

Retraction of Lo Herma Scoping Study Production Target Statements

GTI Energy Ltd (**GTI** or **Company**) refers to the ASX Announcements dated 5 June 2025 “*Scoping Study Demonstrates Low Cost ISR Uranium Potential*” and “*Scoping Study Demonstrates Low Cost Potential (Replacement)*” (**Scoping Study Announcements**).

The Scoping Study Announcements contain forward-looking statements in the form of production targets and forecast financial information. However, following consultation with the ASX, the Company did not have a reasonable basis for those forward-looking statements due to the proportion of inferred mineral resources in the production target. The Company retracts all production targets and forecast financial information included in the Scoping Study Announcements.

The Company advises investors that due to the absence of reasonable basis for the statements, they should not rely on the Scoping Study Announcements as a basis for investment decisions.

The Company is currently finalising a drilling program to increase the confidence level in the Inferred Mineral Resource portion of the Lo Herma Mineral Resource Estimate as well as to undertake step-out drilling to grow the footprint of the existing deposit. Further details of this drilling program will be provided in due course.

The announcement has been authorised for release by the Board of GTI Energy Ltd.
