

RC Drilling to Commence at Redcastle

Highlights:

- Siteworks are currently underway
- RC drilling rig to mobilise to site this week
- Auger soil sampling programs to commence shortly
- Database construction nearing completion
- Additional target generation continuing well

Redcastle Resources Ltd (**Redcastle** or **Company**) is pleased to advise that siteworks have commenced on the drill pads for its upcoming 1,275m RC drilling programme.

The Company has secured a suitable RC drill rig, and this is scheduled to mobilise to site by the end of this week. RC drilling is anticipated to commence early next week.

In addition, an auger contractor has been secured and this crew will mobilise to site within approximately three weeks to carry out the wider soil sampling programme. Concurrently, the Company can report that the geological team has made good progress in the digitization of historic data, with approximately 90% now entered into the database. This will further refine the geological interpretation with the overall aim of defining drill targets.

COMPETENT PERSON

The information in this document that relates to mineral exploration and exploration targets is based on work compiled by Boulder Resource Consultants Pty Ltd's Chief Geologist, Mr. Matthew Sullivan. Mr. Sullivan is a member of the Australian Institute of Mining and Metallurgy, and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC 2012 Mineral Code). Mr. Sullivan consents to the inclusion in this document of the exploration information in the form and context in which it appears.

This announcement has been approved for release to ASX by the Board of Redcastle Resources Ltd
