

Cleansing Notice under section 708A(5)(e) of the Corporations Act

Bluechiip Limited (**Bluechiip** or the **Company**) (**ASX: BCT**) has allotted and issued 2,272,727 fully paid ordinary shares on 16 September 2024, as detailed in the Appendix 2A released to the ASX today.

The Company gives this notice in accordance with section 708A(5)(e) of the Corporations Act 2001 (Cth) (**Corporations Act**) and states the following:

- (a) the Company issued the Shares without disclosure to investors under Part 6D.2 of the Act;
- (b) as at the date of this Notice, the Company has complied with the provisions of Chapter 2M of the Act as they apply to the Company, and section 674 and 674A of the Act; and
- (c) As at the date of this Notice there is no information:
 - (i) that has been excluded from a continuous disclosure notice in accordance with the ASX Listing Rules; and
 - (ii) that investors and their professional advisers would reasonably require for the purpose of making an informed assessment of:
 - (A) the assets and liabilities, financial position and performance, profits and losses and prospects of the Company; or
 - (B) (B) the rights and liabilities attaching to the relevant Shares.

END

About Bluechiip Limited

Bluechiip understands that every biological sample – stem cells, blood, eggs, sperm and other biospecimens – is critical, so our objective is to manage each one with optimal quality in the most efficient way. Bluechiip's advanced sample management solution is the only one that provides sample temperature with ID in cryogenic environments, driving productivity and improving quality. Bluechiip's solution delivers confidence in every sample.

Bluechiip's unique patented technology is a MEMS-based wireless tracking solution that contains no electronics. It

represents a generational change from current tracking methods such as labels (hand-written and pre-printed), barcodes (linear and 2D), and Radio Frequency Identification. Bluechiip tags are either embedded or manufactured into storage products such as vials or bags. Each product is easily identified and critical information, such as sample temperature, detected by readers and stored in the Bluechiip software. In addition to functioning in extreme temperatures, the Bluechiip® Advanced Sample management solution can survive autoclaving, gamma irradiation sterilization, humidification, centrifuging, cryogenic storage and frosting.

Bluechiip listed on the ASX in June 2011. Since then, we have significantly developed our technology. Today it has applications in healthcare, including in cryogenic storage facilities (biobanks and biorepositories), pathology, clinical trials and forensics. Other key markets include cold-chain logistics/supply chain, security/defence, industrial/manufacturing and aerospace/aviation.

Bluechiip: Delivering confidence in every sample.
