

MORE GOLD SOONER, TO BE HELD LONGER

Black Cat Syndicate Limited (“**Black Cat**” or “**the Company**”) is pleased to provide an update on its gold bullion strategy.

HIGHLIGHTS (All amounts are in A\$ unless otherwise stated)

- With increasing production, Black Cat’s **strategy is to build up and retain a minimum of ~\$20M (~4,000 oz) of production in dedicated gold bullion storage**. To the end of May, ~\$24M (~4,500oz) has been retained and is in storage. Cash will continue to be retained for growth and working capital purposes.
- The bullion is trading stock to the Company and as such, will be valued at the lower of cost and net realisable value for accounting and income tax purposes. Accordingly, unrealised profits on the bullion will be recognised by regular revaluations as opposed to sales, and then realised profits taxed at the point of eventual sale.
- Investors seeking leverage to gold, both in bullion and Resources, can now consider an investment in an unhedged Black Cat. In addition to our bullion, we have ~2.5M oz of gold in a growing Resource base.
- Gold is a high-quality, liquid asset that is free from credit risk and accepted across borders and has a history of retaining its purchasing power (Figure 1).

Black Cat’s Managing Director, Gareth Solly, said: *While Black Cat is not a bullion bank, we are not a cash bank either. It is hard to justify producing a safe haven asset, in gold, and then converting that asset into an asset losing its purchasing power, in cash.*

After working capital and growth requirements, we are setting \$20M of gold aside, comfortable in the knowledge that gold is a high-quality, liquid asset. At the end of the day, we are in the gold business and investors can choose Black Cat because they are seeking leverage to gold. And yes, the gold price could go down, and we will hold sufficient cash to cover such a contingency.

We will regularly review how the strategy fits with the Company’s cash requirements, risk profile and investor expectations.

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat is a gold producer with operating mines and processing facilities at two of its three 100% owned operations. Gold production occurs at:

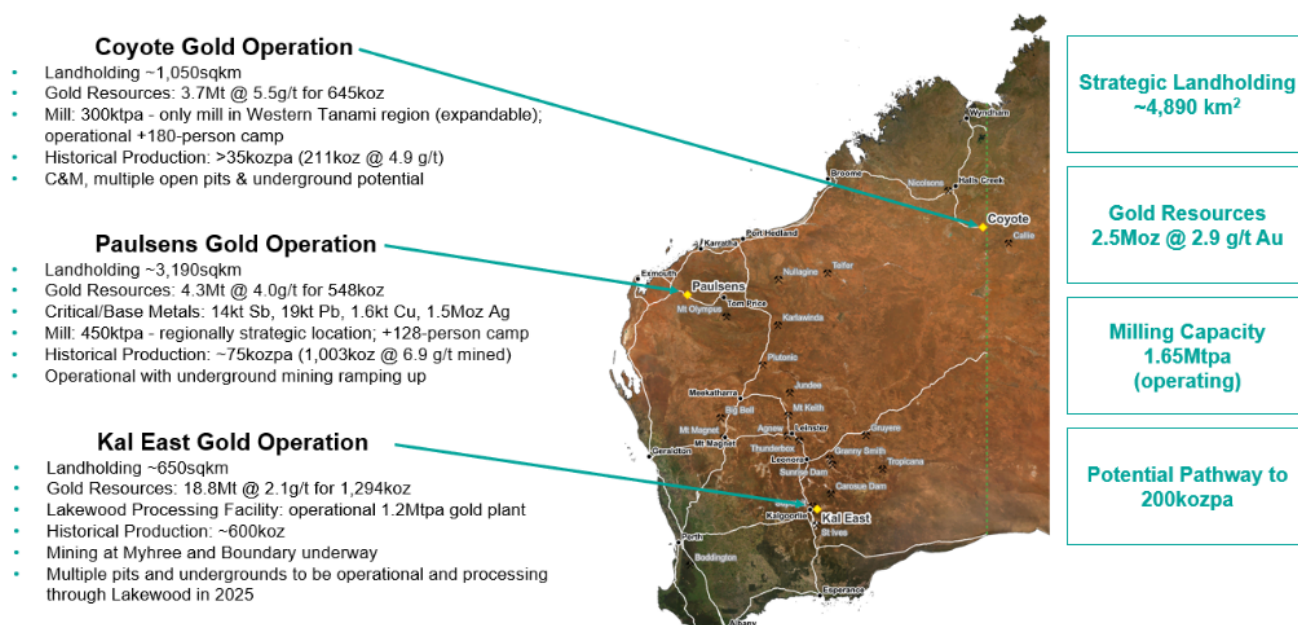

Kal East: comprising ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway¹. Black Cat 100% owns and operates the 1.2Mtpa Lakewood gold processing facility, located ~6km east of Kalgoorlie.

Paulsens: comprising ~3,200km² of tenure located ~180km west of Paraburdoo in WA. Paulsens is an operational underground mine, with a 450ktpa processing facility, 128-person camp and other related infrastructure. Gold production restarted in December 2024 and will move to full production during 2025. Paulsens has a regional Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

The Company has significant regional exploration potential at both Paulsens and Kal East. In addition, the Company has two major organic growth projects at:

Coyote: comprising 1,050km² prospective tenements located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. Coyote has substantial infrastructure including an airstrip, underground mine, 300ktpa processing facility, +180-person camp and other related infrastructure. The operation has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area. Operations are planned to restart in the future.

Mt Clement: is located 30 km from the Paulsens Gold Operation and is currently the 4th largest antimony deposit in Australia. Significant upside potential for growth of the antimony Resource exists with the Company actively exploring the region.

COMPETENT PERSON'S STATEMENT

Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
- All tonnages reported are dry metric tonnes.
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- Resources are reported inclusive of any Reserves.
- Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.
