TARGET MARKET SUMMARY

The Fund is designed for consumers who:

- are seeking capital growth
- are intending to use the Fund as a satellite within a portfolio
- have a medium to long-term investment timeframe
- have a high or very high risk/return profile, and
- require the ability to have daily access to capital.

TMD indicator key

The consumer attributes for which the Fund is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

Potentially in target market

Not considered in target market

Investment products and diversification

Some consumers may intend to hold a product as part of a diversified portfolio (typically with an intended product use of 'satellite'/small allocation or 'core component'). In such circumstances, the appropriateness of the product should be assessed in relation to the relevant portion of the portfolio, rather than in relation to the consumer's portfolio as a whole. For example, a consumer may wish to construct a conservative portfolio with a 'satellite'/small allocation to growth assets. In this case, a product with a high or very high risk/return profile may be consistent with the consumer's objectives for that allocation, notwithstanding that the overall risk/return profile of the consumer is low or medium. In making this assessment, distributors should consider all features of a product (including its key attributes) and the size of any proposed allocation to the product (as a proportion of the consumer's overall portfolio).
