

NET ZERO ANTIMONY SMELTING STRATEGY ADVANCES WITH APPOINTMENT OF HIGHLY EXPERIENCED DOWNSTREAM EXPERT

HIGHLIGHTS

- Trigg appoints world-renowned antimony metallurgist David Fourie as its Net Zero Expert Antimony Technical Advisor as it aims to advance development of its Antimony Canyon Project in Utah, USA.
- David brings +25 years pyrometallurgical and project development experience, including as Chief Operating Officer (COO) of SPMP, the world's largest antimony roaster outside China.
- David played a critical role in the design and ESG component of the Oman smelter, widely recognised as the first “clean plant” built to European environmental standards.
- David's appointment follows the recent addition of Wiehann Kleynhans, who also brings executive experience from SPMP.
- Together, David and Wiehann will collaborate closely to advance Trigg's vertically integrated antimony smelter, supporting the company's vision of becoming a dependable, conflict-free supplier of antimony to the U.S. and broader Western markets.
- In a short period, Trigg has brought together a world-renowned and highly experienced antimony team with a proven track record in developing antimony mines and smelters. Their expertise is key to fast-tracking the advancement of the Antimony Canyon Project in Utah, USA.

Trigg Minerals Limited (ASX: TMG, OTCQB: TMGLF) is pleased to announce the appointment of David J. Fourie, Pr. Eng., MBA as its Net Zero Expert Antimony Technical Advisor, effective 1 July 2025.

Mr Fourie is an extractive metallurgist with more than 25 years' experience across pyrometallurgy, smelter design and strategic project execution. As former Chief Operating Officer (COO) at Strategic & Precious Metals Processing (SPMP) in Oman, he led the ramp-up and technical operations of the world's largest antimony roaster outside China widely recognised as the first 'clean plant' built to European environmental standards.

Mr Fourie has held senior positions at global engineering and resource firms including Mintek, Hatch and Tronox, and now operates as an independent consultant. Mr Fourie has been engaged as a technical consultant to advise Trigg on smelter design and development strategy. He specialises in strategic metal flowsheets and smelter optimisation, advising clients through all stages of development from scoping and feasibility through to permitting, commissioning and steady-state operations.

His appointment represents a positive step in Trigg's goal of building a vertically integrated, net zero supply chain for antimony in the western world leveraging Mr Fourie's combination of technical, ESG and commercial experience in clean strategic metals processing.

Trigg Minerals Managing Director Andre Booyzen commented:

"David is an internationally respected leader in antimony processing with a deep understanding of what's required to design and deliver a modern, sustainable smelter. His direct operational experience from commissioning to optimisation at SPMP is unmatched. His expertise will be instrumental as we progress our clean smelting strategy for Antimony Canyon."
