Chairman's address

FY24 marks NSR's tenth full year of operations post listing on the Australian Stock Exchange in December 2013. Since then we have grown from a modest 62 centres and market capitalisation of \$268 million, to over 250 centres with a market capitalisation approaching \$3.5 billion today. Our total assets are valued at in excess of \$5 billion, and total returns to securityholders sit at more than 300% over this period. This includes a compound annual growth rate for both our underlying earnings and total revenue of over 20% p.a. over the last 10 years, making us one of the best and most consistently performing A-REITs over this period.

Our FY24 earnings have demonstrated both the resilience and embedded capacity for growth of NSR's business, increasing by 9% this year to \$154 million, with record total revenue of \$355 million. NSR's NTA increased by 4 cents to \$2.52 as the value of NSR's portfolio rose by 11% to \$4.7 billion, with valuation uplift again driven predominantly by improved operational performance and an unchanged weighted average portfolio capitalisation rate of 5.91% across our property portfolio.

NSR achieving these results in such a challenging economic environment is a testament to both the strength of our business, and the relentless pursuit of excellence by our hardworking team of over 650 dedicated people. Underpinning this performance outcome has been NSR's ability to drive growth in both the average rate achieved across its centres (up 7% to \$339) and REVPAM (up 3.1% to \$275). Pleasingly, this REVPAM growth was predominantly achieved through H2 of FY24 (up 5.1% over this period on an annualised basis). Our total built capacity has increased significantly in FY24 to almost 1.4 million square metres of lettable area – an increase of over 9% in this financial year alone. This increase has been achieved through a combination of ongoing acquisition and development activity, with 12 existing centre acquisitions accounting for approximately 50,000 square metres of lettable area, and the completion of 11 new developments comprising 73,000 square metres of additional lettable area. Importantly NSR is well positioned to continue this growth trajectory into FY25 and beyond.

As at 30 June 2024, our short-term development pipeline comprises of 222,000 square metres of lettable area across 28 projects, either development application approved or already under construction. Our **total** development pipeline stands at an impressive 46 projects comprising of over 382,000 square metres of lettable area, including those projects currently under construction, projects with development approvals, and new projects in the concept design and planning phases. The importance of this acquisition and development pipeline cannot be overstated. These new acquisitions and developments, combined with strong organic growth from our existing portfolio have underpinned our growth in earnings in the past and will continue to support our growth well into the future.

FY24 also marked a number of other milestones, with NSR entering into two significant capital partnership and development arrangements. The first with MAAS Group (ASX: MGH) will enable NSR to strengthen its coverage through important growth areas across NSW and the ACT.

The second being the new GIC-NSR Ventures Fund (Fund) has been established to pursue the development and operation of new self-storage centres in Australia in a cost effective and capital efficient fashion. NSR will hold an approximate 25% interest in the Fund, while GIC will hold the remaining 75%. The JV has identified 10 foundation assets which have been either recently completed or are currently under construction by NSR and these assets are now owned by the Fund. The Fund plans to deploy an initial amount of \$270 million and the parties have agreed to work together to identify future potential opportunities. The Fund will assist NSR in expediting its development activities in a capital efficient fashion and will enable NSR to recycle capital currently employed in these developments into new acquisition and development activities. The fund has successfully received all necessary approvals and was settled on 1 October 2024.

NSR's focus on capital management is one of the keys to the company's success with gearing at 30 June 2024 at a prudent 26.6% with an ICR of 3.2 times. Capital repatriated from the settlement of the Fund has further strengthened NSR's balance sheet. During the course

of FY24 NSR has again extended and improved the headroom, scope and tenor of its debt facilities. NSR has increased its total debt facilities to \$1.84 billion with \$450 million of FY25 debt maturities extended. NSR now has an average debt term to maturity of 3.3 years while having increased its proportion of debt hedged from 37% in June 2023 to 43% in June 2024. NSR has approximately \$1 billion of headroom before it reaches the upper end of its targeted gearing range. As a result, NSR's capital management strategy remains conservative, and the company is very well positioned to execute its strategic growth initiatives from an ongoing acquisition and development perspective.

Our Four Pillars of Growth Strategy include the following core principles:

- Organic Growth - Optimise occupancy and rate growth on an individual centre basis combined with prudent cost management;
- Acquisitions, Developments and Expansions - Centralised acquisition and development team with a diversified delivery pipeline to expedite and simplify the project delivery process and maximise returns;
- Technology and Automation – Leadership in development and implementation of innovative technology and automation; and
- Sustainability - Instilling trust and confidence that we are building a resilient and sustainable business for our stakeholders.

NSR enters FY25 as the self-storage industry leader in the provision of innovative storage solutions throughout Australia and New Zealand. Our development and acquisition capabilities are best of class and unrivalled in this region and we have adopted world's best practice in utilising sustainable and efficient construction methodologies. We are well positioned to both consolidate our existing business through the relentless pursuit of excellence in our systems and processes, and to accelerate our growth through our unrivalled pipeline of new development and acquisition opportunities. Our new capital partnerships will underpin the acceleration and implementation of our growth strategies.

NSR's operational platform is highly scalable and significantly advantaged by being the largest owner operated, fully internally managed, storage-specific REIT in the southern hemisphere with a portfolio of 260 centres across Australia and New Zealand. Our core focus remains to grow and improve our business in order to maximise the return to securityholders'.

As always, we remain deeply indebted to and sincerely grateful for the support of all NSR's stakeholders including our securityholders, our hardworking team members, Executive and Board, as well as of course, our customers without whom we would not have a business.
