## About Metgasco

Metgasco Limited (ASX:MEL) is a growing onshore Australia-focussed oil and gas exploration and production company with a 25% non-operated interest in licences located within the following two gas producing fields located in the Southern Flank of the Cooper Eromanga Basin:

- The Odin gas field, which straddles the South Australia-Queensland border
- The Vali gas field, which is located in Queensland, adjacent to the Queensland-South Australia border.

The company has progressed appraisal drilling and production programs for these assets to point where Metgasco now generates sales revenue from gas and gas liquids produced from its Cooper Basin portfolio via long term gas contracts to blue chip gas customers. The joint venture owning these assets has approved a low cost well intervention program which is anticipated to significantly increase current gas production to existing gas customers and associated revenue. The potential revenue generated will enable the staged appraisal and development of c 36.55PJ\* of 2P reserves to an undersupplied East Coast Gas market. The licences have multiple additional oil and gas exploration targets, which if successful, can be developed rapidly via existing production infrastructure.

Metgasco has successfully transitioned from being a pure oil and gas explorer to a producer, it continues to examine ways to further grow its business. These possibilities include both opportunities to acquire additional value-accretive exploration- and production-stage oil and gas assets, and potential new areas of business consistent with the Company's strategic objectives.
