

18 December 2024

2024 AGM TECHNICAL REVIEW PRESENTATION

Havilah Resources Limited (**Havilah** or **Company**) is pleased to circulate the 2024 Technical Review presentation that will be presented at the 2024 Annual General Meeting today by Dr Chris Giles, Havilah's Technical Director.

The presentation provides a summary of Havilah's corporate and technical achievements during 2024 and its strategic planning for the year ahead.

The presentation will also be available on the Company's website at www.havilah-resources.com.au.

This release has been authorised on behalf of the Havilah Resources Limited Board by Mr Simon Gray.

For further information visit www.havilah-resources.com.au

Contact: Dr Chris Giles, Technical Director, on (08) 7111 3627 or email info@havilah-resources.com.au

Registered Office: 107 Rundle Street, Kent Town, South Australia 5067

Havilah Resources

Strategic Minerals in South Australia

2024 AGM Technical Presentation

Realising Shareholder Value

Chris Giles, Technical Director, Havilah Resources

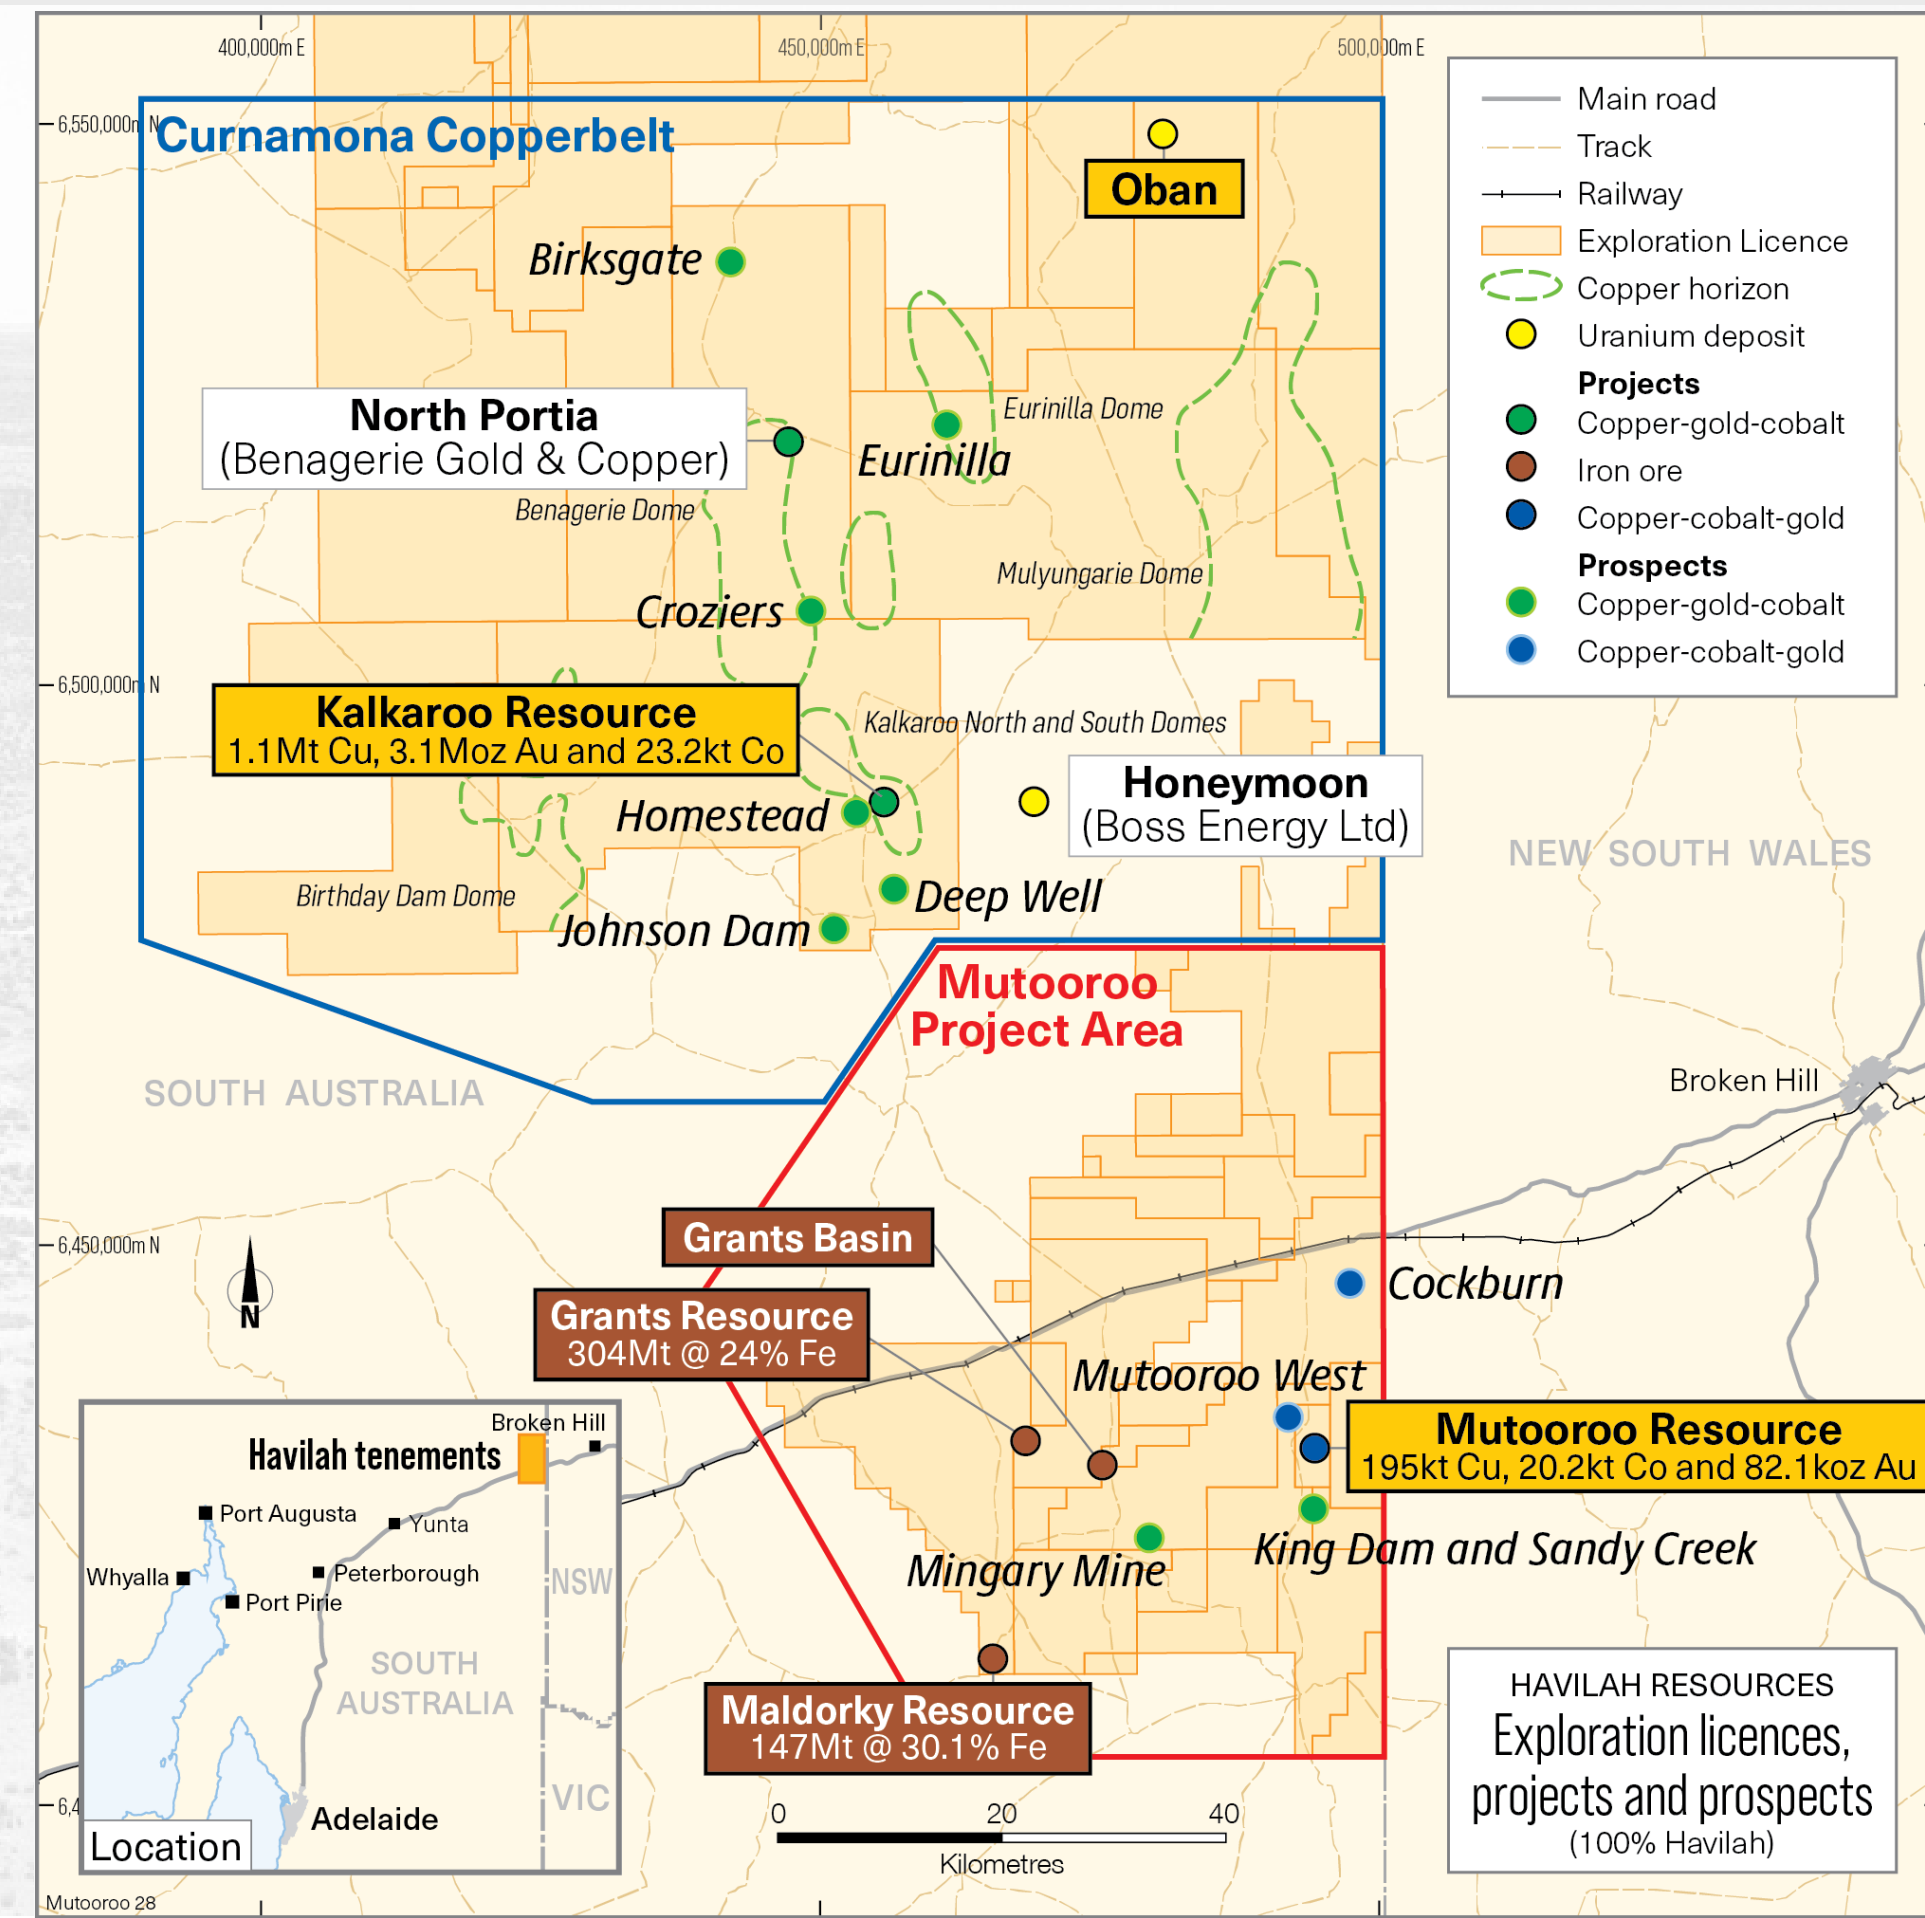

2024 – Another busy and productive year

2

- We achieved many of our stated objectives.
- Commenced an association with JX Advanced Metals Corporation of Japan for a study program at Mutooroo.
- Divested palaeochannel and other non-core uranium assets to Koba Resources Limited and Heavy Rare Earths Limited for shares and options for an earn-in right on relevant Havilah tenements exclusively for uranium (excepting for Radium Hill).
- Active engagement with parties on Kalkaroo project sale. In the meantime benchmark values were provided by two recent undeveloped Australian copper-gold project transactions (Rex Minerals Limited's Hillside project and Rio Tinto's Winu project).
- Exploration success in discovery of significant mineralisation outside of the Mutooroo resource and also within potential trucking distance of Kalkaroo, namely:
 - Birksgate prospect – extensions of copper mineralised zone
 - Eurinilla dome prospect – high grade supergene copper
 - Kalkaroo North Dome Closure prospect – molybdenum
 - Croziers prospect – beryllium and tungsten (plus copper, gold and rare earth elements).

Kalkaroo sale process

3

- During 2024 we have engaged with a number of capable parties. We have found that:
 - The resource, metallurgy and exploration upside present no issues.
 - Mismatched timing and sometimes too busy or pre-occupied with their other acquisitions.
 - Not willing to accept Havilah's financial terms.
 - A reluctance to take on the capital and construction risk of a new copper-gold development.
 - Havilah possibly handicapped by not having an up to date PFS, which was the original objective of the OZ Minerals agreement.
- At this time, we are still engaged with interested parties who are continuing with internal due diligence.

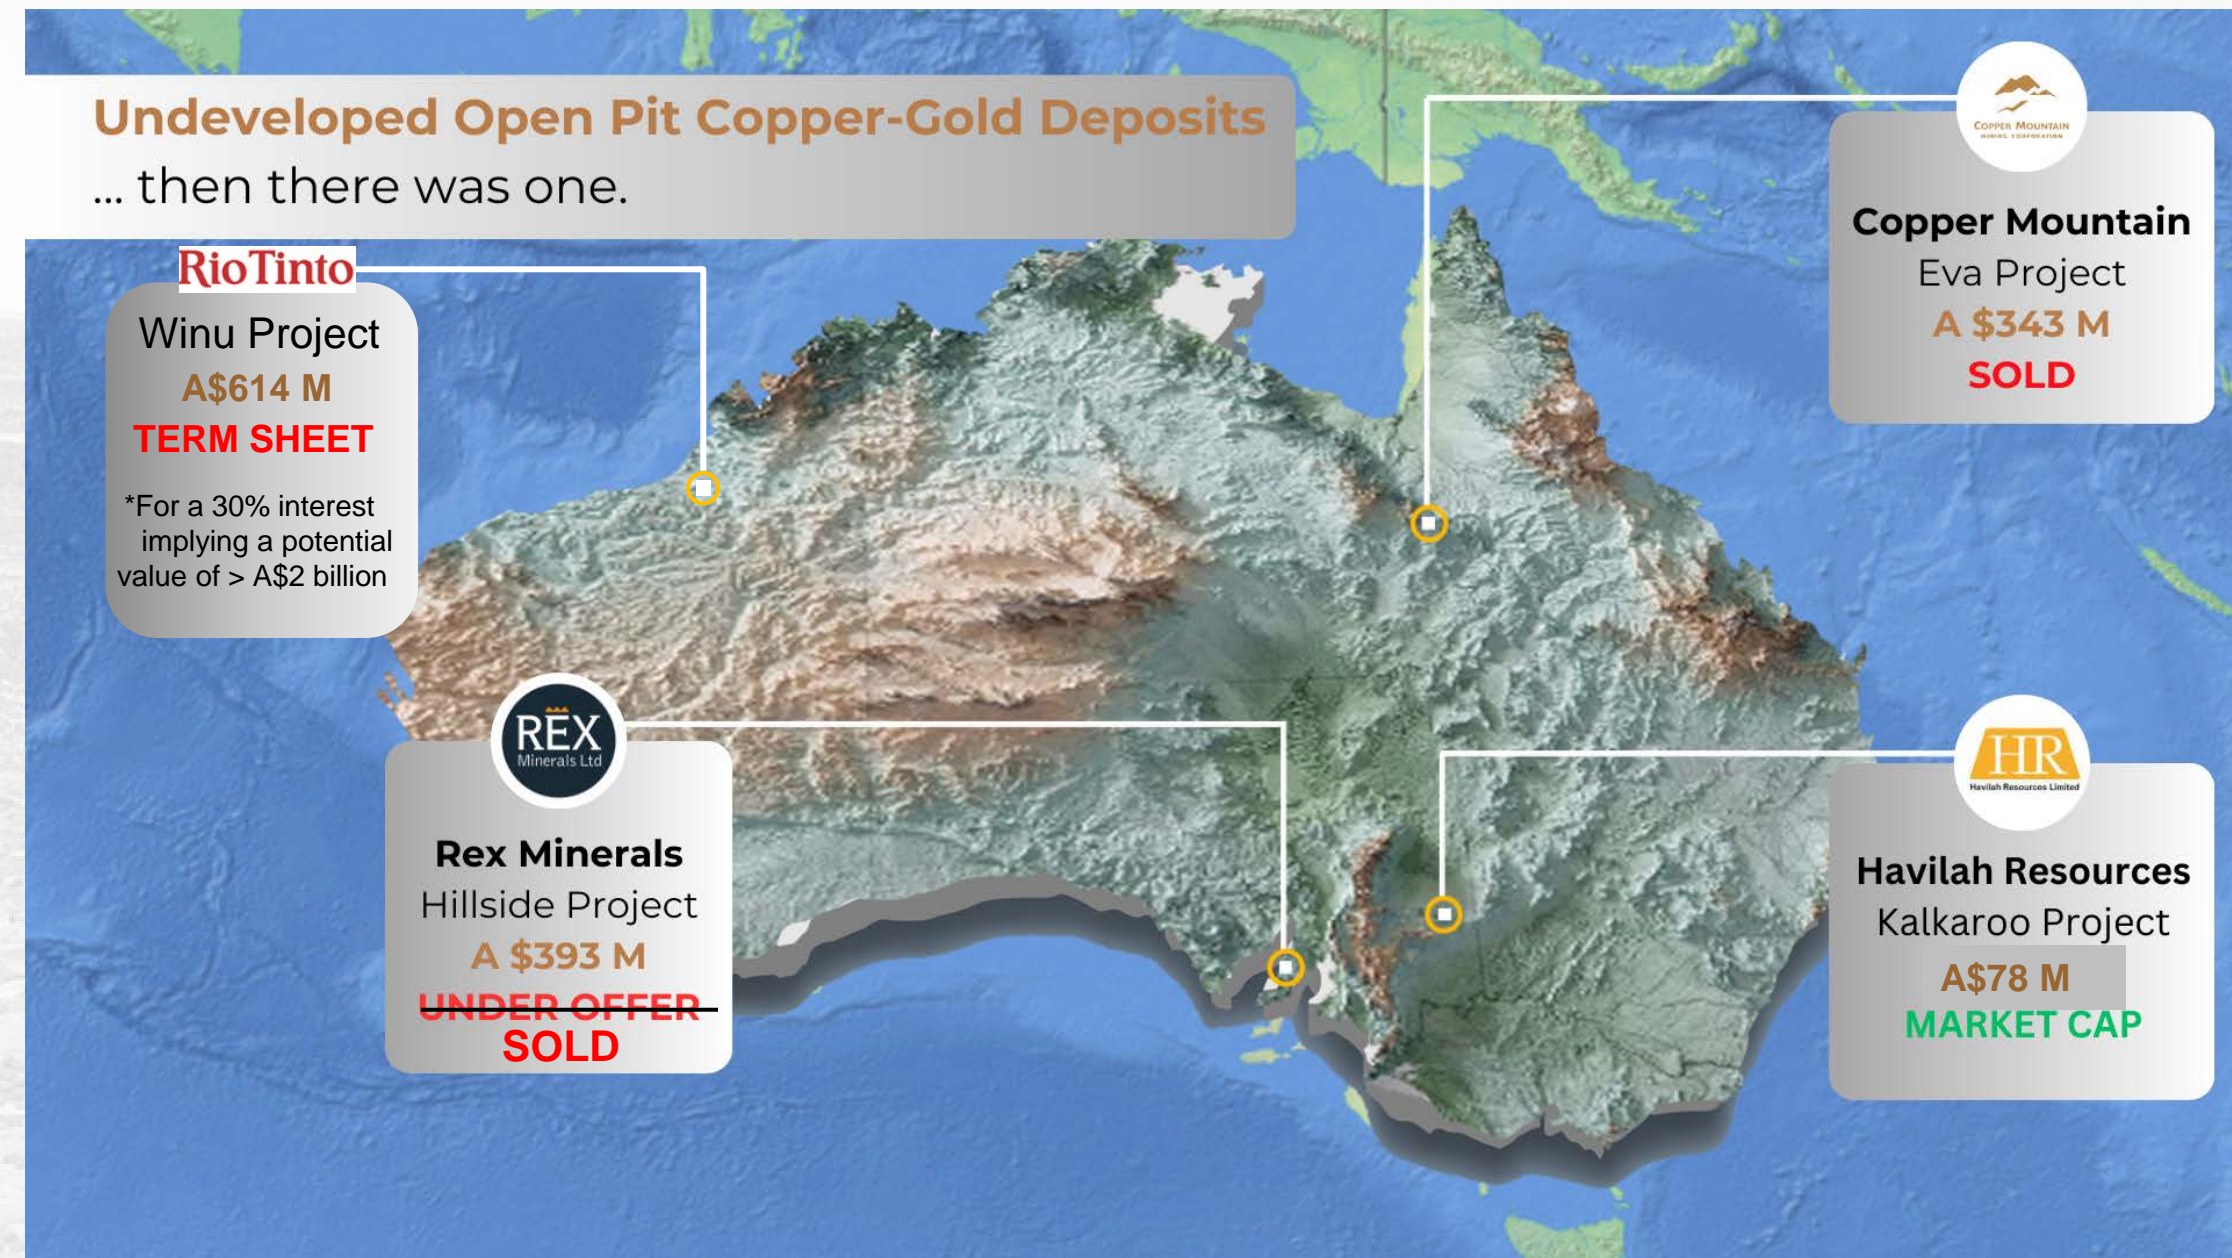

Main Kalkaroo copper-gold oxide and sulphide open pit 3.5 km long, > 200m deep, containing 100 Mt Ore Reserve @ an 0.81% CuEq

* CuEq calculation is based on the formula: $\text{CuEq} = \text{Cu ore reserve grade} + (\text{value } 1\text{g/t Au} / \text{value of } 1\% \text{ Cu} \times \text{Au ore reserve grade} \times \text{Au recovery} / \text{Cu recovery})$. Assumptions: gold price USD2700 /oz, copper price USD9,100 /tonne, ore metal grades are from published Kalkaroo JORC Ore Reserve table (refer to slide 16).

Kalkaroo is more compelling than ever

- Recent sales of comparable undeveloped open pit copper-gold projects indicates there is significant demand. Notably all have been sold to overseas parties.
- Benchmarking against sale prices indicates multiples of Havilah's present market capitalisation.
- Kalkaroo is comparable to these projects and has a number of additional positive attributes:
 - Excellent upside for delineation of additional resources within the existing granted mining lease.
 - Multi-metal deposit – copper-gold plus cobalt, molybdenum, tungsten, rare earth elements.
 - Low sovereign risk northeastern South Australia.
 - Good logistics – near highway, railway, Broken Hill.
 - Land ownership, granted ML, native title agreement.
 - Potential access to renewable energy sources.
 - Part of a wider copper-gold-strategic metals play covered by Havilah's extensive surrounding tenement holding in the Curnamona Province.

Three large undeveloped open pit copper-gold deposits in Australia have been (Eva and Hillside) or are being sold in part (Winu) to overseas parties. **Kalkaroo is the only comparable deposit in Australia with a PFS that remains 100% owned by an ASX listed junior resource company, namely Havilah Resources Limited (ASX: HAV).**

For further details on the transaction terms for the three copper-gold deposits, refer to Appendix A.

Kalkaroo compares favourably with its peers

Project*	Owner	Acquisition cost (A\$)	Sunk cost (A\$)	Ore Reserve	Mineral Resources	Cutoff
Kalkaroo	Havilah 100%	n/a	\$22 M	100 Mt @ 0.81% CuEq 90% Proved. PFS completed	Sulphide all categories 223 Mt @ 0.76% CuEq Oxide all categories 21.7 Mt @ 0.74 g/t Au	0.4% CuEq 0.2g/t Au
Hillside	MACH 100% Rex Minerals takeover by MACH Metals	\$393 M	not available	186 Mt @ 0.53% Cu, 0.14 g/t Au 33% Proved	All categories 337 Mt @ 0.56% Cu, 0.14 g/t Au	0.2 Cu %
Winu	RioTinto 100% Term sheet for sale of 30% to Sumitomo	\$614 M for 30%	\$674 M	No Ore Reserve PFS not completed	Indicated 114 Mt @ 0.79% CuEq Inferred 196 Mt @ 0.72% CuEq	0.45% CuEq 0.45% CuEq
Eva	Harmony Gold Acquisition from Copper Mountain (C6C)	\$343 M	not available	171 Mt @ 0.46% Cu, 0.05 g/t Au 54% Proved	All categories 307 Mt @ 0.42% Cu, 0.04 g/t Au	not available

*For sources of JORC Mineral Resource and Ore Reserve data and other information for each of these copper-gold deposits, refer to Appendix A

Mutooroo – Havilah’s other advanced copper-cobalt-gold project

- JX Advanced Metals Corporation (JXAM) has been funding an ~\$3 million study program at Mutooroo that includes drilling and metallurgical studies ([ASX announcement 19 August 2024](#)).
- Since commencement Havilah and JXAM have completed over 5,500 metres of drilling including reverse circulation pre-collar drillholes, mostly with Havilah’s drilling rig, and diamond tail extensions using a contractor drilling rig. Continuing as we speak.

About JX Advanced Metals:

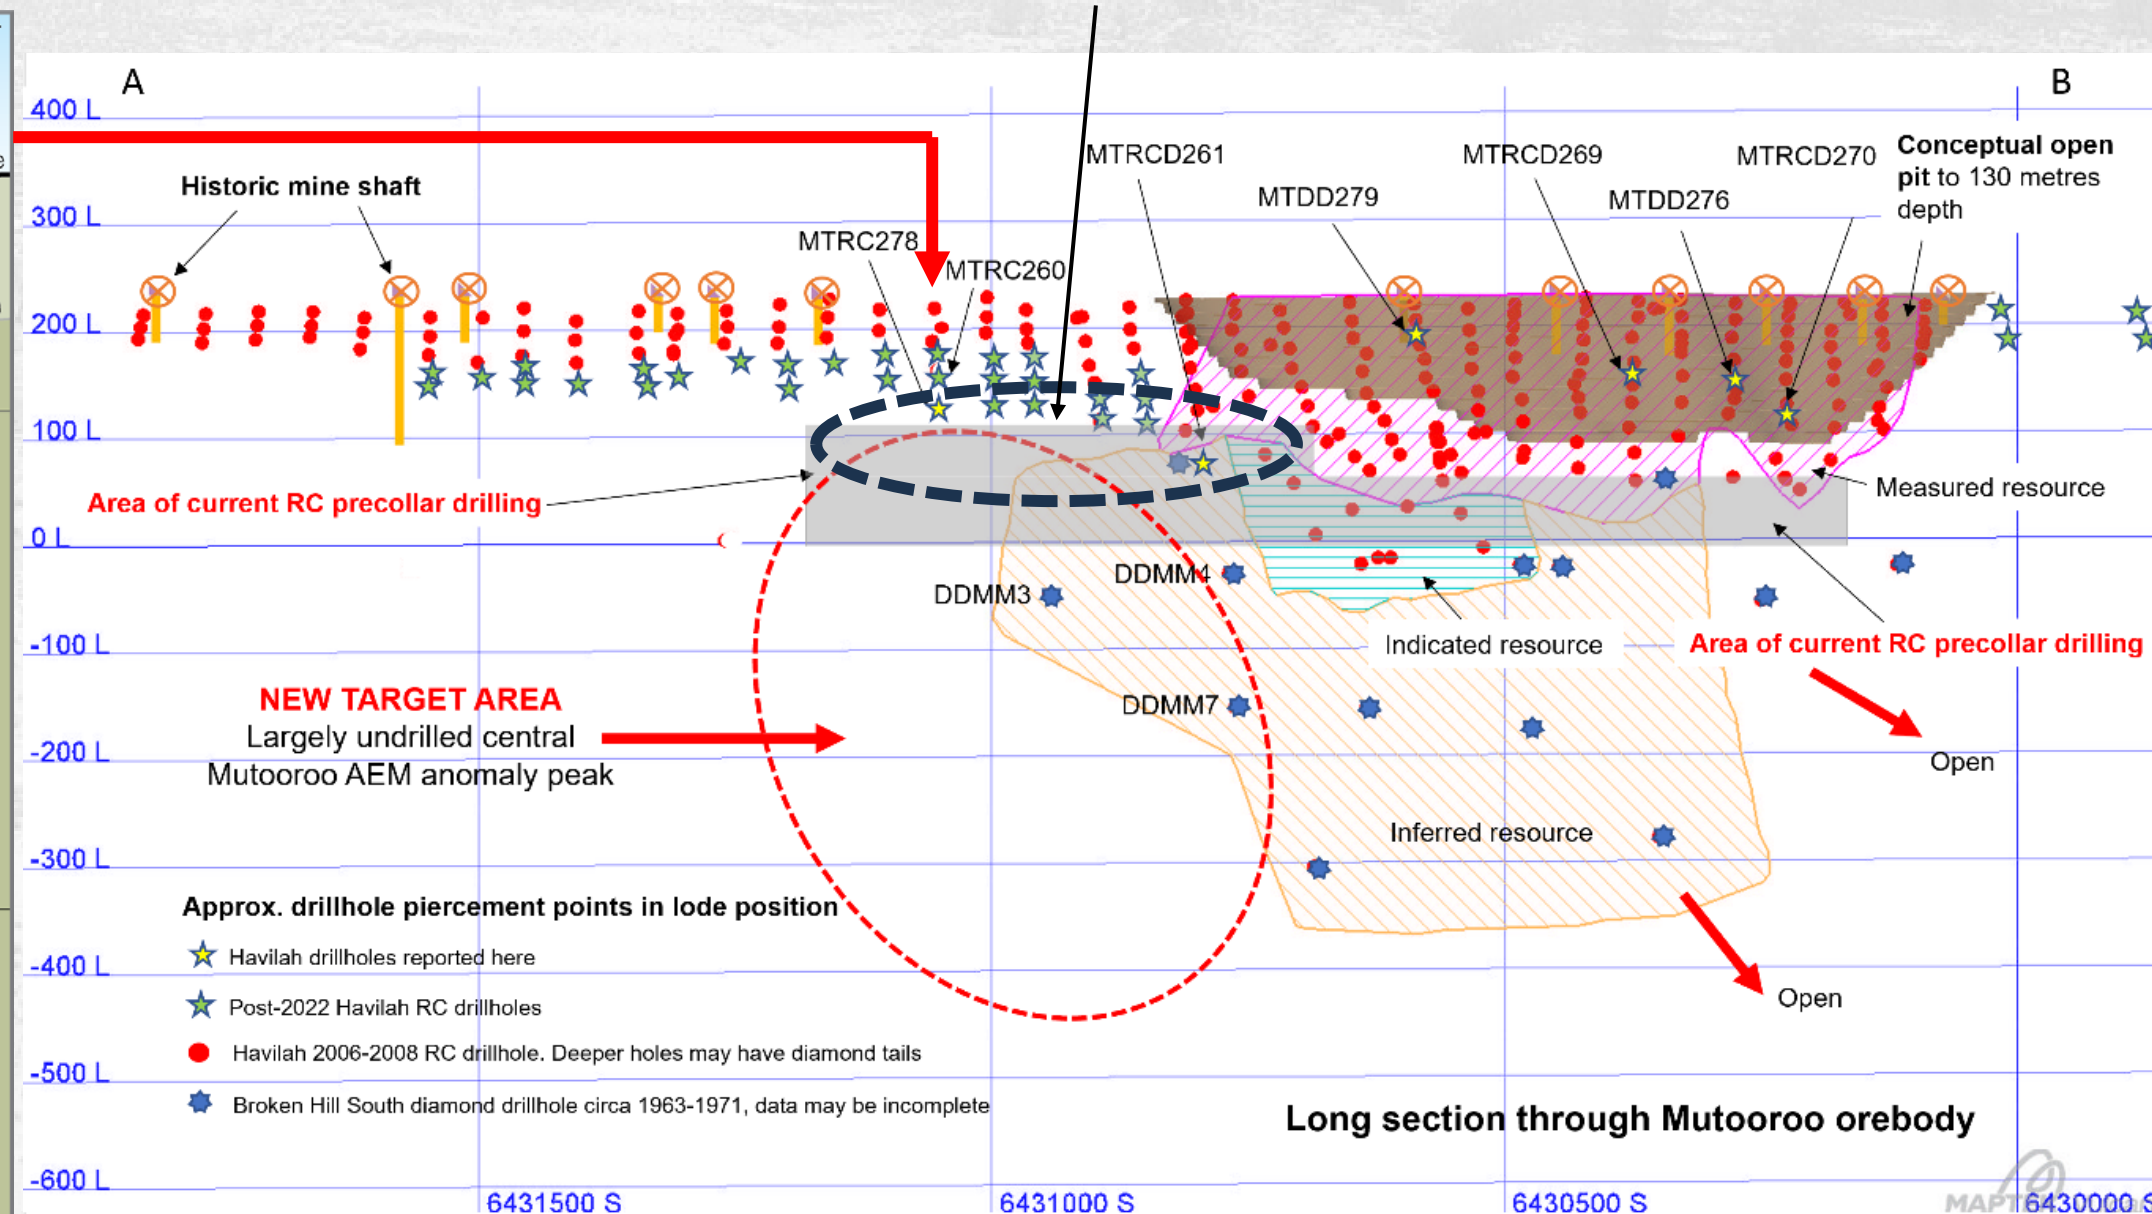

- A large Japanese non-ferrous metals enterprise whose operations encompass mining, smelting, refining, recycling, and manufacture of advanced materials.
- Own the 450,000 tpa capacity Saganoseki Smelter and Refinery.
- Sell refined copper, semiconductor materials and smelting byproducts including sulphuric acid, chemical products, precious and rare metals.
- Experienced in investing in copper mining operations in order to secure future sources of metal supply.

Mutooroo upside – why these ‘sections’ are important

- Initial drilling within the Mutooroo resource to obtain metallurgical samples, now completed and samples with lab in Brisbane.
- Subsequently, focused on drilling outside of the current resource at the northern end with the aim of expanding the shallow potentially open pittable ore.
- Encouraging thick intersections that are above the average Mutooroo resource grade ([ASX announcement 27 November 2024](#)).
- These intersections lie above an electromagnetic (AEM) conductive zone at depth that is largely untested, hence further upside.

Most recent drillholes in this area

Multiple exploration success in prospective terrain

Discovered eight large copper-gold-strategic metals mineralised systems that are within potential trucking distance of Kalkaroo

Crozers prospect ([ASX announcement 11 December 2024](#) and [7 January 2020](#))

- 20 metres of 0.54% Cu plus associated >1000 ppm Nd and W in skarn horizon.
- Abundant magnet REE, W and Be over > 4 km strike potential in multiple zones.

North Dome Closure prospect ([ASX announcement 27 May 2024](#))

- 30 metres of 0.21% Mo and 5 metres of 4.79 g/t Au in K2 unit and widespread low grade Cu, HREE, uranium.
- >12 km of untested prospective strike around the dome.

Eurinilla Dome prospect ([ASX announcement 8 March 2024](#))

- 32 metres of 1.96% Cu and 0.84 g/t Au including 8 metres of 6.38% Cu and 2.72 g/t Au in supergene zone.
- >20 km prospective strike around the dome.

Birksgate prospect ([ASX announcement 15 January 2024](#))

- 10.9 metres of 0.84% Cu, 0.64/g/t Au, 493 ppm Mo plus U and V in MMG-Havilah JV diamond drilling confirmed by HAV RC drilling more than 1.5 km to the east.
- Mineralised K3 unit target potentially covers an area of >8km² in a synclinal structure.

North Dome prospect ([ASX announcement 16 Nov. 2023](#))

- 54 metres of 0.27% Cu; 60 metres 0.56 g/t Au to end of hole in fault/quartz breccia zone.
- > 5 km untested strike of fault zone.

Homestead prospect ([ASX announcement 29 Aug. 2023](#))

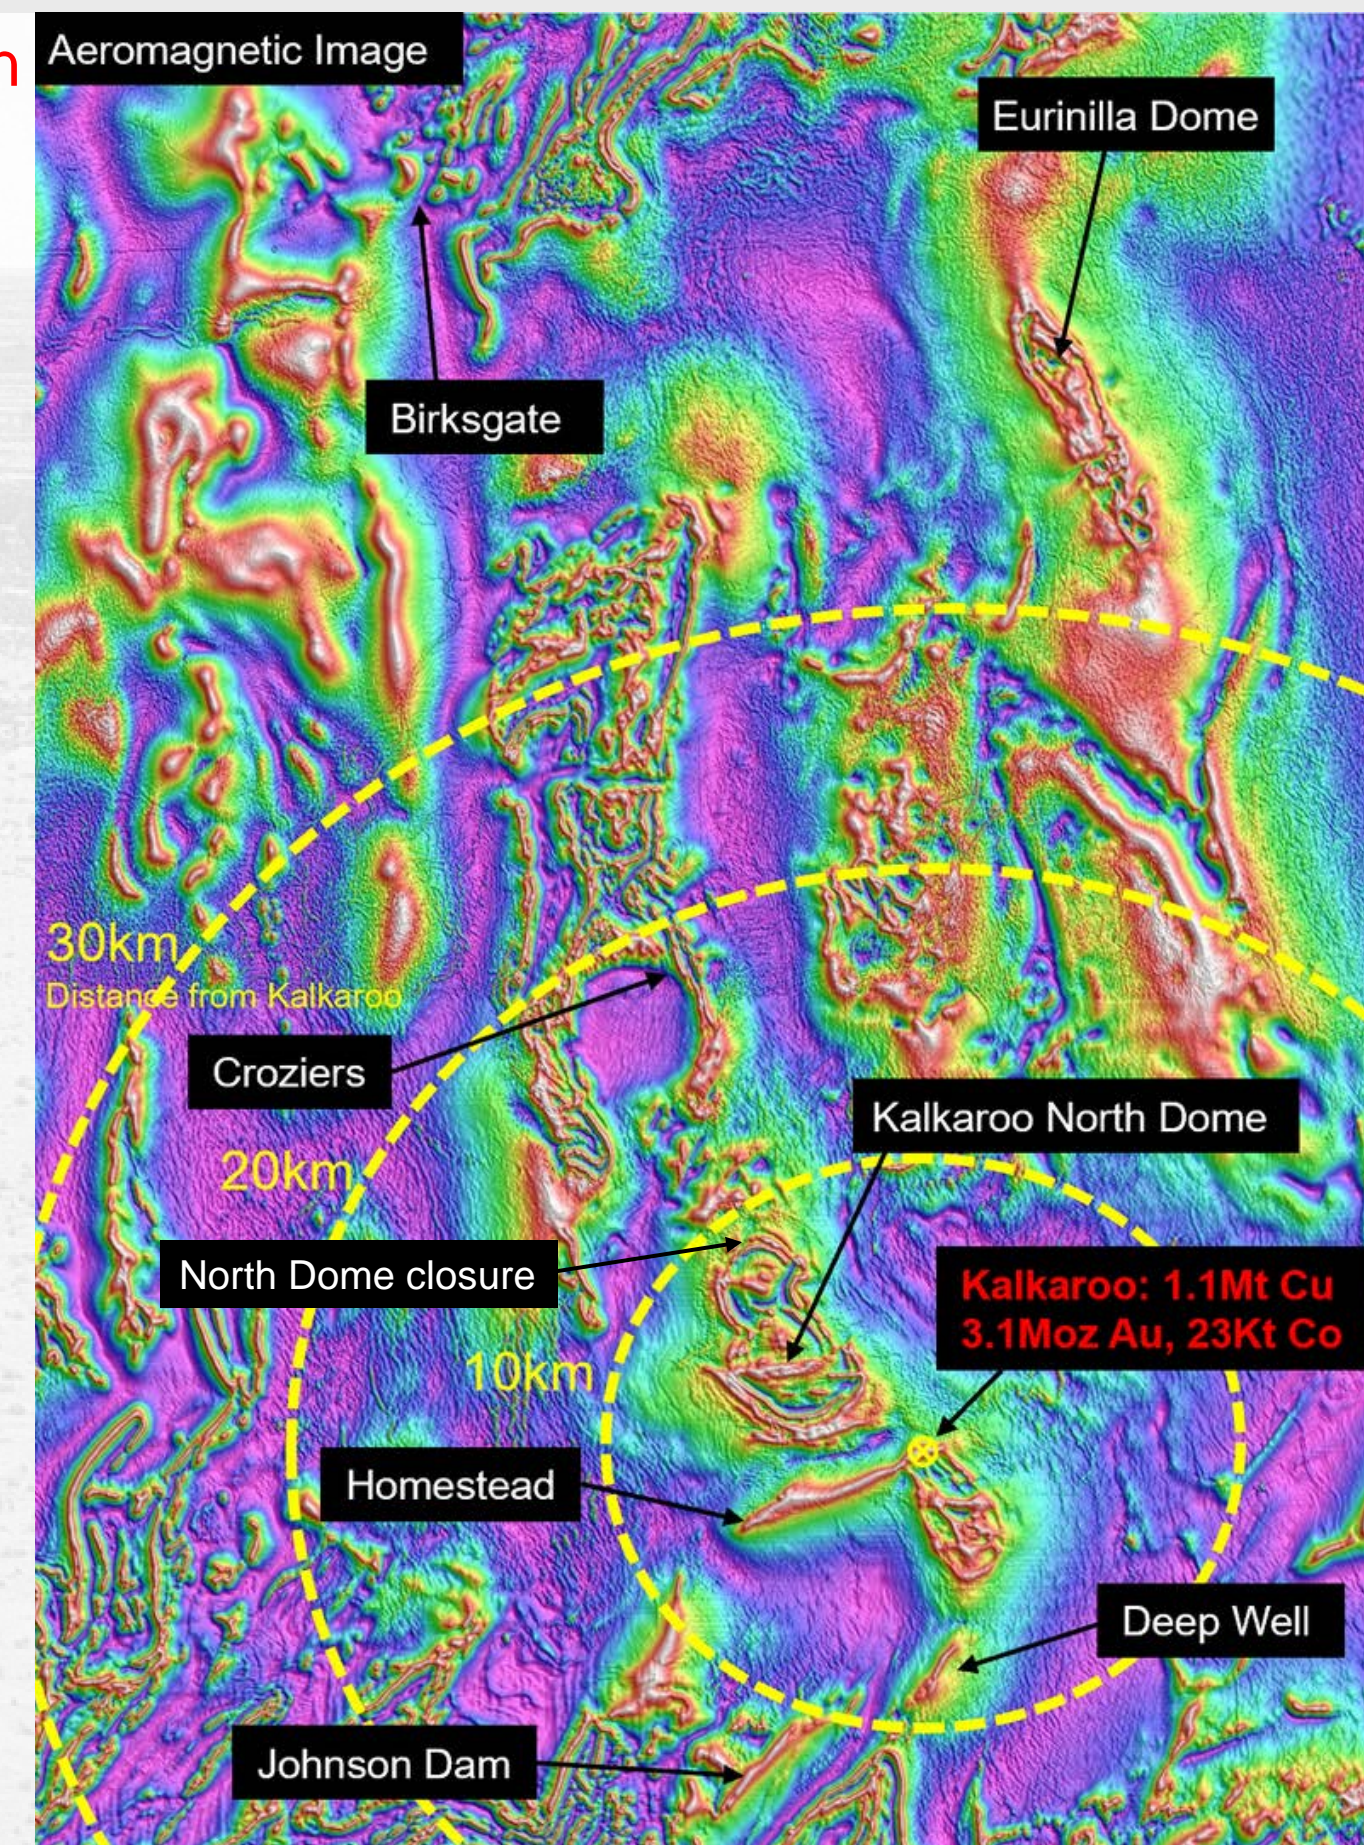

- 27 metres of 0.23% Cu, 3 metres of 5,530 ppm TREEO, 4 metres of 3.3 lbs/tonne U₃O₈ in extension of West Kalkaroo – faulted anticline. > 5 km untested strike of K2 unit.

Johnson Dam prospect ([ASX announcement 17 May 2023](#))

- 22 metres of 0.27% Cu, 15 metres 405 ppm Co, 22 metres of 3,533 ppm TREEO, 6 metres of 3.3 lbs/tonne U₃O₈ on eastern faulted anticlinal limb. > 3 km untested strike of K2 unit.

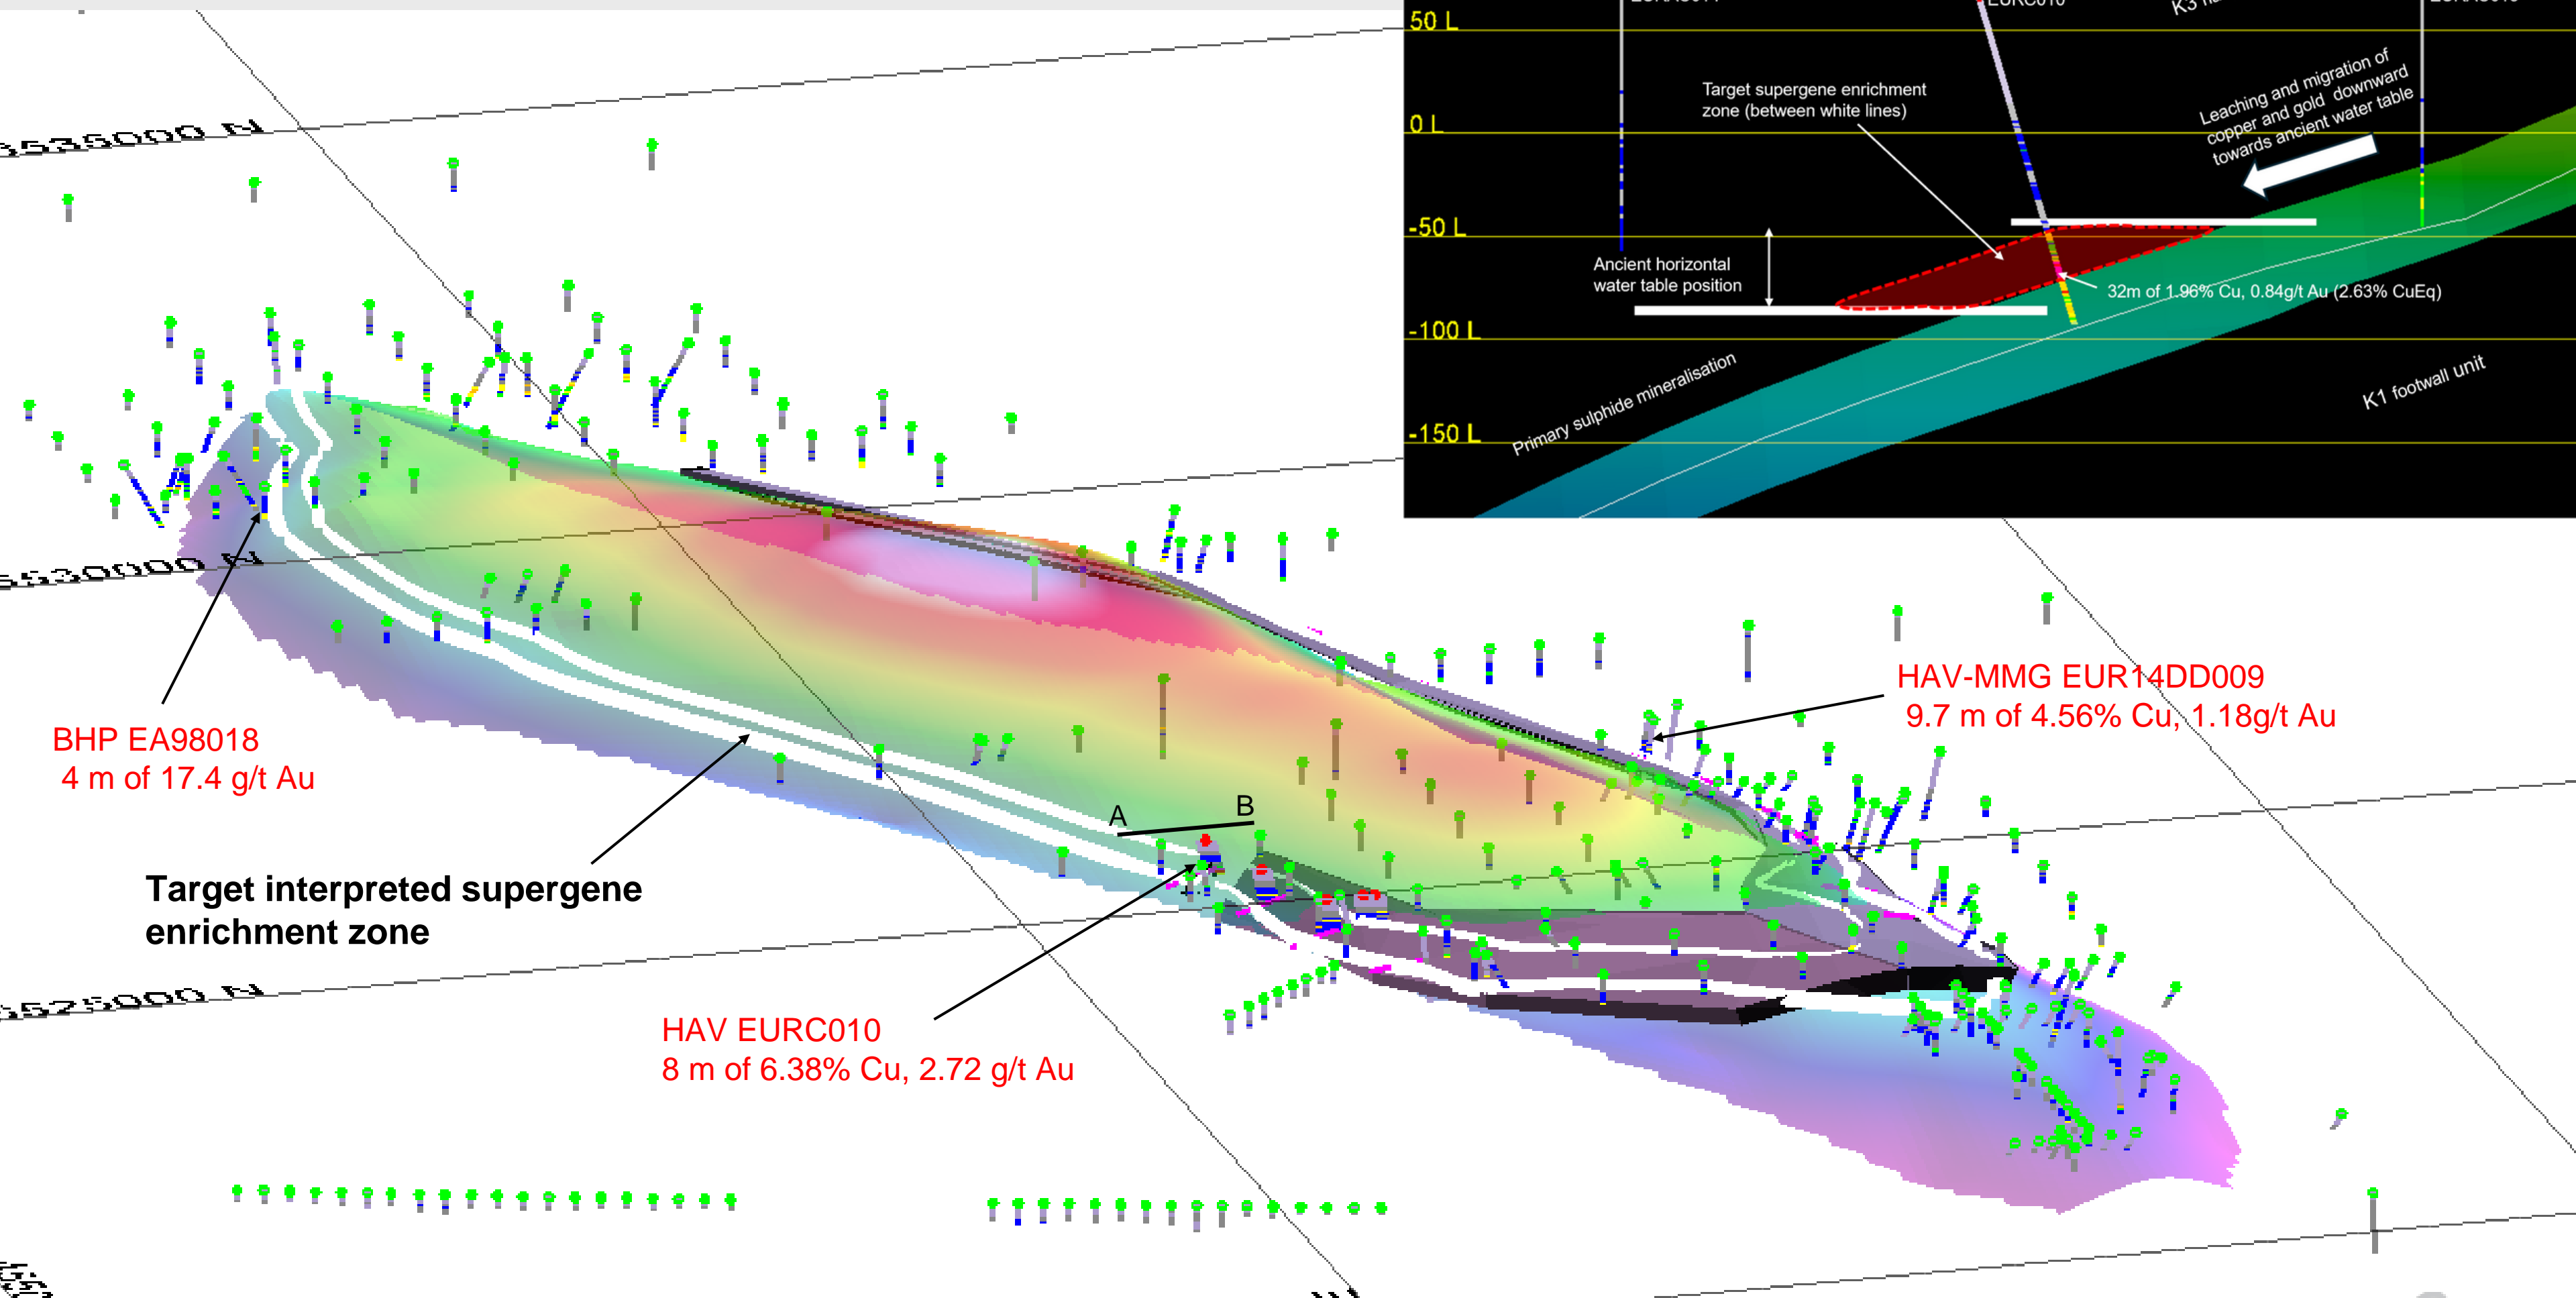

Deep Well prospect ([ASX announcement 9 May 2023](#))

- 19 metres of 0.42% Cu and 206 ppm Co in faulted anticlinal closure.
- > 4 km untested strike of prospective horizon (K2 unit) and fault zone.

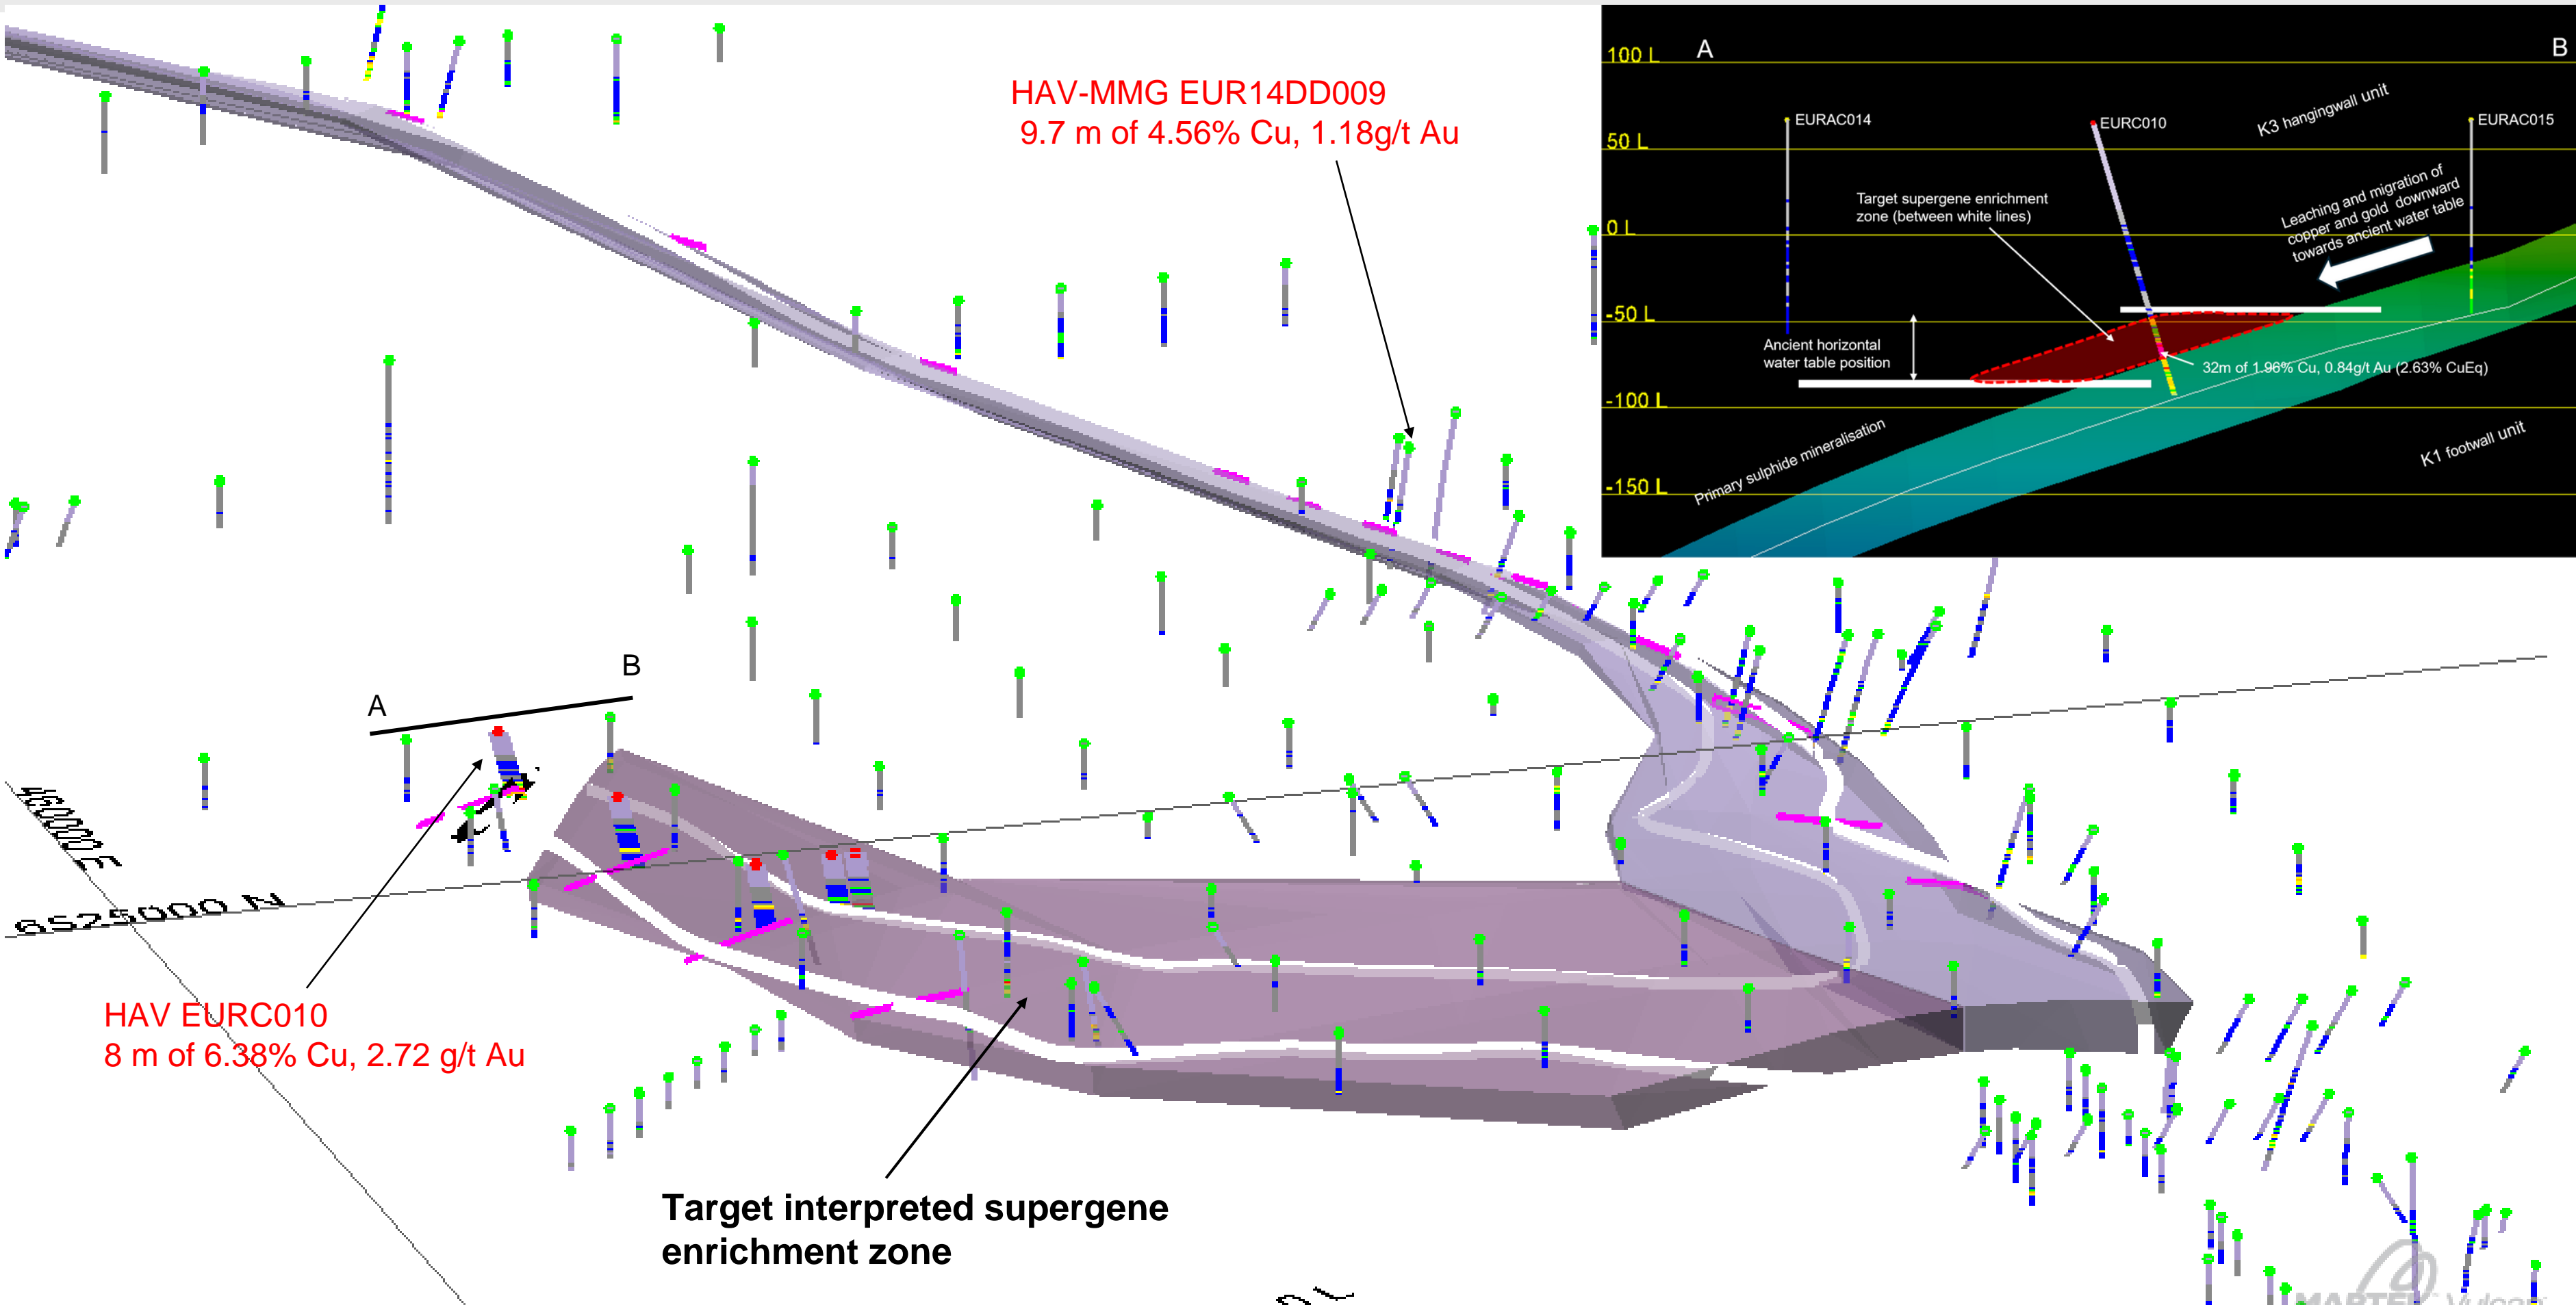

Eurinilla Dome prospect

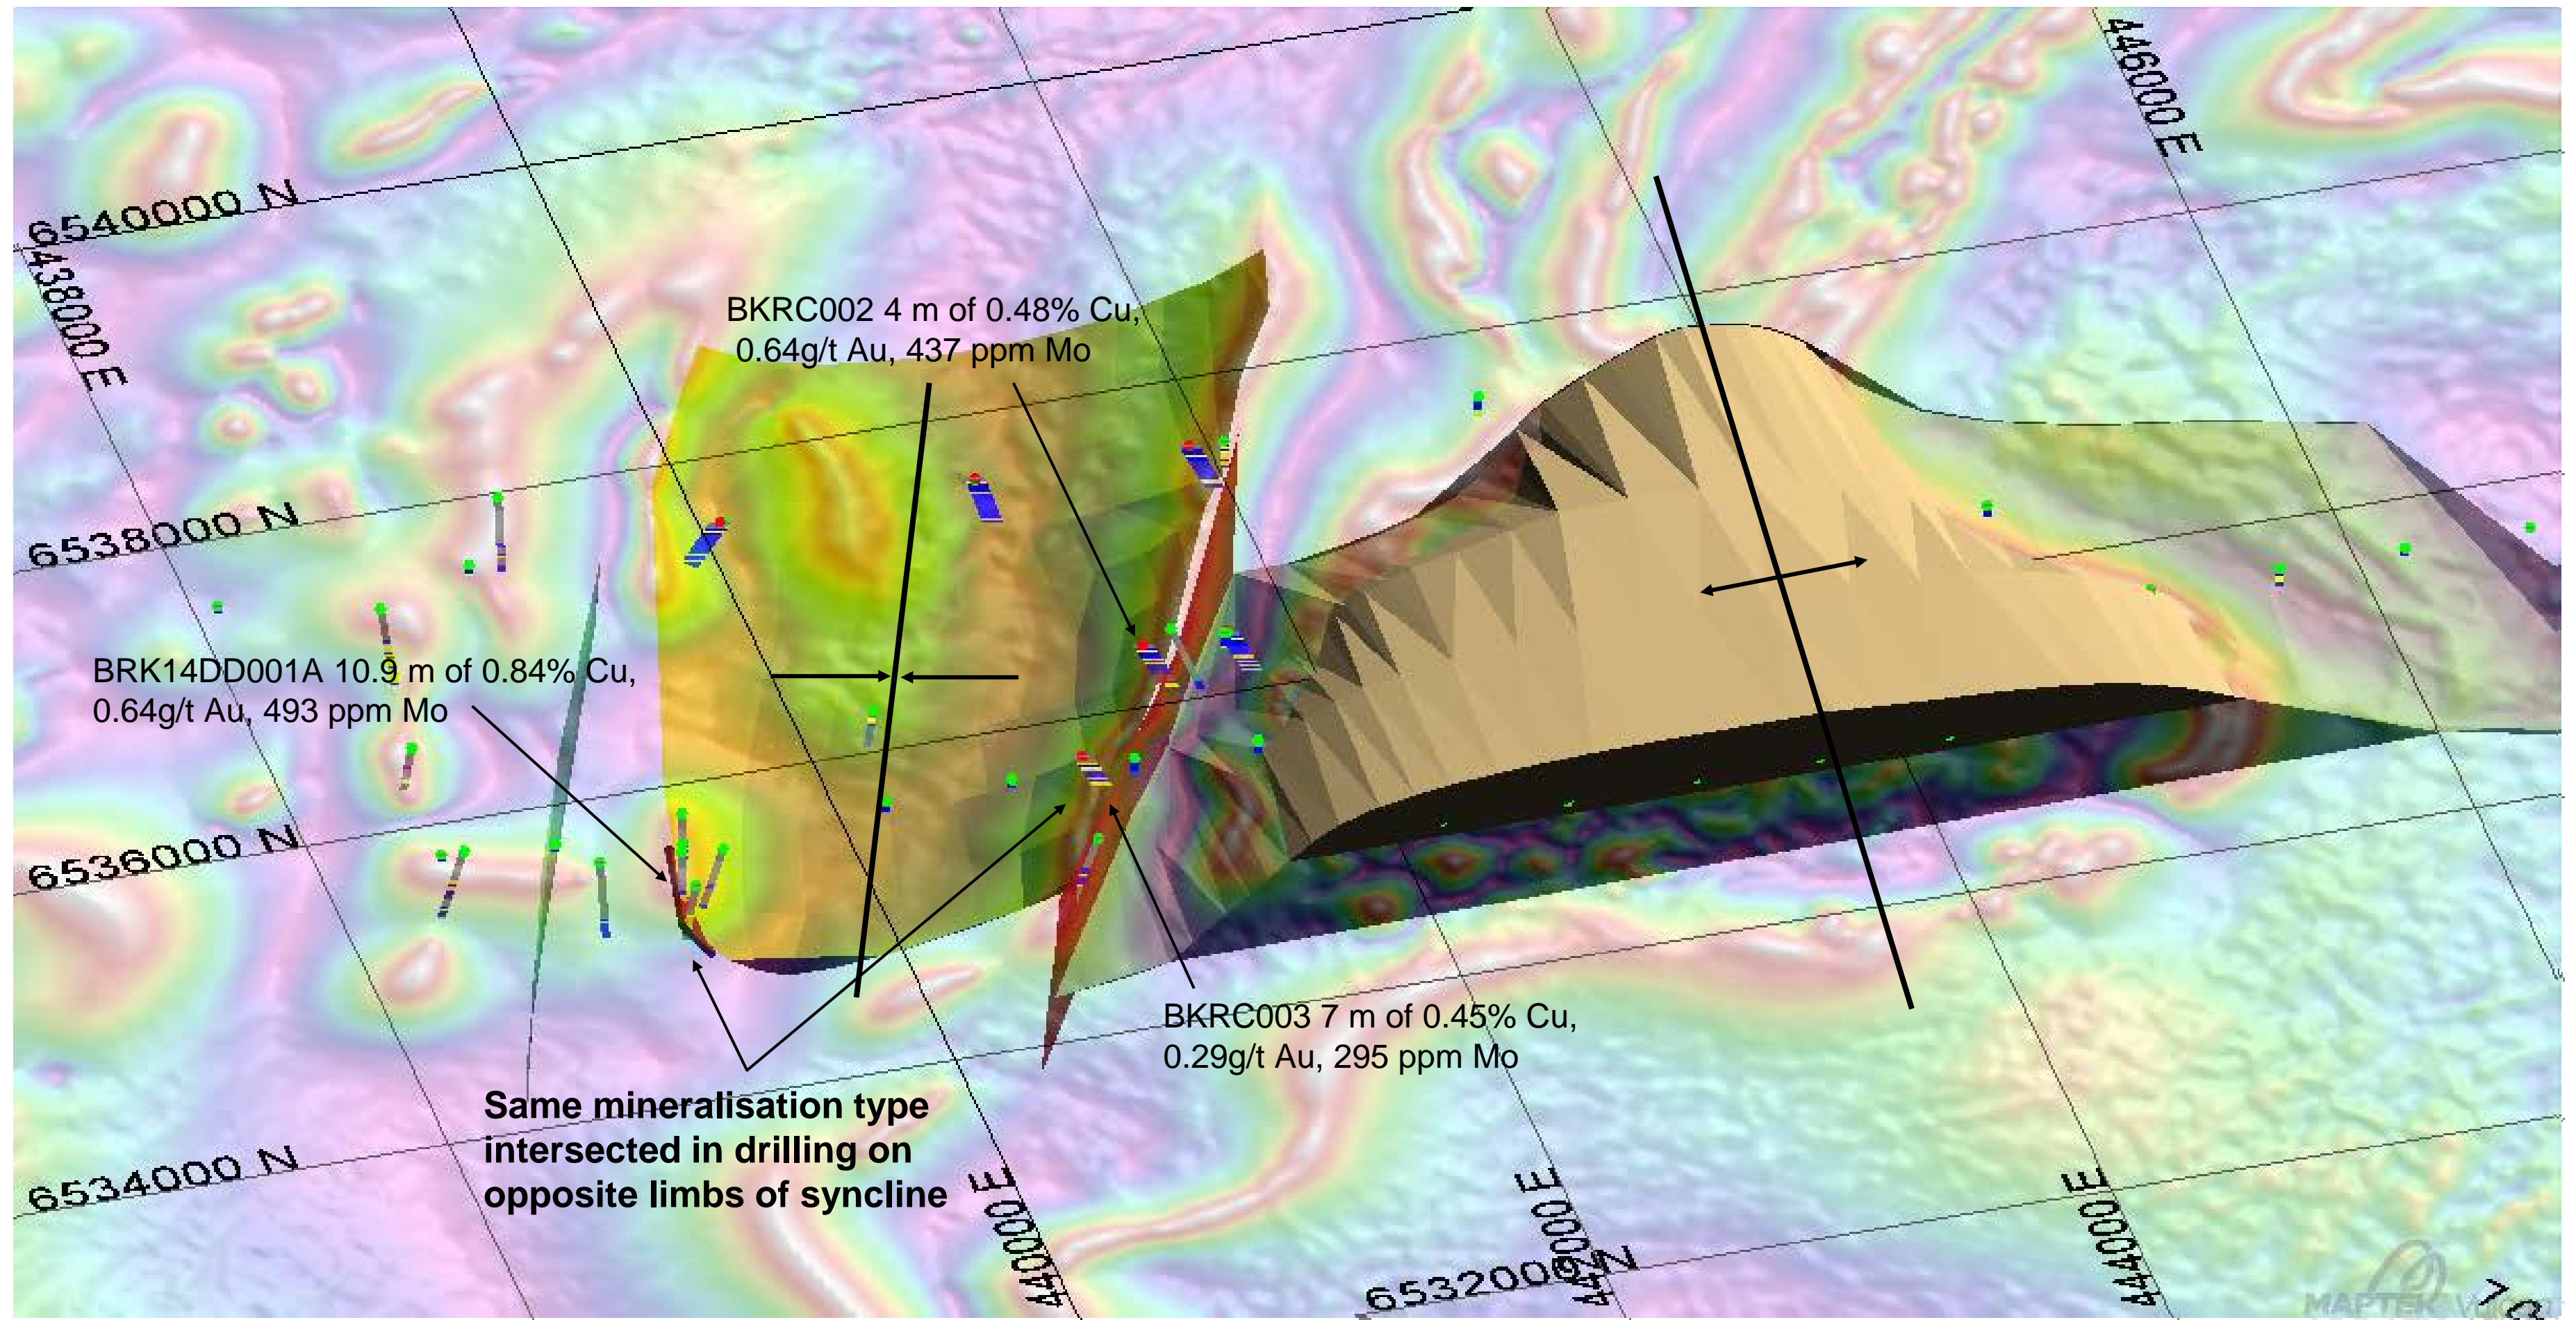

Eurinilla Dome exploration model

Eurinilla Dome - >20km strike length to explore

Birksgate prospect – a geological puzzle

Birksgate prospect – where to drill next?

- Havilah tenements cover a Tier 1 uranium province.
- To realise value from this non-core asset Havilah has entered earn-in agreements for a number of its promising uranium prospects to well managed and funded ASX listed junior companies in exchange for shares and options.
- **Koba Resources Limited (ASX: KOB)** has reported a series of encouraging drilling results from its drilling at and near the Oban deposit (most recently [ASX announcement 12 December 2024](#)).
- **Heavy Rare Earths Limited (ASX: HRE)** has reported highly elevated rare earth elements (up to 3.6% total rare earth oxides) and scandium (up to 1,081 scandium oxide) in uranium mineralised samples from Radium Hill ([refer to ASX announcement 30 October 2024](#)).
- In both cases Havilah retains a 20% free carried interest in any uranium discovery until completion of a feasibility study and substantial upside in the event of exploration success via its equity interests in both companies. The exploration expenditure incurred by KOB and HRE contributes towards Havilah's tenement expenditure commitments.
- Havilah retains full ownership of its promising Johnson Dam hard rock uranium opportunity south of Kalkaroo.

Cautionary Statement

The information contained in this presentation is not financial product advice and does not constitute an offer. The presentation is for information purposes and is of a general and summary nature only. Neither Havilah Resources Limited (Havilah) nor any member of the Havilah Group of companies, gives no warranties in relation to the statements and information in this presentation. Investors should seek appropriate advice on their own objectives, financial situation and needs.

It is not recommended that any person makes any investment decision in relation to Havilah or the Kalkaroo project based on this presentation. This presentation should be read in conjunction with the latest Annual Report together with any announcements made by Havilah in accordance with its continuous disclosure obligations arising under the Corporations Act 2001.

This presentation contains certain statements which may constitute 'forward-looking statements'. Such statements are only predictions and are subject to inherent risks and uncertainties which could cause actual values, performance or achievements to differ materially from those expressed, implied or projected in any forward-looking statements.

Havilah disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise. Investors are cautioned that forward-looking statements are not guarantees of future performance and investors are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty therein.

Where discovery upside is identified, this is a collective opinion of Havilah's geologists based on their best interpretations of the available data and their experience in the region. Further work may disprove any or all the interpretations and models put forward in this presentation.

Competent Person's Statement

The information in this presentation that relates to Exploration Results, Mineral Resources and Ore Reserves is based on data compiled by geologist Dr Chris Giles, a Competent Person who is a member of The Australian Institute of Geoscientists. Dr Giles is Technical Director of the Company, a full-time employee and is a substantial shareholder. Dr Giles has sufficient experience, which is relevant to the style of mineralisation and type of deposit and activities described herein to qualify as a Competent Person as defined in the 2012 Edition of 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Giles consents to the inclusion in the presentation of the matters based on his information in the form and context in which it appears.

Information for Ore Reserve & Mineral Resources complies with the JORC Code 2012. Information for the Kalkaroo Ore Reserve & Mineral Resource and the Mutooroo Inferred cobalt & gold Mineral Resources complies with the JORC Code 2012. All other information was prepared and first disclosed under the JORC Code 2004 and is presented on the basis that the information has not materially changed since it was last reported. Havilah confirms that all material assumptions and technical parameters underpinning the reserves and resources continue to apply and have not materially changed. Except where explicitly stated, this presentation contains references to prior exploration results and JORC Mineral Resources, which are cross-referenced to previous ASX announcements made by Havilah. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant ASX announcements.

JORC Ore Reserve and Mineral Resources 2024

JORC Mineral Resources as at 31 July 2024

Footnotes to the JORC Ore Reserve and Mineral Resource Tables

Numbers in tables are rounded. Ore Reserves are a subset of the Mineral Resources.

¹ Details released to ASX: [18 June 2018](#) (Kalkaroo)

² Details released to ASX: [18 October 2010](#) and [5 June 2020](#) (Mutooroo)

³ Details released to ASX [30 January 2018](#) & [7 March 2018](#) (Kalkaroo)

⁴ Note that the Kalkaroo cobalt Inferred resource is not added to the total tonnage

⁵ Details released to ASX: [10 June 2011](#) applying an 18% Fe cut-off (Maldorky)

⁶ Details released to ASX: [5 December 2012](#) applying an 18% Fe cut-off (Grants)

Slide 4 - references to asset sales

1. **Rex Minerals Limited, Hillside Project** – refer to ASX announcements of [8 July 2024](#) and [18 July 2024](#).
2. **Copper Mountain Mining Corporation, Eva Project** – refer to ASX announcement of [6 October 2022](#). Note that Eva copper-gold project sold for US\$230 million, which equates to A\$343 million at A\$:US\$ 0.67 conversion rate.
3. **RioTinto Limited, Winu Project** – refer to ASX announcement of [4 December 2024](#). A Term Sheet has been signed and exclusive negotiations commenced regarding Sumitomo Metal Mining Co.,Ltd 's potential acquisition of a 30% interest in the Winu copper-gold project for an upfront cash payment of US\$195 million (A\$300 million) and a deferred consideration of US\$204 million (A\$314 million) contingent on milestones and adjustments to be agreed (using A\$:US\$ 0.65 conversion rate).

Slide 5 – references to JORC Mineral Resources and Ore Reserves and other information relating to the copper-gold deposits

1. **Rex Minerals Limited, Hillside Project**, [Annual Report 2024](#).
2. **Copper Mountain Mining Corporation, Eva Project**, [Annual Report 2022](#) (page 30), for resource estimate prior to acquisition by Harmony Gold.
3. **RioTinto Limited, Winu Project**, [supporting information and Table 1 checklists](#) (from page 32) and ASX announcement of [4 December 2024](#) (footnote 1). Note that the indicative starter pit outline was extrapolated by Havilah from RioTinto's published plans and sections and is approximate only. It is plotted for comparison purposes to show the considerably greater starter pit mining depth at Winu and highlighting the potential upside for Havilah's current Kalkaroo PFS open pit.
4. **Havilah Resources Limited, Kalkaroo Project**, refer to JORC tables and footnotes, slide 16.
