## MARCH 2017 QUARTERLY REPORT

### Global Highlights

- Several corporate transactions in progress in fertiliser feedstock sector.
- Fundamentals for agri-chemicals appear strong in medium term.

### Dandaragan Trough Project ("DTP")

- Process design in progress at Kemworks.
- No further drilling required to complete Preliminary Feasibility Study.

### Lake Barlee Project

- Purchase of key licence completed in period.
- PWN now has coverage over 90% of lake surface.

### Technology

- PWN has agreed to sell its 97 M Lepidico shares to Lithium Australia.

### Davenport Resources (26% holding)

- Local approval for K llstedt drilling in progress.
- Data Review of Gr fentonna nearing completion.
- Data review of Southern Cross Bore indicates strong copper-gold mineralization.

## DANDARAGAN TROUGH PROJECT

Parkway Minerals NL (“PWN”, “Parkway” or “the Company”) has continued to advance the Dinner Hill Potash and Phosphate Deposit, located some 200km north of Perth in Western Australia, (Figure 1). Dinner Hill forms part of the larger Dandaragan Trough Project (DTP), where Parkway holds over 2,000km<sup>2</sup> of exploration tenure. Sedimentary rocks within the trough contain glauconite, a potash rich mica, and phosphate nodules. The objective is to produce phosphate and potash fertilisers and a range of valuable by-products from the phosphate and glauconite present within the sediments of the Dandaragan Trough. The Dinner Hill Project covers some 60 km<sup>2</sup> within the DTP.

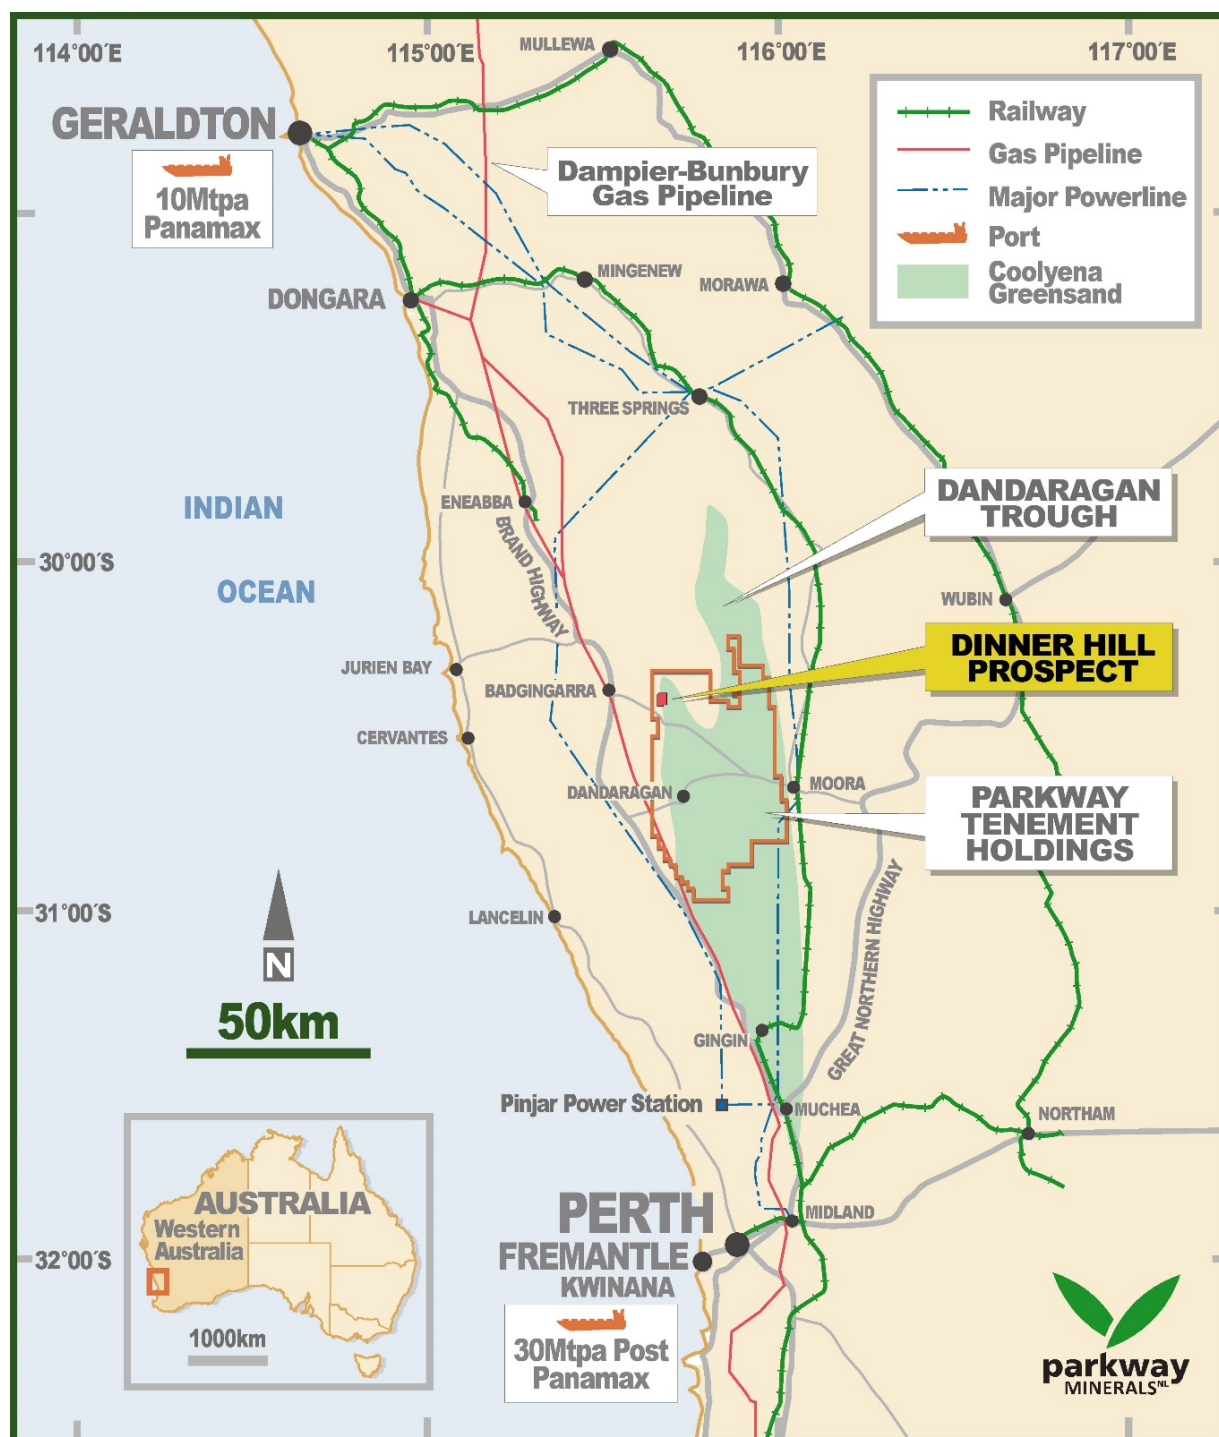

Figure 1: Location plan, Dandaragan Trough Project

The DTP has unique advantages of excellent connectivity to transport facilities, infrastructure and proximity to local and regional markets. It is located within an easy drive from Perth, and is less than 200km from two major bulk export ports, Kwinana and Geraldton. It is well situated in relation to major project infrastructure, and significant local and regional markets for its products.

#### **Dinner Hill Prefeasibility Study (PFS)**

Process design testwork is now in progress, with Florida based Kemworks Technology Inc (**Kemworks**). Kemworks are phosphate process design specialists, with many years of focused phosphate process development experience. Testwork has been delayed, by factors outside our control. Results are now expected in the June quarter.

#### **LAKE BARLEE PROJECT**

Parkway has a number of exploration licence applications covering Lake Barlee, north-east of Southern Cross in Western Australia. During the period PWN purchased EL 77/2347 which covers the key central portion of the lake (Figure 2). Lake Barlee is prospective for potassium salts in the brine. A reconnaissance trip, and planning for an exploration programme will take place in the June quarter.

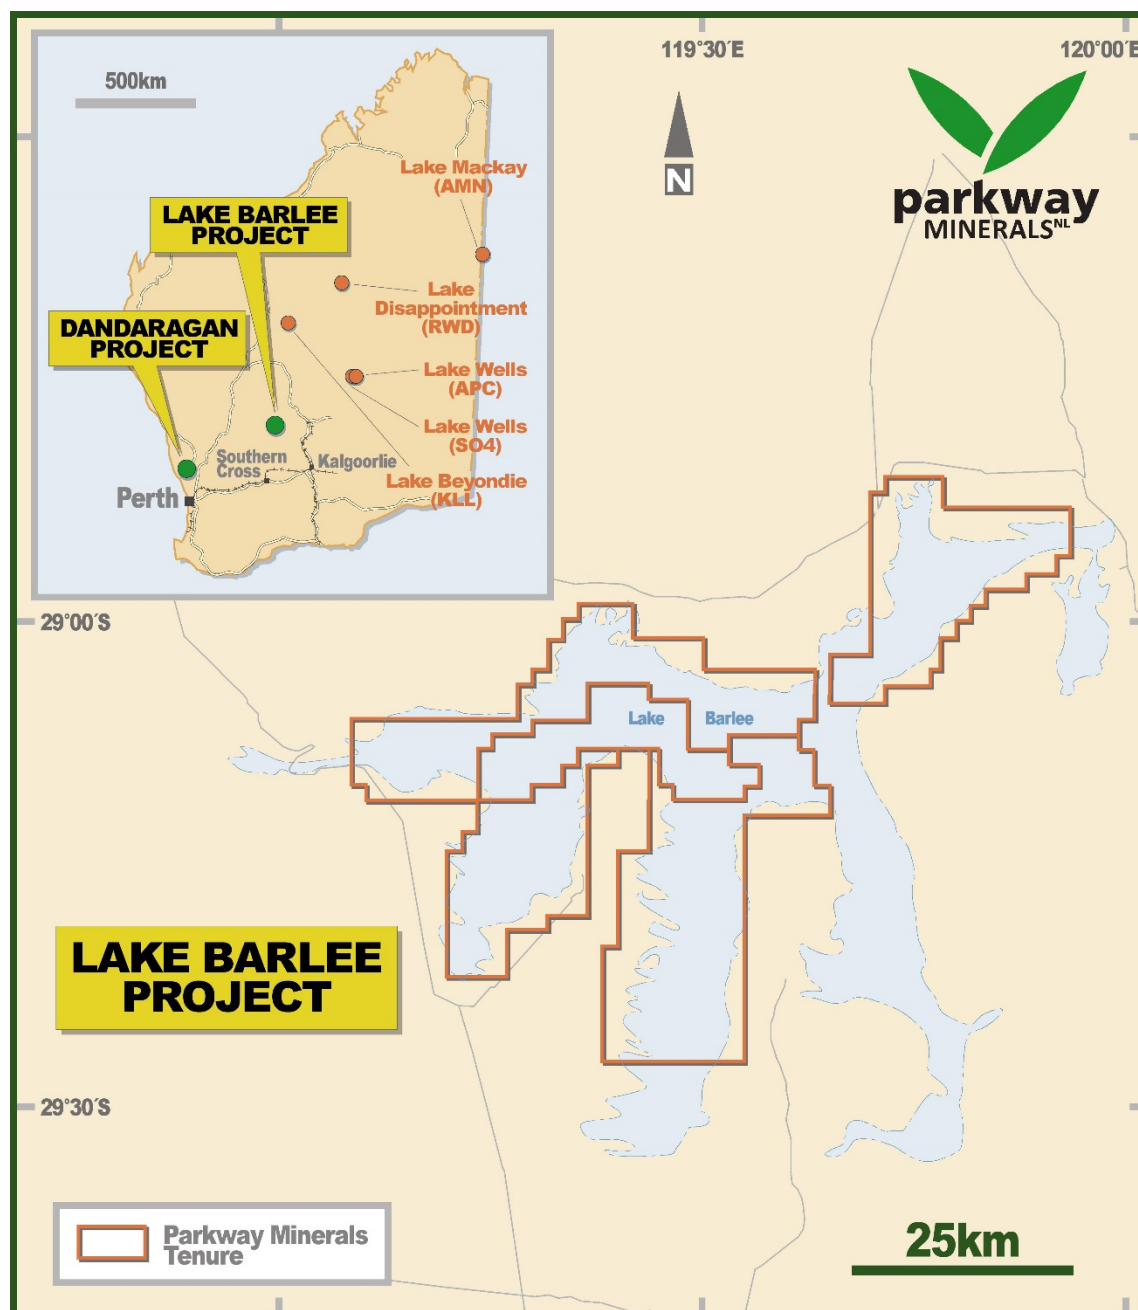

Figure 2 Lake Barlee Project area.

#### DAVENPORT RESOURCES

Parkway owns 26% of Davenport Resources (**DAV**), which holds exploration licences in the South Harz region of Germany (Figure 3). The South Harz region has a long history of potash mining, dating back to the late 1890s. Extensive exploration work and R&D was carried out in the period from the 1960s to the 1980s. This confirmed that substantial potash deposits still remain in this region. An Exploration Target for the Küllstedt licence was reported to the ASX by PWN on March 4, 2015. A drilling programme within that Target is in the approval stage with the Thuringian Mining Authority.

Work is in progress analyzing the results from several drilling programs carried out on the Gräfontonna licence. A report is expected from our consultants shortly.

A review of previous exploration work at the Southern Cross Bore project was completed and released to the ASX on 28<sup>th</sup> March. This project, approximately 600km<sup>2</sup> 75 km NE of Alice Springs has recorded significant intersections of gold and copper. Planning for geophysical surveys is in progress.

DAV has a programme of ongoing identification and evaluation of opportunities to advance the company's objectives. If a proposal advances, details would be announced in accordance with its continuous disclosure obligations.

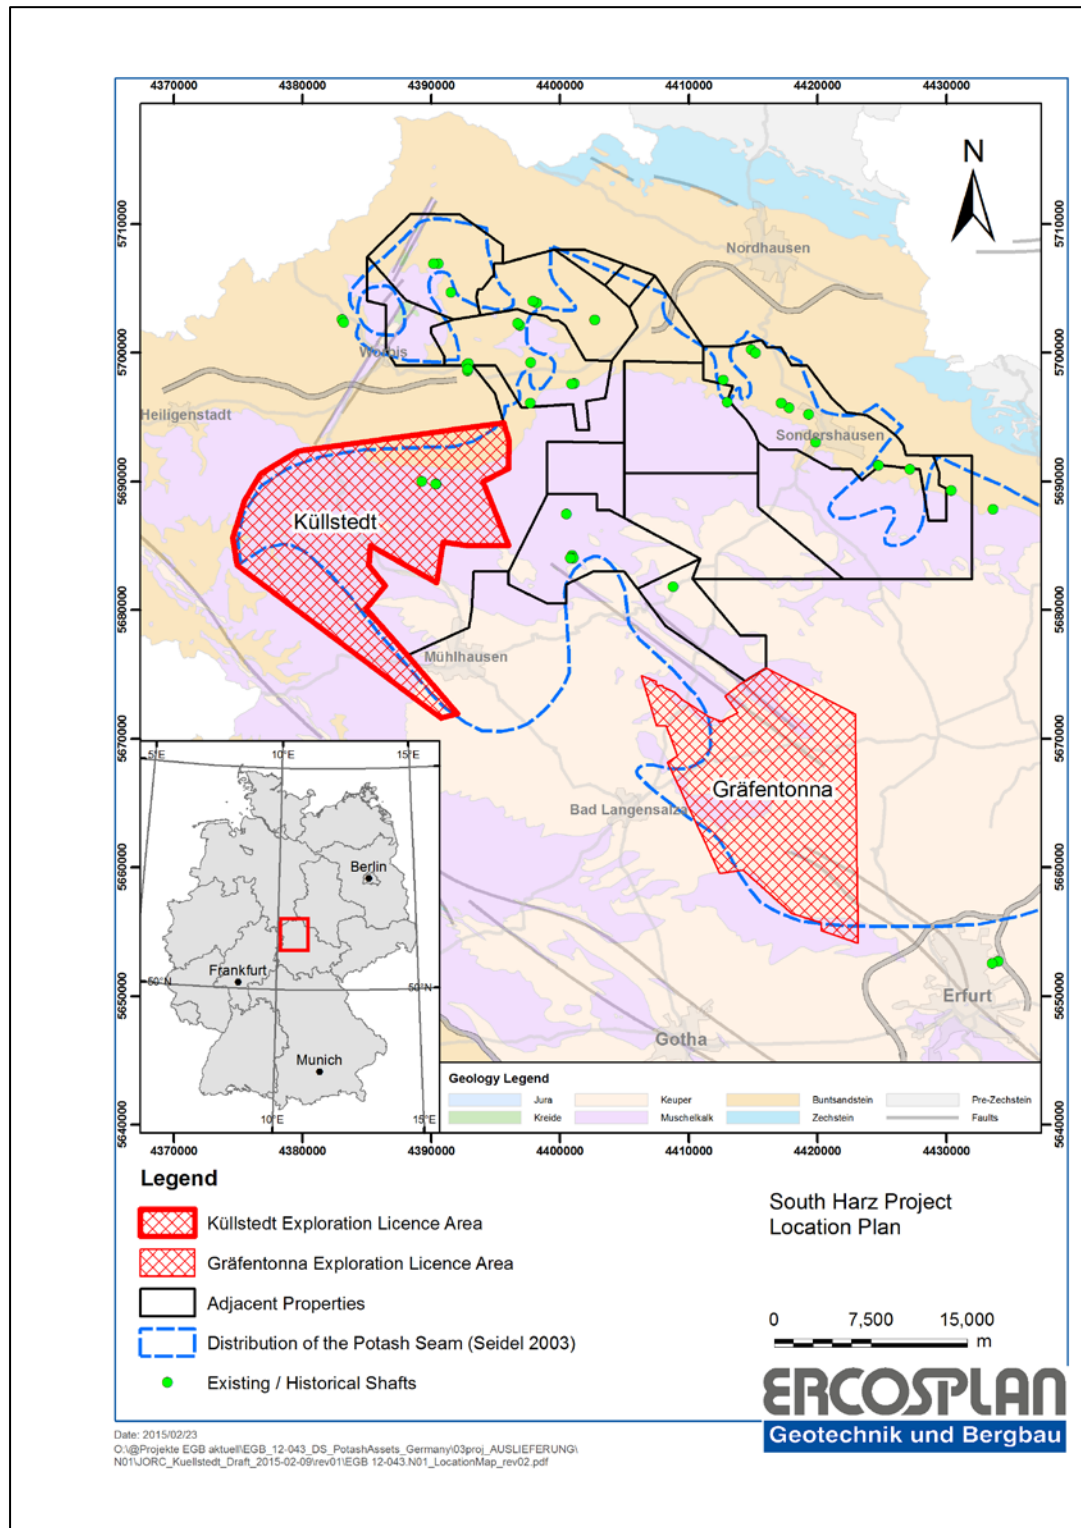

Figure 3: South Harz Project Location

**LEPIDICO LTD (FORMERLY PLATYPUS MINERALS)**

Parkway owned 97 million Lepidico (**LPD**) shares. On 6 February Lithium Australia (**LIT**) announced a takeover bid for LPD. It offered 1 LIT share for every 13.25 LPD shares. that ratio was a premium of 13% to the relative share prices on that date. PWN signed a binding pre-bid agreement to accept the offer, subject to conditions typical for this form of transaction. On 28 March 2017 PWN accepted the LIT offer.

The Independent Directors of Parkway believe that joining together of LIT and LPD would produce a significantly stronger group, better able to exploit the opportunities to apply new technology to the lithium supply chain. It is for that reason that Parkway accepted the offer.

**CORPORATE**

Parkway monitors activities and opportunities that may be relevant to the companies objectives. This may include expanding or changing the scope of existing projects or engaging with third parties on other projects. If a proposal advances, details would be announced in accordance with the Company's continuous disclosure obligations.

**ANNOUNCEMENTS**

The following ASX announcements were made during the quarter:

- 28-March-2017 - PWN Accepts Lithium Australia Offer for Lepidico Shares
- 15-March-2017 - Half Year Accounts
- 24-February-2017 s708 Notice, Appendices 3B and 3Y's
- 22-February-2017 Investor Presentation
- 22-February-2017 DKO: Sale of Tenement E77/2347
- 22-February-2017 Parkway Minerals Consolidates WA Salt Lake Project
- 09-February-2017 Securities Trading Policy
- 08-February-2017 LPD: Substantial Shareholder Notice Concerns
- 08-February-2017 Expiry of Options
- 06-February-2017 PWN Enters Agreement with LIT Regarding LPD Shareholding
- 02-February-2017 Ceasing to be a substantial holder
- 31-January-2017 Quarterly Activities and Cashflow Reports
- 20-January-2017 Becoming a substantial holder for DAV
- 19-January-2017 Davenport Resources to Commence Trading on ASX on 20 January

No announcements were made subsequent to 31 March 2017:

**CASH ON HAND**

At 31 March 2017, \$2.137 million cash was available.

**TENEMENT SUMMARY**

The following information is provided in accordance with ASX Listing Rule 5.3.3:

**About Parkway Minerals**

*Parkway Minerals (ASX: PWN) is an exploration company focused on developing large greensand deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover phosphate, potash and other minerals from the Dandaragan Trough. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the potash and phosphate markets at a time of heightened regional demand.*

*The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of over 2,000km<sup>2</sup>. Previous exploration indicates*

*glauconite sediments are widespread for more than 150km along strike and 30km in width. A pre-feasibility study is in progress for stage 1, production of phosphate fertilisers.*

*The company owns 25% of Davenport Resources, which owns a potash exploration project in the South Harz region of Thuringia, in Central Germany. The region has been a potash producing area for over 100 years.*

**Notes**

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
