First 6 months of Sales in FY25 eclipse FY24 Full Year

Retail Sales to Consumers are Growing

Retail Sales have grown by 17% at checkout in Coles in Q2 vs Q1 with no advertising spend and now represent 25% of our sales mix. We have added QuikStop to our retail partnerships in Q3.

Note: Total net cash used in operations reported includes \$675k in inventory build.

TOTAL SALES vs. NET CASH USED AFTER INVENTORY

While Q2 total sales have reduced slightly, **net cash used in operations after adjusting for inventory has been reduced by 50% to \$427k for the quarter**

This pivot to focus on break even point and onwards to profitability is a priority for management.

CEO's Comment

ANTHONY NOBLE
a.noble@thecalmerco.com

Our brands have solidified their positions as market leaders in Australia and on Amazon USA. Currently, our products are available in over 885 Coles stores nationwide and we launched our first convenience store distribution partnership.

As we transition to the next phase of our growth strategy, our primary focus will shift towards achieving break even and onwards to profitability. We've significantly reduced net cash usage in operations, while both our eCommerce and retail channels continue to deliver strong year-over-year sales growth.

With upgraded factory capabilities, enhanced production capacity, and robust inventory levels, we are well-positioned for our highly anticipated expansion into the US Ready-to-Drink market, supported by a pipeline of exciting new product launches.
