

ADVANCETC LTD (ACN 600 238 444)

NSX RELEASE

AdvanceTC Limited (NSX:A88)

17th December 2024

ADVANCETC CONDUCTS INDUSTRY BRIEFING TO ITS COLLABORATORS , PARTNERS AND INVESTORS ON ITS NEW THERMO ELECTRIC GENERATOR (NTEG) TECHNOLOGY – “ HEATSEEKER 3 “ .

AdvanceTC Ltd (‘AdvanceTC’ or the ‘Company’) is pleased to inform that it has conducted a detailed presentation of this unique technology by Dr Hector M. Guevara (AdvanceTC’ s CTO for Renewable Energy Division) and its subsidiary Onyx Nuenergy Malaysia (ONM), on the 6th Dec 2024 , at the UKM IMEN facility in Bangi , Selangor . Dr Hector is the inventor and patent holder of this technology , with rights assigned to ONM .

The presentation worked through several key points on collaboration with the representatives of UKM (Universiti Kebangsaan Malaysia) and UTEM (Universiti Teknikal Malaysia Melaka) , especially on the continuous upgrade of the technology of NTEG , its commercialisation process and the supply of critical materials , especially on Graphene supply , which both UKM and UTEM , are already ready and able to supply . The presentation clearly differentiates the significant output performance of the “Heatseeker 3” technology compared with conventional solar panels .

The event was covered by News Media (NST) and the link to the news coverage is appended below .

<https://www.nst.com.my/business/corporate/2024/12/1147758/onyx-showcases-more-efficient-alternative-solar-pv-system>

The Company believes that with UKM and UTEM’s experiences & expertise , couple with our own Dr Hector’s knowhow and patented technology (NTEG system) , the Company will be able to accelerate its commercialisation smoothly .

The Company will continue to update progress as and when new information is made available to the Company.

About AdvanceTC Limited

AdvanceTC Limited (NSX : A88) is a leading mobile telecommunication and computing company that provides innovative hardware and software products for both consumer and professional market segments.

ADVANCETC LTD (ACN 600 238 444)

We complement our market offerings as a mobile virtual network operator, delivering the network and bandwidth services required for optimum performance of our products and solutions. We are also in the renewable energy sector with the patented NTEG technology (New Thermal Electric Generator) to complement the current solar panel market .
