Netlinkz to hold investor webinar followed by Q&A session

Tuesday, 11 July 2023, at 11AM AEST

How Netlinkz's NaaS offering and strategic partnerships strategy are growing the business

Netlinkz Limited (ASX:NET) (Netlinkz or Company), a provider of cloud-based cyber-secure invisible Network-as-a-Service (NaaS) for enterprise customers, is pleased to announce that it will hold an investor webinar on Tuesday, 11 July 2023, at 11AM AEST.

In the webinar, Netlinkz's CEO Mr James Tsiolis will discuss:

- The Company's five core business units
- Key components of Netlinkz's growth strategy
- The growing problem of threats to cyber security
- How Netlinkz's NaaS offering solves for this problem
- How Netlinkz's growing list of strategic partnerships add value
- The significant upside in the Starlink Global Reseller Agreement
- The sustained uplift occurring in revenues and gross profit

The webinar is expected to run for 30 minutes . The presentation will be followed by a Q&A session. Investors are encouraged to send their questions to Netlinkz's investor relations analyst Russell Katz via russell@thecapitalnetwork.com.au prior to the webinar. Questions can also be submitted during the webinar via the chat box.

About Netlinkz Limited

Netlinkz Limited (ASX:NET) is a Virtual Secure Network (VSN) that runs on Network as a Service (NaaS). It provides a secure and highly scalable solution for organizations looking to extend their network resources to remote users and devices. With Netlinkz, organizations can leverage an efficient global concept in order to increase productivity while maintaining security and compliance standards. The service eliminates the need for complex configuration of hardware or software while providing an easy-to-use platform that allows for true mobility, high performance, and scalability without compromising on data protection or privacy.

Netlinkz provides its clients with speed, security and access to revolutionary satellite communications technology:

- **Speed:** Netlinkz NaaS solution enables device-to-device communication with the shortest route in a secure way thanks to its patented intelligence logarithms and global presence of NaaS servers on 23 international peers.
- **Security:** Netlinkz Security utilizes state-of-the-art 256 BIT encryption for maximum data protection, and its IP hopping feature changes IPs every 45 minutes to provide an extra layer of security.
- **SatCom:** Netlinkz NaaS is a revolutionary breakthrough in satellite communications, providing users with a secure and reliable communication layer.
