### **SenterpriSYS Update**

The Board of SenterpriSYS announces today that it has recorded a small profit after tax of \$48,211.

The Company has resolved a number of issues with the software downloads and installation of the software on various devices. The Board is confident that the level of enquiry should increase as a result of addressing these download issues.

The Board is working on a number of new modules to enhance the current version as well as finalising the development of the QANOTIX software modules.

The Board advises that it is preparing documents for a rights issue to be held in May 2020 to raise additional funds to complete the marketing and commercialisation of the software.
