since 24 September 2020
Greg Hunt Harvard AMP, GradDip. Mgmt, AGSM, AICD Managing director and CEO	Managing Director since 5 May 2015 and CEO since February 2015
Alexandra Gartmann BSc(REM)(Hons), MAICD Independent non-executive director	Director since 23 September 2022
Dr David Jones BA (Hons) Science, PhD Independent non-executive director	Director since 23 June 2021
Marie McDonald LLB(Hons), BSc(Hons) Independent non-executive director	Director since 22 March 2017
Prof. Adrian Percy BSc, MSc, PhD Independent non-executive director	Director since 1 July 2023
Lynne Saint BCom, GradDip Ed Studies, FCPA, FAICD Independent non-executive director	Director since 18 December 2020
Federico Tripodi BAgronomic Engineering, MBA Independent non-executive director	Director since 19 June 2023

Results and review of operations

Information on the operations and the results of those operations for Nufarm Limited during the 6 months ended 31 March 2025 is set out on pages 7-13 as the Operating and Financial Review, accompanying this Directors' Report.

Events subsequent to reporting date

On 15 April 2025, a distribution was paid by Nufarm Finance (NZ) on the Nufarm step-up securities. The distribution rate (annualised) was 8.51% resulting in a gross distribution of \$10.648 million.

Lead auditor's independence declaration

Operating and Financial Review

Group results

This Operating and Financial Review includes financial information based on financial statements which have been prepared in accordance with AASB 134 and reviewed by KPMG. Information is presented on a continuing operations basis unless otherwise specified. Non-IFRS measures including underlying EBIT and underlying EBITDA are used internally by management to assess the performance of our business, make decisions on the allocation of our resources and assess operational management. Non-IFRS measures have not been subject to audit or review. All amounts are in Australian dollars unless otherwise specified.

Operating and
Financial Review

Financial Statements

Operating and Financial Review continued

Earnings

Statutory net profit after tax was \$29.8 million which was 39% below the prior corresponding period (pcp). Underlying Net Profit After Tax was \$38.5m, down 24% on the pcp. The year on year fall in profitability was largely due to net realisable value adjustments taken against omega-3 inventories due to fish oil pricing pressures and higher sales, marketing and distribution, general and administrative and research and development expenses. We reported basic earnings per share of 4.9 cents compared with 10.3 cents in the pcp.

Excluding the impact of material items, underlying EBITDA was \$205.9 million, a 6% decrease on the pcp and underlying EBIT was \$102.7 million, a 15% decline on the pcp.

Revenue increased 3% on the pcp due to growth in Crop Protection volume. Crop Protection average selling prices had a negative impact on revenue. Revenue from services, licenses and royalties was below the pcp, reflecting lower license revenues in our Seed Technologies segment.

Gross profit increased 9% on the pcp. The improvement resulted from growth in revenue and gross profit margins in

Crop Protection. Underlying gross profit increased by 5% on the pcp and underlying gross profit margin expanded by 50bps on the pcp. The expansion in gross profit margin was due to an improving market environment for crop protection. This improvement was offset by a decrease in profit margin in Seed Technologies due to net realisable value adjustments taken against omega-3 inventories.

Underlying SG&A and research and development expenditure increased on the pcp. Net financing costs were 9% below the pcp, reflecting mainly a reduction in foreign exchange losses.

We reported a net loss from material items of \$8.7 million after tax. As disclosed within the 2024 financial statements and announced in November 2024, the group is undertaking a performance improvement program. During the half year ended 31 March 2025, the group has incurred stock write-downs and exit costs with respect to its Seed Technologies carinata and canola programs in North America. In addition, staff redundancy costs have been incurred across the wider group.

Cash flow

	6 months ended 31 March 2025	6 months ended 31 March 2024	Change
Cash flow results	\$000	\$000	%
Underlying net operating cash flow	(456,695)	(180,470)	(153)%
Net operating cash flow - material items	(2,340)	(26,698)	91%
Total net operating cash flow	(459,035)	(207,168)	(122)%
Underlying net investing cash flow	(148,073)	(109,518)	(35)%
Net investing cash flow - material items	-	-	-
Total net investing cash flow	(148,073)	(109,518)	(35)%
Total underlying net operating and investing cash flow	(604,768)	(289,988)	(109)%
Total net operating and investing cash flow	(607,108)	(316,686)	(92)%

The group's total net operating and investing cash flow for the half was a cash outflow of \$607.1 million. Total net operating cash flow for the half was a \$459.0 million outflow. The outflow was due to a seasonal build in working capital during the period and expansion in working capital due to the expansion of Seed Technologies.

Net cash outflow from investing activities was \$148.1 million. Investing cash flow included expenditure on property, plant and equipment, expenditure on intangibles mainly associated with research and development, as well as expenditure associated with the acquisition of intellectual property and other assets from Yield10 Biosciences.

Balance Sheet Management

	As at 31 March 2025 \$000	As at 31 March 2024 \$000	As at 30 September 2024 \$000	Change (Mar 25 v Mar 24)
Financial position				
Net debt	1,362,387	1,213,577	634,759	12%
Net working capital	1,560,239	1,662,142	952,104	(6)%
ANWC/sales (%)	39.2%	47.1%	42.6%	(7.9)ppts
Leverage	4.5	3.6	2.0	0.9
Gearing %	37.1%	34.3%	22.3%	2.8ppts

Net Debt

We finished the period with net debt of \$1.4 billion. The increase in net debt compared with 30 September is mainly due to the movement in net working capital. Net debt was higher than the pcg partly due to investing cash flows over the prior 12 months.

Net working capital was 6% below the pcg, reflecting progress in improving working capital efficiency. The average net working capital to sales ratio, measured on a rolling twelve month basis, was 39.2% which was a 7.9 ppts reduction on the pcg. Continued progress in reducing inventory as well as effective management of receivables and payables have brought ANWC % sales to within the target range of between 35% and 40%.

We continued to make progress in improving inventory efficiency with inventories reducing \$79.0m from the pcg. However, some of the inventory unwind has been offset by higher inventories in Seed Technologies to support the growth of that business. Trade and other receivables were \$4.9 million above pcg. Trade and other payables were \$27.9 million above pcg reflecting normalisation of re-ordering patterns.

Leverage was 4.5 times, mainly reflecting lower earnings, which is measured on a twelve-month rolling basis. We finished the period with net debt of \$1.4 billion. Net debt was higher than the pcg partly due to the movement in working capital and investing cash flows over the prior 12 months as we undertook significant investments in plant, equipment and portfolio. Gearing increased by 2.8ppts to 37.1%.

Capital Management

Nufarm's capital management principles aim to maintain a robust and durable capital structure with clear guidelines for the application of free cashflow generated from business operations.

Our financing arrangements aim to ensure we have the required financial resilience to withstand adverse trading cycles without experiencing undue balance sheet stress. Currently we have significant tenor and flexibility in our facilities.

Our \$800 million revolving asset based lending credit facility (ABL) matures in November 2027 and is secured against trade receivables and inventory located in Australia, the United States and Canada. We also maintain a smaller \$210 million standby liquidity facility (SLF) which matures in November 2026 and a US\$90m unsecured short-term trade loan facility dedicated to support our Omega 3 business activities; these sit alongside the ABL to assist in funding Nufarm's working capital requirements. The ABL, SLF and short-term trade loan facility complement the US\$350 million senior unsecured notes which were issued in January 2022 and due in January 2030.

Dividend

The board has adopted a dividend policy to align dividend payments to free cash flow generation, subject to the balance sheet meeting our target leverage range of 1.5x – 2.0x and there being insufficient growth opportunities. Nufarm's dividend policy ensures an appropriate focus on cash generation, especially net working capital management, as well as maintaining an appropriate capital structure for the group.

In considering the application of this policy any reference to free cash flow should be assessed through an appropriate historical and forecast cycle, to take into consideration fluctuations in net working capital and planned investment. Similarly, target leverage is considered on an annualised basis at 30 September.

Considering these capital management principles, the board has determined not to pay an interim dividend.

Operating and Financial Review continued

Review of operations

The group operates predominantly along two business lines, being Crop Protection and Seed Technologies.

Crop Protection deals in the manufacture and sale of crop protection products used by farmers to protect crops from damage caused by weeds, pests and disease. It is managed by major geographic segments, being APAC (including Australia, New Zealand and certain parts of Asia), Europe (including the United Kingdom, the European Union, and certain other countries in Europe, the Middle East and Africa), and North America (including United States of America, Canada and Mexico).

Seed Technologies comprises the hybrid seeds, bioenergy, omega-3 and seed treatment platforms. These platforms generate revenues through the sale of seed or oil based products, and licensing of intellectual property. The Seed Technologies business is managed on a worldwide basis.

Nufarm Group	102,736	120,610	(17,874)	(15%)

Crop Protection

We reported strong growth in underlying EBITDA and underlying EBIT compared with the pcip. Following a challenging period, the industry moved to more normal levels of competition. All regions grew volumes and benefited from greater stability in active ingredient pricing which improved margins. Our Crop Protection segment reported a 34% increase in EBIT compared with the pcip.

In APAC we reported revenue of \$462 million, which was growth of 1% on the pcip. Underlying EBIT increased 34% to \$56.2 million. In Australia, dry conditions negatively impacted sales. We recorded strong revenue and earnings growth in Indonesia, with favourable seasonal conditions.

In North America revenue was 2% below the pcip at \$624 million. Underlying EBIT of \$27.3 million was 10% below the pcip. While our business in North America has taken longer to normalise than other regions, we achieved volume growth and improved cash flow, as we finished the period with lower inventory and a lower net working capital position than the pcip.

In Europe, we reported revenue of \$475 million, which was 17% above the pcip. Underlying EBIT increased 96% on the pcip to \$43.0 million. Europe's result displays a strong recovery on the prior year with volumes reflecting more normal trading conditions and the impact of industry-wide destocking having largely worked through.

We achieved several important milestones in our pipeline of new products. We announced an agreement with KingAgroot for the development of a new, proprietary, non-selective herbicide for the Australian market. The active ingredient has shown promising results as a broad-spectrum herbicide and has the potential to be an important tool for Australian farmers as it controls several key hard-to-kill weeds. We have registered Joust (Prothioconazole) in all EU countries and have also seen additional registrations of Simpell (Spinosad) in Europe. In North America we have received registrations of Droptec – our proprietary dual salt 2,4-D product as well as several other key herbicides. In Australia we entered a collaboration with Hort Innovation on the development and launch of a precision application robotic sprayer manufactured by Kilter.

Seed Technologies

Seed Technologies reported revenue of \$249 million and underlying EBIT of \$15.9 million, a 71% decline on the pcip. The decline in underlying EBIT on the prior year was due to lower licensing revenues, lower margins in omega-3 and lower canola revenues in Australia.

We had solid performances from canola, sorghum and sunflower seeds. Drier conditions in Australia negatively impacted sales of canola. Sorghum and sunflower were broadly in line with the prior year.

A significant fall in fish oil prices negatively impacted margins for omega-3. Following the approval of Aquaterra® products for use in Norway we continued to move forward with broad industry support and commercial negotiations for entry into that market. We also continued to progress discussions with potential partners for distribution and marketing within certain nutritional segments in the USA for expansion of our Nutriterra® products.

We continued to advance on multiple fronts in bioenergy. In carinata we concluded a successful crop year in South America, with expanded production across Argentina, Uruguay and Brazil. The 2024 South American crop harvest is in the process of being shipped to Europe for crush and sales with our partners. We achieved additional carinata certifications and renewals which build the greenhouse gas (GHG) value of our carinata. We announced research and development agreements with bp and Unilever for the development of Biomass Oil for use in bioenergy and FMCG. Biomass Oil is an exciting new technology developed by Australia's CSIRO which aims to increase the oil content of plants. Our initial R&D focus is on the use of that technology in sorghum and sugar cane.

Operating and Financial Review continued

Outlook

We believe that we are well positioned, however, remain conscious that market, trade policy and weather conditions could impact the second half.

If the current weakness in fish oil pricing continues to hold, we expect underlying EBITDA from Seed Technologies for the second half to be circa \$20m below the prior year. Due to lower than anticipated fish oil prices, we no longer expect to achieve \$100m of omega-3 revenue in FY25. We are currently assessing options for managing omega-3 inventory.

We saw a good improvement in Crop Protection in the first half. However, several uncertainties make it difficult to project the second half. The US tariff situation creates uncertainty with respect to supply, demand and pricing outcomes. We benefited from favourable seasonal conditions in the first half in Europe and continuation of current dry conditions in Australia would negatively impact second half.

Management remains focused on reducing costs and improving return on funds employed. We are on track to deliver a 25-day year on year reduction in inventory, excluding the impact of omega-3. We are on track to deliver \$50m in run rate annualised cost savings by end FY25.

Forward looking statements reflect Nufarm's expectations at the date of this review and are based on information and assumptions known to date. They are subject to risks and uncertainties outlined in more detail in the Nufarm 2024 Annual Report. Actual results may be significantly different to those expressed.

Material items

Individually material items are those items where their nature, including the expected frequency of the events giving rise to them, and/or amount is considered material to the consolidated financial report. Such items included within the group's profit for the period are detailed below.

Asset Rationalisation and Restructuring

As disclosed within the 2024 financial statements, the group is undertaking a performance improvement program. During the half year ended 31 March 2025, the group has incurred stock write-down and exit costs with respect to its Seed Technologies carinata and canola programs in North America. In addition, staff redundancy costs have been incurred across the wider group.

IFRS and Non-IFRS financial information

Nufarm results are reported under International Financial Reporting Standards (IFRS) including underlying EBIT and underlying EBITDA which are used to measure segment performance. This release also includes certain non-IFRS measures including underlying net profit after tax and underlying gross profit margin. These measures are used internally by management to assess the performance of our business, make decisions on the allocation of our resources and assess operational management. Non-IFRS measures have not been subject to audit or review.

The following notes explain the terms used throughout the operating and financial review:

- 1 Underlying EBIT is earnings before net finance costs, taxation, share of net profits/(losses) of equity accounted investees and material items. Underlying EBITDA is underlying EBIT before depreciation, amortisation and material items. We believe that underlying EBIT and underlying EBITDA provide useful information, but should not be considered as an indication of, or an alternative to, profit / (loss) for the period as an indicator of operating performance or as an alternative to cash flow as a measure of liquidity.
- 2 Underlying EBITDA is used to reflect the underlying performance of Nufarm's operations. Underlying EBITDA is reconciled to operating profit below on a continuing basis.

	6 months ended 31 March 2025	6 months ended 31 March 2024	Change
	\$000	\$000	%
Operating profit reconciliation			
Underlying EBITDA	205,896	218,619	(6)%
add Depreciation and amortisation excluding material items	(103,160)	(98,009)	5%
Underlying EBIT	102,736	120,610	(15)%
Material items impacting operating profit	(10,764)	(26,680)	60%
Operating profit	91,972	93,930	(2)%

3 Non-IFRS measures are defined as follows:

Term	Definition
Gross profit margin	Gross profit as a percentage of revenue
Underlying gross profit	Gross profit excluding the impact of material items
Underlying gross profit margin	Underlying gross profit as a percentage of revenue
Underlying SG&A	Sales, marketing and distribution expenses plus general and administrative expenses excluding the impact of material items
Underlying EBIT	Earnings before net financing costs, taxation, share of net profits/(losses) of equity accounted investees and excluding the impact of material items
Underlying EBITDA	Underlying EBIT before depreciation, amortisation and excluding the impact of material items
Net external interest	Financial income, plus interest expense – external, plus interest expense - amortisation of debt establishment transaction costs, plus lease liability – interest expense, plus fair value adjustment on financial instruments.
Underlying net profit after tax	Profit/(loss) for the period attributable to the equity holders of Nufarm Limited excluding the impact of material items
Underlying income tax benefit/(expense)	Income tax benefit/(expense) excluding the impact of material items
Underlying effective tax rate	Underlying income tax benefit/(expense) divided by underlying net profit after tax
Net debt	Current loans and borrowings, plus non-current loans and borrowings, less cash and cash equivalents
Net working capital	Current trade and other receivables, plus inventories less current trade and other payables
Average net working capital	Net working capital measured at each month end as an average of the last 12 months
ANWC/sales (%)	Average net working capital as a percentage of rolling 12 months revenue
Leverage	Net debt / rolling 12 months underlying EBITDA
Gearing %	Net debt / (net debt plus equity)
Return on funds employed (ROFE)	12 months rolling underlying EBIT divided by the average of opening and closing funds employed (total equity plus net debt)
Underlying net operating cash flow	Net cash from operating activities excluding the impact of material items cash flows
Underlying net investing cash flow	Net cash from investing activities excluding the impact of material items cash flows

Condensed notes to the consolidated interim financial statements

Corporate information

Nufarm Limited (the 'company') is a company limited by shares and domiciled in Australia that is listed on the Australian Securities Exchange. The address of the company's registered office is 103-105 Pipe Road, Laverton North, Victoria, 3026. The condensed consolidated interim financial statements of the company as at and for the 6 months ended 31 March 2025 comprise the company and its subsidiaries (together referred to as the 'group' and individually as 'group entities') and the group's interest in associates and jointly controlled entities.

The group is a for-profit entity and is primarily involved in the manufacture and sale of crop protection products and proprietary seed technologies used by farmers to both grow and protect crops from damage caused by weeds, pests and disease. Operating profits/ (losses) may fluctuate throughout the year due to seasonality inherent within the crop protection and seed technology markets, and the geography of operations. The annual consolidated financial statements of the group as at and for the period ended 30 September 2024 are available from the company's registered office at 103-105 Pipe Road, Laverton North, Australia or at <http://www.nufarm.com/investor-centre/>.

1 Basis of preparation

(a) Statement of compliance

These condensed consolidated interim financial statements for the half year ended 31 March 2025 are general purpose financial statements and have been prepared in accordance with the Corporations Act 2001 and AASB 134 *Interim Financial Reporting* as issued by the Australian Accounting Standards Board (AASB). The condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and should be read in conjunction with the consolidated financial statements of the group as at and for the year ended 30 September 2024 and any public announcements made in the period by the group in accordance with the continuous disclosure requirements of the Corporations Act 2001 and the ASX Listing Rules.

Changes to material accounting policies are described in note 2.

The consolidated interim condensed financial statements were authorised for issue by the board on 21 May 2025.

(b) Rounding of amounts

Amounts in these financial statements have, unless otherwise indicated, been rounded to the nearest thousand dollars.

(c) Reclassification

Where applicable comparatives are adjusted to present them on the same basis as current period figures.

2 Material accounting policies and estimates

The group's accounting policies and methods of computation have been applied consistently to all periods presented in these condensed interim consolidated financial statements and are the same as those applied in the group's consolidated financial statements as at and for the year ended 30 September 2024, with the exception of new accounting standards that became effective for the group from 1 October 2024. The adoption of these new accounting standards has not had a material impact on the disclosures or amounts reported in these condensed consolidated interim financial statements.

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning on or after 1 October 2025 and have not been applied in the preparation of these condensed consolidated interim financial statements.

Condensed notes to the consolidated interim financial statements continued

3 Operating segments

Segment information is presented in respect of the group's key operating segments. The operating segments are based on the group's management and internal reporting structure which operates predominantly along two business lines, being Crop Protection and Seed Technologies.

The Crop Protection business deals in the manufacture and sale of crop protection products used by farmers to protect crops from damage caused by weeds, pests and disease. It is managed by major geographic segments, being APAC (including Australia, New Zealand and certain parts of Asia); Europe (including the United Kingdom, the European Union, and certain other countries in Europe, the Middle East and Africa) and North America (including United States of America, Canada and Mexico).

The Seed Technologies business comprises the hybrid seeds, bioenergy and nutritionals and seed treatment platforms. These platforms generate revenues through the sale of seed or oil based products, and licensing of intellectual property. The Seed Technologies business is managed on a worldwide basis.

Information regarding the results of each operating segment is included below. Performance is measured based on underlying EBITDA and underlying EBIT, as defined below, as included in the internal management reports that are reviewed by the group's CEO. These metrics are used to measure performance as management believes that such information is the most relevant in evaluating the results of each segment. Segment revenue is based on the geographic location of customers.

	Crop Protection				Seed Technologies Global ¹	Non Operating Corporate	Group Total
	APAC	Europe	North America	Total			
6 months ended 31 March 2025	\$000	\$000	\$000	\$000	\$000	\$000	\$000
Revenue							
Total segment revenue	462,059	475,443	624,156	1,561,658	249,223	-	1,810,881
Results							
Underlying EBITDA ²	65,131	90,245	47,482	202,858	40,747	(37,709)	205,896
Depreciation & amortisation excluding material items	(8,905)	(47,259)	(20,148)	(76,312)	(24,826)	(2,022)	(103,160)
Underlying EBIT²	56,226	42,986	27,334	126,546	15,921	(39,731)	102,736
Material items included in operating profit (refer note 4)							(10,764)
Net financing costs							(48,083)
Share of net profits/(losses) of equity accounted investees							(429)
Profit/(loss) before tax							43,460

1 Included within Underlying EBITDA for the half year ended 31 March 2025 is the write-down of omega 3 inventories to net realisable value of \$28.254m (2024: \$0.726m)

2 Underlying EBIT is earnings before net finance costs, taxation, share of net profits/(losses) of equity accounted investees and material items. Underlying EBITDA is Underlying EBIT before depreciation, amortisation and material items.

	Crop Protection				Seed Technologies Global	Non Operating Corporate	Group Total

¹ Other than Australia and the United States of America sales to other countries are individually less than 10% of the group's total revenues.

Condensed notes to the consolidated interim financial statements continued

4 Individually material income and expense items

Individually material items are those items where their nature, including the expected frequency of the events giving rise to them, and/or amount is considered material to the condensed consolidated interim financial statements. Such items included within the group's profit for the period are detailed below.

	6 months ended 31 March 2025	6 months ended 31 March 2025	6 months ended 31 March 2024	6 months ended 31 March 2024
	\$000	\$000	\$000	\$000
	pre-tax	after-tax	pre-tax	after-tax
<i>Material items by category:</i>				
Asset rationalisation and restructuring	(10,764)	(8,714)	-	-
Idle plant capacity	-	-	(26,680)	(19,417)
Deferred tax asset recognition	-	-	-	17,724
Total profit/(loss)	(10,764)	(8,714)	(26,680)	(1,693)

31 March 2025 Material items

Asset rationalisation and restructuring

As disclosed within the 2024 financial statements, the group is undertaking a performance improvement program. During the half year ended 31 March 2025, the group has incurred stock write-down and exit costs with respect to its Seed Technologies carinata and canola programs in North America. In addition, staff redundancy costs have been incurred across the wider group.

31 March 2024 Material items

Idle plant capacity

During the half year ended 31 March 2024, the group had undertaken capital works programs which had disrupted normal operating capacity at both its Laverton (APAC) and Wyke (Europe) manufacturing sites, and had given rise to idle capacity charges.

In Laverton, the group had invested in its 2,4-D production capability whilst sustainably reducing the cost of production. The 2,4-D synthesis production is typically operated on a 24-hour basis. The disruption had resulted in an extended closure of 2,4-D synthesis production throughout the period.

In Wyke, the group had started preliminary works in respect of the multi-year capital investment plan to address manufacturing reliability, further improve HSE performance and increase production capacity. These preliminary works had resulted in extended shutdowns and lower production capacity than is typically achievable at the Wyke manufacturing site.

Deferred tax asset recognition

Australian Accounting Standards require that the group recognises a deferred tax asset arising from unutilised tax losses and tax credits, to the extent that it is probable that future taxable profit will be available, against which the tax losses and tax credits can be utilised. The net recognition of the deferred tax assets of \$17.724 million in respect of the tax losses, during the half year ended 31 March 2024, reflected improved financial performance and outlook for the Australian tax group, and expected capital gains recognised upon the settlement of assets held for sale later in the 2024 financial year.

Material items are classified by function as follows:

	Cost of sales	Selling, marketing and distribution expense	General & administrative expense	Research and development costs	Total Pre-tax
6 months ended 31 March 2025	\$000	\$000	\$000	\$000	\$000

Condensed notes to the consolidated interim financial statements continued

5 Assets held for sale

The former Raymond Road manufacturing site in Laverton Australia was approved for sale during the year ended 30 September 2022, upon which the group entered into an asset sale agreement. Since this period until September 2024, the site had been subject to agreed remediation activities to prepare the site for final sale.

The group classified further land adjoining the Laverton manufacturing site as held for sale during the half year ended 31 March 2024. The land had been deemed excess to requirements and the group had proceeded to engage in a sale and due diligence process with a suitable buyer.

Sales of both of these sites were finalised in September 2024. The net gain on the disposal of the assets held for sale was recognised as a material item for the year ended 30 September 2024.

	As at 31 March 2025	As at 30 September 2024	As at 31 March 2024

Net financing costs	(48,083)	(53,044)

8 Intangible assets

Cash-generating units containing goodwill

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the 'cash-generating unit' / 'CGU').

The group has determined that operating unit by country or region (i.e. Europe) is the appropriate method for determining the cash-generating units (CGU) of the business. This level of CGU aligns with the cash inflows of the business and the management structure of the group. The goodwill and intellectual property are CGU specific, as the acquisitions generating goodwill and the product registrations that are the major intangibles are country or region specific in nature. The exception to this is Seed Technologies which is managed on a worldwide basis. There is no allocation of goodwill between CGUs.

Valuation method – Fair value less cost of disposal

Fair value less cost of disposal (FVLCD) is an estimate of the price that a market participant would pay for the asset or CGU, less the costs of disposal. The fair value is determined using discounted cash flows and is benchmarked using relevant methodologies including the sum of the parts method, comparable market transactions, and company trading multiples. The cash flows are derived from Board approved management expectations of future outcomes, taking into account past experience, and adjusted for anticipated revenue growth. Cash flows are discounted using an appropriate post-tax market discount rate to arrive at a net present value of the asset which is compared against the asset's carrying value. The fair value measurement was categorised as a Level 3 fair value based on inputs in the valuation technique used (see note 12).

Valuation method – Value in use

Value in use (VIU) is an estimate of the recoverable amount based on the present value of the future cash flows expected to be derived from a CGU. In assessing VIU, the estimated future cash flows are derived from the three year plan for each cash-generating unit with a growth factor applied to extrapolate a cash flow beyond year three. A perpetuity factor is then applied to the normalised cash flow beyond year five in order to include a terminal value in the VIU calculation. The terminal growth rate assumed for each CGU is generally a long term inflation estimate. The cash flow is then discounted to a present value using a discount rate which is the company's weighted average cost of capital, adjusted for country risk and asset-specific risk associated with each CGU.

Valuation assumptions

Management develops a three-year bottom up budget and plan for each of the CGUs, with a further two years added based upon industry market growth to develop a five year cashflow impairment testing model.

The pricing, margin and volume assumptions underpinning the cashflow projections generally reflect past experience for existing and enhanced portfolio products, while new products utilise external sources of information reflecting current market pricing in expected end use markets. Budgets include reference to geographical and market-specific economic drivers which influence the business such as inflation, currency, interest rates and manufacturing capacity. The valuation modelling is most sensitive to terminal growth and discount rates.

Europe cash generating unit

At 30 September 2024, the group utilised a FVLCD methodology which was prepared by an external advisor to estimate the recoverable amount of the Europe CGU. The group concluded that the fair value less costs to sell of the European CGU was higher than its carrying amount and was therefore recoverable for the year ended 30 September 2024. The key judgements, estimates and sensitivities underlying the FVLCD calculations are detailed within the financial statements for the year ended 30 September 2024.

While management has determined that no indicators of impairment exist at 31 March 2025, any future adverse movement in a key assumption including projected European CGU cash flows, terminal growth rates, and discount rates, in the absence of other factors, may lead to impairment.

Seed Technologies cash generating unit

During the half year ended 31 March 2025, management has reassessed the recoverable amount of the Seed Technologies CGU given performance of the business and current market dynamics and concluded the recoverable amount continues to exceed its carrying amount.

Changes in financing facilities

On 20 November 2024, Nufarm entered into a US\$40 million short-term trade loan facility dedicated to support our omega 3 business activities. The facility was subsequently increased to US\$90 million in March 2025. The facility is a committed facility, on an unsecured basis, and supported by a parent guarantee from Nufarm Limited. The short-term trade loan facility is subject to renewal annually on the 31st of October.

10 Capital and reserves

Share capital	Number of ordinary shares		
	As at 31 March 2025	As at 30 September 2024	As at 31 March 2024
Opening balance for period	382,307,128	380,764,253	380,764,253
Issue of shares	675,960	1,542,875	1,405,028
Closing balance for period	382,983,088	382,307,128	382,169,281

The group does not have authorised capital or par value in respect of its issued shares. The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the company.

During the period the following shares were issued:

- On 1 October 2024, 582,388 shares at \$3.91 were issued under the Key Leadership Incentive and Executive Incentive Plans
- On 13 January 2025, 93,572 shares at \$3.57 were issued under the Global Employee Share Plan and Nushare Share Plan

Other securities

Nufarm step-up securities

On 24 November 2006, Nufarm Finance (NZ) Limited, a wholly owned subsidiary of Nufarm Limited, issued 2,510,000 hybrid securities at \$100 each called Nufarm step-up securities (NSS), which are perpetual step-up securities. The NSS are listed on the ASX under the code 'NFNG' and on the NZDX under the code 'NFFHA'.

Distributions on the NSS are at the discretion of the directors and are floating rate, unfranked, non-cumulative and subordinated. However, distributions of profits and capital by Nufarm Limited are curtailed if distributions to NSS holders are not made, until such time that Nufarm Finance (NZ) Limited makes up the arrears. The distribution rate is the average mid-

rate for bank bills with a term of six months plus a margin of 3.9% (31 March 2024: 3.9%).

Nufarm retains the right to redeem or exchange the NSS on future distribution dates.

Translation reserve

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations where their functional currency is different from the presentation currency of the reporting entity.

Capital profit reserve

This reserve is used to accumulate realised capital profits.

Other reserves

This reserve includes the following:

- accrued employee entitlements to share awards that have been charged to the income statement and have not yet been exercised
- accumulative effective portion of changes in the fair value of financial instruments that have been designated as either cash flow hedges or net investment hedges
- changes in the fair value of other investments that have been designated at FVOCI.

Dividends

Proposed and unrecognised at reporting date	Cents per share	Total amount \$000	Payment date
Interim dividend (unfranked)	nil	nil	nil
6 months ended 31 March 2025			
Paid final dividend (unfranked)	nil	nil	nil
12 months ended 30 September 2024			
Paid interim dividend (unfranked)	4.0	15,251	14 Jun 2024
Paid final dividend (unfranked)	5.0	19,038	15 Dec 2023

The company operates a Dividend Reinvestment Plan (DRP) under which eligible holders of ordinary shares are able to reinvest all or part of their dividend payments into additional fully paid Nufarm Limited shares.

Diluted earnings per share – excluding material items	7.1	10.7

12 Financial risk management and financial instruments

Financial risk management

The group's financial risk management objectives and policies are consistent with those disclosed in the 30 September 2024 consolidated financial statements as at, and for, the 6 months ended 31 March 2025.

Fair values

All financial assets and financial liabilities, other than derivatives, are initially recognised at the fair value of consideration paid or received, net of transaction costs as appropriate, and subsequently carried at fair value or amortised cost, as indicated in the tables below. Derivatives are initially recognised at fair value on the date the contract is entered into and are subsequently remeasured at their fair value.

The financial assets and liabilities are presented by class in the tables below at their carrying values, which generally approximate to the fair values. In the case of the centrally managed fixed rate debt not swapped to floating rate totalling \$559.374 million (31 March 2024: \$537.387 million, 30 September 2024: \$505.415 million), the fair value at 31 March 2025 is \$521.890 million (31 March 2024: \$493.380 million, 30 September 2024: \$468.141 million).

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: Based on quoted prices (unadjusted) in active markets for identical financial assets and liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: Based on inputs not observable in the market using appropriate valuation models, including discounted cashflow modelling and comparable company transactions.

	Level 1 \$000	Level 2 \$000	Level 3 \$000	Total \$000
As at 31 March 2025

Valuation techniques used to derive fair values

The group has used the following valuation techniques and assumptions in the determination of the fair values noted above.

- Derivative financial assets and liabilities include forward exchange contracts which are valued using market data, including spot foreign exchange rates and forward rates at balance sheet date to determine fair value
- Other investments include the group's strategic investments which primarily consist of unlisted private investments. The fair value of these investments are determined using comparable company analysis and recent capital seeding rounds
- Contingent consideration is payable with respect to the group's acquisition of the energy cane business from GranBio Investimentos SA in the year ended 30 September 2022. The fair value of the contingent consideration payable is determined using valuation techniques such as discounted cashflow models. Assumptions are based upon agreed royalty rates payable on forecasted revenues to be earned by the group until 30 June 2034, together with estimated discount rate and growth rate assumptions.

13 Capital commitments

The group had contractual obligations to purchase intangible assets and plant and equipment for \$36.599 million at 31 March 2025 (31 March 2024: \$7.827 million).

The group has agreed to make capital contributions in proportion to its interest in the Leshan Nong Fu Trading Co., Ltd joint venture to make up any losses if required, up to a maximum of RMB 35 million. The outstanding commitment is RMB 28 million (\$6.167 million).

14 Contingencies

In the ordinary course of business, obligations may arise in the future due to lawsuits and claims including those pertaining to product liability, licensing arrangements, safety and health, environmental and tax matters which may be instituted or asserted against the group. While the amounts claimed may be substantial, a future liability cannot be determined due to significant uncertainties that existed at balance date.

Nonetheless, it is possible that results of the group's operations or liquidity in a particular period could be materially affected by such claims in the future.

15 Related parties

Related party transactions

During half year ended 31 March 2025, Medisup Securities Limited (a wholly owned subsidiary of the group) acquired shares in Enko Chem from Dr David Jones, a non-executive director of the group. The group obtained an independent external valuation to ascertain an arms-length value for transacting the shares. The acquisition value of the shares was approximately \$5.264m (US\$3.274 million), and all terms and conditions of the transaction were considered to be no more favourable than those available, or which might reasonably be expected to be available, on similar transactions to non-director related entities on an arms-length basis. The share transfer and subsequent payment was made on the 15th of January 2025, with no balances owing as of 31 March 2025.

Changes to key management personnel

As announced on 3 December 2024, Paul Townsend stepped down from his executive role of Chief Financial Officer (CFO) effective 13 January 2025 and has been succeeded by Brendan Ryan.

Condensed notes to the consolidated interim financial statements continued

16 Subsequent events

On 15 April 2025, a distribution was paid by Nufarm Finance (NZ) on the Nufarm step-up securities. The distribution rate (annualised) was 8.51% resulting in a gross distribution of \$10.648 million.

Other than noted above, no matters or circumstances have arisen in the interval between 31 March 2025 and the date of this report that, in the opinion of the directors, have or may significantly affect the operations, results or state of affairs of the group in subsequent accounting periods.

Directors' declaration

- 1 In the opinion of the directors of Nufarm Limited (the company):
- (a) the financial statements and notes set out in this report are in accordance with the *Corporations Act 2001* including:
 - (i) giving a true and fair view of the group's financial position as at 31 March 2025 and of its performance for the six months ended on that date; and
 - (ii) complying with Australian Accounting Standards including AASB 134: Interim Financial Reporting and the *Corporations Regulations 2001*.
 - (b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the directors:

John Gillam
Director

Greg Hunt
Director

Independent Auditor's Review Report

Independent Auditor's Review Report

To the shareholders of Nufarm Limited,

Report on the Condensed Interim Financial Report

Conclusion

We have reviewed the accompanying **Condensed Interim Financial Report** of Nufarm Limited.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the Condensed Interim Financial Report of Nufarm Limited does not comply with the *Corporations Act 2001*, including:

- giving a true and fair view of the **Group's** financial position as at 31 March 2025 and of its performance for the **Interim Period** ended on that date; and
- complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

The **Condensed Interim Financial Report** comprises:

- Condensed consolidated balance sheet as at 31 March 2025
- Condensed consolidated statement of profit or loss and other comprehensive income, Condensed consolidated statement of changes in equity and Condensed consolidated statement of cash flows for the Interim Period ended on that date
- Notes 1 to 16 comprising material accounting policies and other explanatory information
- The Directors' declaration.

The **Group** comprises Nufarm Limited (the Company) and the entities it controlled at the Interim Period's end or from time to time during the Interim Period.

The **Interim Period** is the six months ended on 31 March 2025.

Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the *Auditor's Responsibilities for the Review of the Financial Report* section of our report.

We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the *Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with these requirements.

Responsibilities of the Directors for the Condensed Interim Financial Report

The Directors of the Company are responsible for:

- the preparation of the Condensed Interim Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*
- such internal control as the Directors determine is necessary to enable the preparation of the Condensed Interim Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Review of the Condensed Interim Financial Report

Our responsibility is to express a conclusion on the Condensed Interim Financial Report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the Condensed Interim Financial Report does not comply with the *Corporations Act 2001* including giving a true and fair view of the Company's financial position as at 31 March 2025 and its performance for the Condensed Interim Period ended on that date, and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a Condensed Interim Period Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
