

LINDIAN

RESOURCES LTD.

Becoming a globally significant critical minerals producer.

Alwyn Vorster, Chief Executive Officer
AGM CEO PRESENTATION
26 November 2024

ASX: LIN

Disclaimer

The material in this presentation has been prepared by Lindian Resources Limited ("Company").

This presentation may not be reproduced, redistributed or passed on, directly or indirectly, to any other person, or published, in whole or in part, for any purpose without prior written approval of the Company. This presentation and the material contained in it is for information purposes only. This presentation is not an offer or invitation for subscription or purchase of, or a recommendation in relation to, securities in the Company and neither this presentation nor anything contained in it shall form the basis of any contract or commitment.

This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their jurisdiction.

Failure to do so may result in a violation of rules in such a jurisdiction. This presentation is not financial product or investment advice. It does not consider the investment objectives, financial situation and particular needs of any investor. Before making an investment in the Company, an investor or prospective investor should consider whether such an investment is appropriate to their particular investment needs, objectives and financial circumstances, seek legal and taxation advice as appropriate and consult a financial adviser if necessary.

This presentation may contain forward-looking statements. Forward-looking statements include those containing such words as "anticipate", "estimates", "forecasts", "should", "could", "may", "ideal", "intends", "will", "expects", "plans" or similar expressions. Such forward looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, its directors and management that could cause the Company's actual results to differ materially from the results expressed or anticipated in these statements. The Company cannot and does not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur, and investors are cautioned not to place undue reliance on these forward-looking statements. The Company does not undertake to update or revise forward-looking statements or to publish prospective financial information in the future, regardless of whether new information, future events or any other factors affect the information contained in this presentation, except where required by applicable law or the ASX Listing Rules. It is believed that the expectations reflected in these statements are reasonable, but they may be affected by a range of variables and changes in underlying assumptions which could cause actual results or trends to differ materially. The Company does not make any representation or warranty as to the accuracy of such statements or assumptions.

This presentation has been prepared by the Company based on information currently available to it. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of the Company or its subsidiaries or affiliates or the directors, employees, agents, representatives or advisers of any such party, nor any other person accepts any liability for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it, including without limitation, any liability arising from fault or negligence on the part of the Company or its subsidiaries or affiliates or the directors, employees, agents, representatives or advisers of any such party. This presentation was authorised for release by the Board of Lindian Resources Limited.

Corporate Overview

Company ASX Code	LIN
Share Price ¹	A\$0.105

KANGANKUNDE RARE EARTHS PROJECT

Rare Earths Value Chain

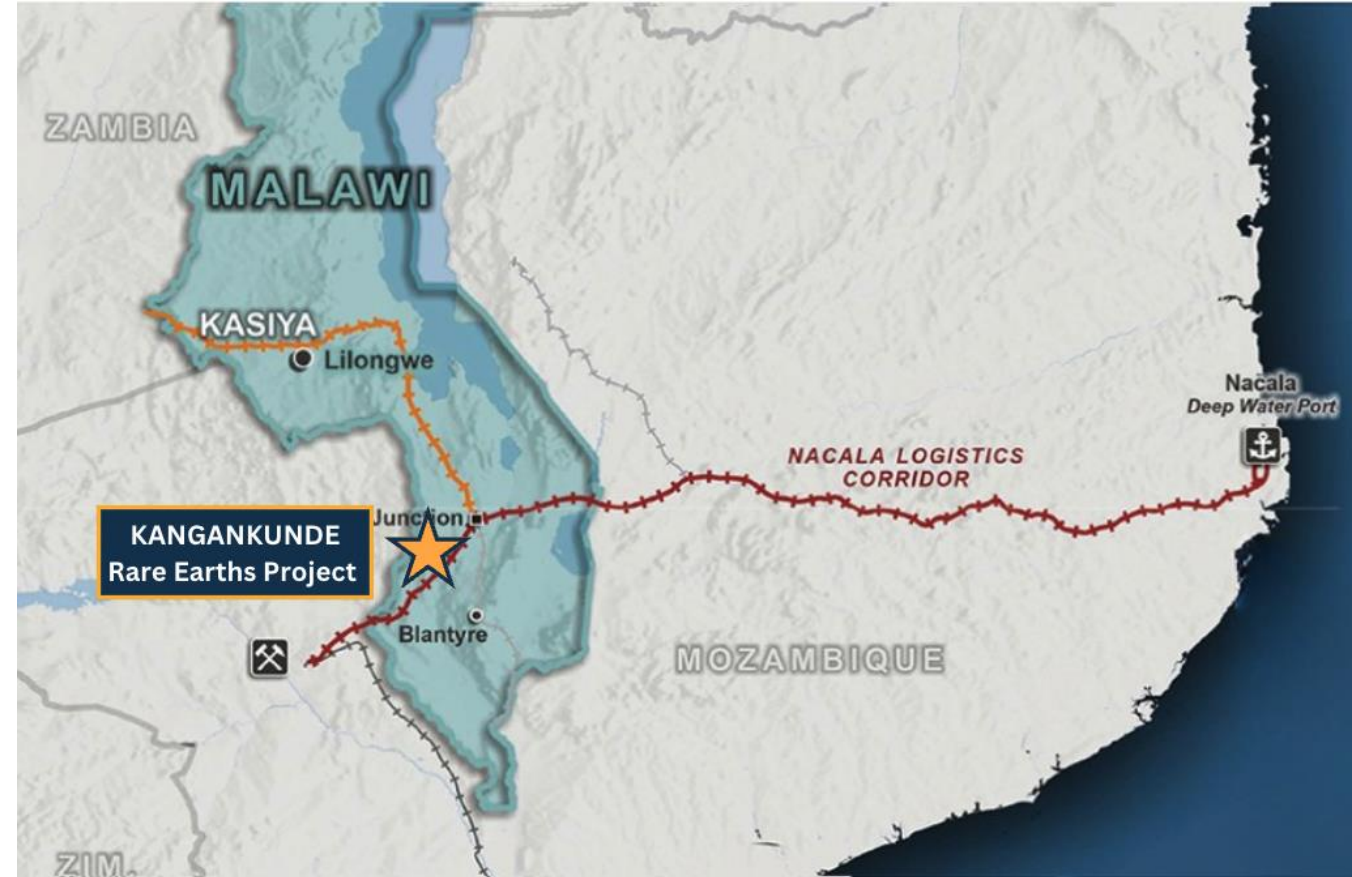

Lindian can be a significant player across multiple stages of the REE value chain over time

¹Lindian is yet to complete technical or economic studies to support moving to Stage 2 or 3. Both these are therefore currently only aspirational and will need to be tested through studies, approvals, market demand and funding.

Kangankunde - Location & background

- Malawi is a stable jurisdiction with English Law & a democratically elected government
- Kangankunde – proximity to Blantyre & Balaka
- Current Lindian ownership of RVR is 67% with final US\$10M tranche (for 100%) due by first commercial production¹

1.ASX announcement – 01 August 2022 “Lindian to Acquire 100% of Kangankunde Rare Earths Project”

Kangankunde Stage 1 – Production Summary

- Drill, blast, load, haul model
- ~520,000 tpa ore mined¹
- Very low 0.2 : 1 waste/ore ratio
- Conventional mining equipment
- Mined ore transported 2km downhill to ROM stockpile
- ~450,000 tpa plant feed at ~3% REO
- Unique mineralogy allowing gravity and magnetic separation
- 15,200 tpa concentrate produced (containing 8,200 tpa rare earth oxides (REO) and 1,600 tpa NdPr)

Feasibility Study - Financial Evaluation

~US\$40M^{2,3}

Lowest Capex among peers

US\$2.92/kg REO^{2,3} (FOB)

Opex in lowest cost quartile

US\$794M (A\$1,189M)^{1,3}

Pre-tax real NPV

99%^{1,3}

Pre-tax real IRR

Profitable at current low prices³

	Unit	Spot Price	Years 1-5 (average)	LOM (average)
Average Price	US\$/kg NdPr	58	82	109
EBITDA	US\$M	24	57	83

1. Based on Project Blue rare earth pricing forecasts. Bloomberg 26 June 2024 AUD:USD exchange rate 0.6676
2. Capex and Opex based primarily on actual tender pricing, also supported by requests for proposals and industry benchmarks
3. ASX announcement - 01 July 2024 "Outstanding Kangankunde Stage 1 Feasibility Study Results"

Community & Permitting

Lindian Resources is committed to contributing to Malawi's economic growth through its planned Kangankunde mining operations to promote sustainable practices in the mining industry.

Fully Permitted

- Environmental and Mining Licence granted
- Water licence granted¹
- Permitted to commence construction and operations

Government Engagement

- Strong relationships with central and local governments
- Resettlement process strongly supported and managed by government
- Country Manager and Manager Community & Government Relations appointed

Community

- Long standing relationships with local leaders and community
- Community investment – Inc. local school, police unit, roads
- Community Engagement Plan agreed²

1.ASX announcement - 02 April 2024 "Water Permit for Kangankunde received"

2.ASX announcement - 09 July 2023 "Corporate Presentation"

2024 Key Milestones - Rare Earths

Positioned Kangankunde Rare Earths Project as a Tier 1 globally significant, low-capex, rare-earth deposit with Significant Stage 2 expansion potential

- Q3 2023 - Maiden Mineral Resource¹
- Q2 2024 - Community Engagement Plan²
- Q2 2024 - Water Licence³
- Q3 2024 - Maiden Ore Reserves⁴
- Q3 2024 - Feasibility Study⁴

1. ASX announcement – 03 August 2023 “Maiden Mineral Resource Estimate 261MT at 2.19% TREO average

2. ASX announcement - 09 July 2023 “Corporate Presentation”

3. ASX announcement - 02 April 2024 “Water Permit for Kangankunde received”

4. ASX announcement - 01 July 2024 “Outstanding Kangankunde Stage 1 Feasibility Study Results”

Current Activities

- **Funding**
 - Stage 1
 - Stage 2
- **Offtake agreements**
- **Contracts**
 - Design & Construction (D&C) contract¹
 - Metallurgical Drilling & Flowsheet optimisation
 - Civil contract
 - Power contract
- **Site support infrastructure development**
- **Owners Team**
 - Site accommodation
 - Team recruitment & work permits

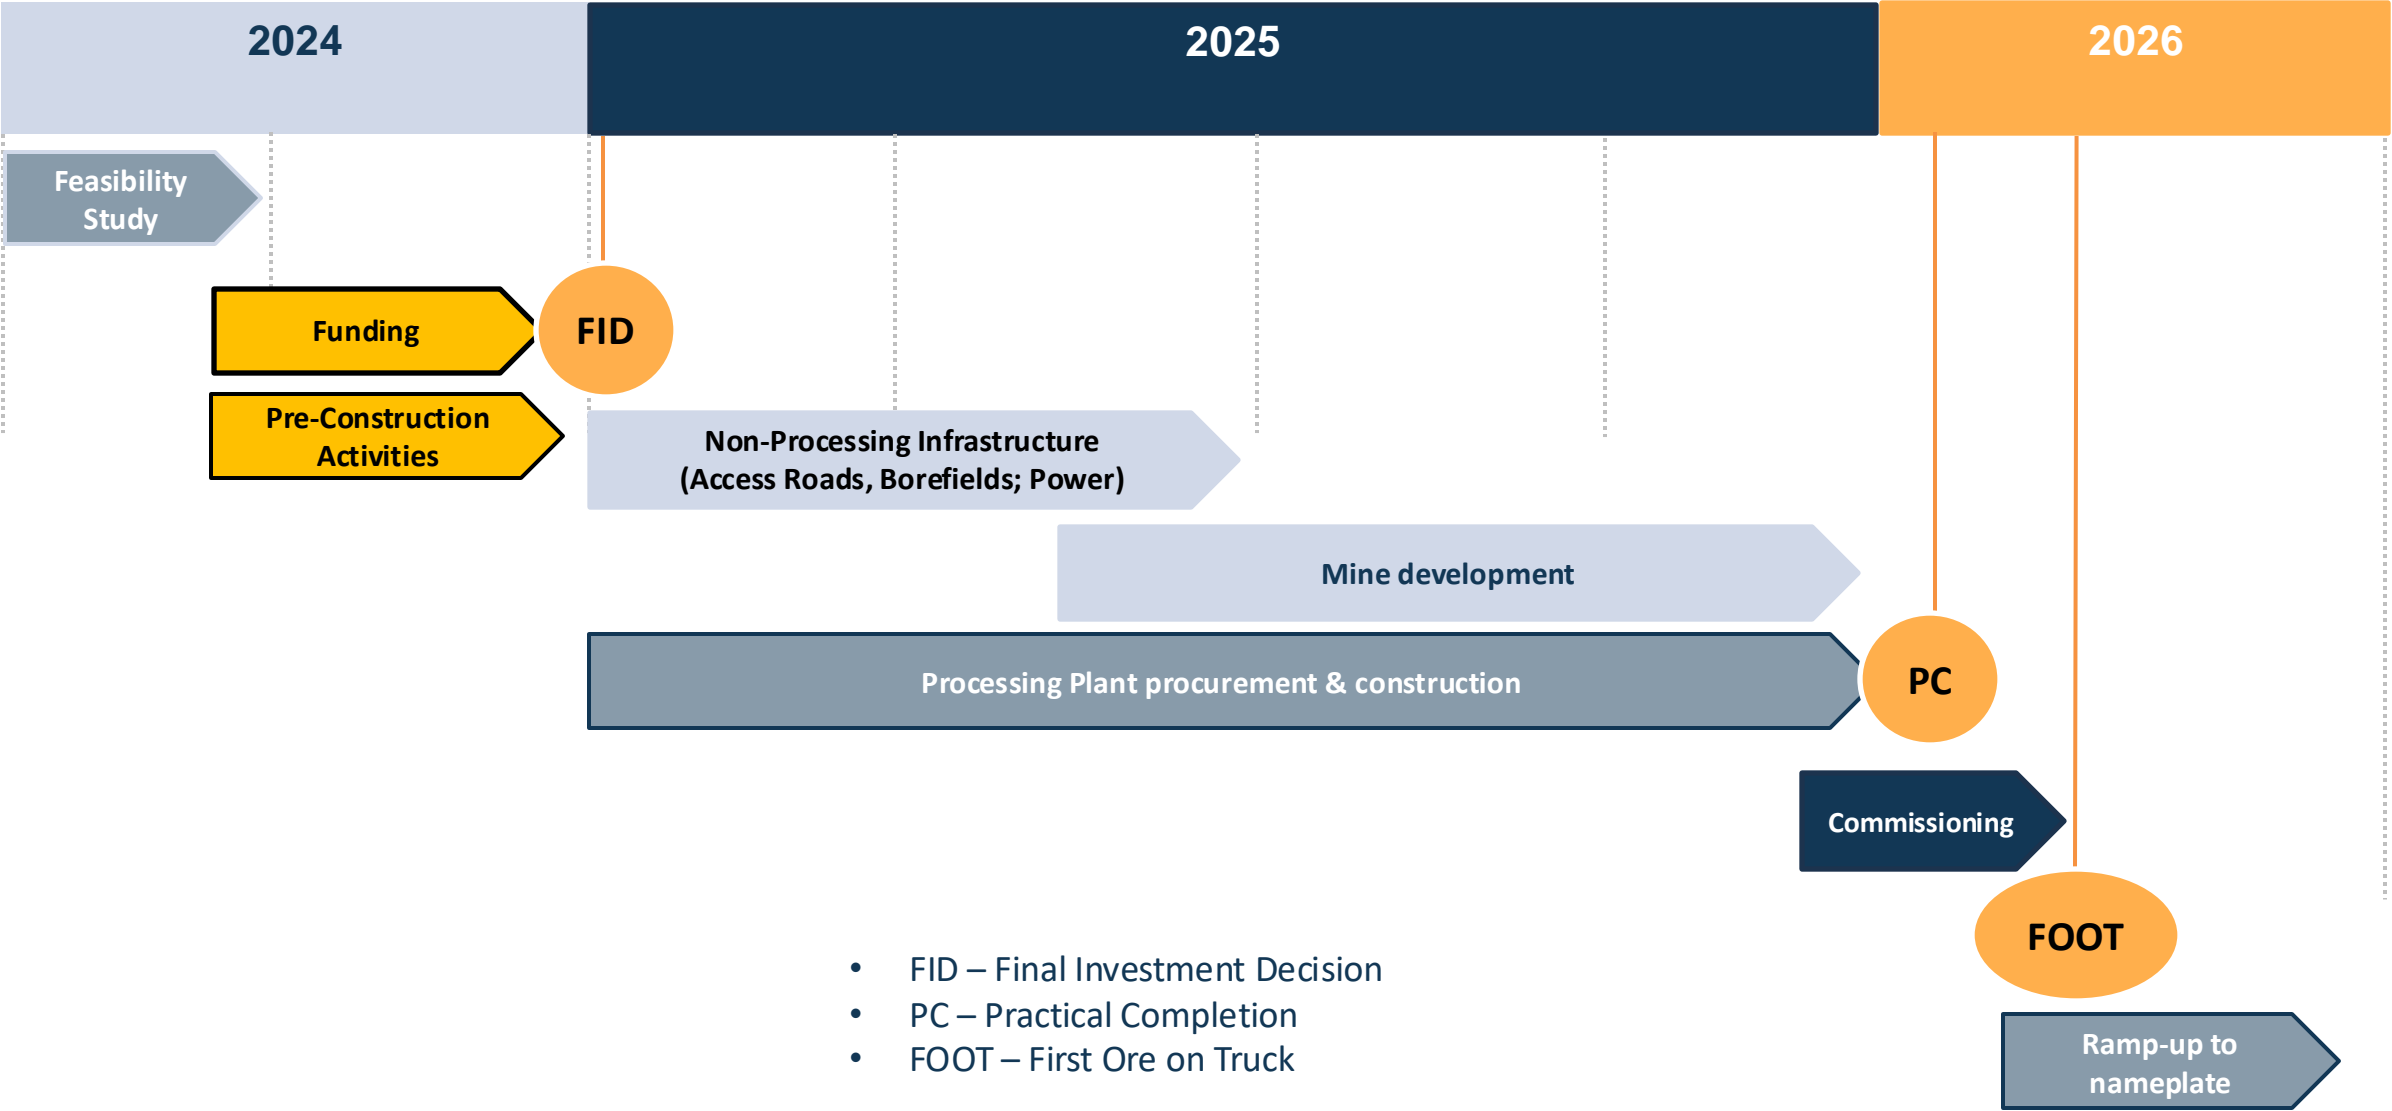

1. ASX announcement - 09 October 2024 ASX Announcement "Kangankunde Project Update"
2. ASX announcement - 01 July 2024 "Outstanding Kangankunde Stage 1 Feasibility Study Results"

2025 Kangankunde Objectives

1. Finalise funding solutions for Stage 1
2. Finalise ownership of Rift Valley Resources
3. Mining lease expansion & extension
4. Advance plant construction and mine development
5. Commence Stage 2 studies and funding discussions

Indicative Project Timeline

BAUXITE PROJECTS

2024 Key Milestones - Bauxite

- 10-year sublease & royalty agreements secured for Woula Bauxite¹
- Ongoing development &/or monetisation discussions for Lelouma & Gaoual

1. ASX announcement - 11 November 2024 "10-year Lease and Royalty Agreement on Woula Bauxite Project"

Rare Earths: Kangankunde

1. Global tier one rare earths asset
2. Low-cost Stage 1 project
3. Robust Stage 1 project economics
4. Significant Stage 2 expansion potential
5. Short term path to production

Bauxite

1. Growing bauxite market
2. High-grade & high-quality assets
3. Development &/or monetisation options to be accelerated in 2025

APPENDICES

Kangankunde - Resources & Reserves

Mineral Resource Inclusive of Reserves @ 0.5% TREO Cut-off Grade

Resource Classification	Tonnes (millions)	TREO (%)	NdPr% of TREO** (%)	Tonnes Contained NdPr* (millions)
Indicated	61	2.43	20.1	0.3
Inferred	200	2.05	20.4	0.8
Total Resource	261	2.14	20.3	1.1

- Rounding has been applied to 1.0Mt for tonnes and 0.1% NdPr% of TREO which may influence total calculation
- *NdPr = $\text{Nd}_2\text{O}_3 + \text{Pr}_6\text{O}_{11}$, ** NdPr% / TREO% x 100
- Updated Mineral Resource Estimate for Kangankunde refer ASXAnnouncement: 2 May 2024

Ore Reserve @ 1% TREO Cut-off Grade

Classification	Ore Tonnes (Mt)	TREO grade (%)	NdPr % of TREO	Contained TREO (kt)
Proved	-	-	-	-
Probable	23.7	2.9	20	676
Total	23.7	2.9	20	676

- Figures have been rounded to the appropriate level of precision for the reporting of Ore Reserves
- Due to rounding, some columns or rows might not compute exactly as shown
- Ore Reserves are stated as in-situ dry tonnes, figures are reported in metric tonnes
- The Reserve is derived from Indicated Mineral Resources
- The Ore Reserves are defined on the basis that inventory above a defined cut-off
- Modifying factors applied are described in ASX release dated 1 July 2024
- Refer ASX announcement 05 October 2023 – Exploration Target Defined at Kangankunde

Competent Persons Information

The information in this presentation that relates to Exploration Results, Metallurgy Results, and Mineral Resources of the Kangankunde Rare Earths Project is extracted from reports released to the Australian Securities Exchange (ASX) and which are available to view at www.lindianresources.com.au and for which Competent Persons' consents were obtained.

The Competent Persons' consents remain in place for subsequent releases by the Company of the same information in the same form and context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent. Unless otherwise stated, where reference is made to previous releases of Exploration Results, Metallurgy Results and Mineral Resources in this presentation, the Company confirms that it is not aware of any new information or data that materially affects the information included in those announcements and all material assumptions and technical parameters underpinning the Exploration Results, Metallurgy Results, and Mineral Resources included in those announcements continue to apply and have not materially changed.

The Competent Persons' consents for the Mineral Resource Estimate for Kangankunde remain in place for subsequent releases by the Company of the same information in the same form and context as originally announced, until the consent is withdrawn or replaced by a subsequent report and accompanying consent. The Company confirms that is not aware of any new information or data that materially affects the Mineral Resource Estimate of the Kangankunde Projects, and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed¹.

The information in this presentation that relates to the Ore Reserve for the Kangankunde project is based on and fairly represents information and supporting documentation compiled by Mr David Clark, a Competent Person who is a full time employee of Minero Consulting, a company engaged by Lindian Resources. Mr Clark is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Clark has sufficient experience which is relevant to the style and mineralisation of the deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Ore Reserves (2012 JORC Code). Mr Clark does not hold any securities in Lindian and consents to the inclusion in this presentation of all technical statements based on his information in the form and context in which they appear².

¹ Refer ASX announcement dated 2 May 2024 "Updated Mineral Resource Estimate for Kangankunde".

² Refer ASX Announcement dated 1 July 2024 – "Outstanding Kangankunde Stage 1 Feasibility Study Results".

The information in this presentation that relates to Mineral Resources for the Lelouma, Woula, and Gaoual Bauxite Projects in Guinea are extracted from announcements published on ASX on 6 October 2020, 22 October 2020 and 4 February 2021 respectively and are available for viewing on the Company website www.lindianresources.com.au. The Company confirms it is not aware of any new information or data that materially affects the information in those original announcements and in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not markedly changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Kangankunde – Exploration Target¹

An Exploration Target has been determined for the Central Carbonatite of the Kangankunde Rare Earths Project in addition to the current Mineral Resource Estimate (MRE), as follows:

Target	Range	Tonnes (millions)	Grade (TREO %)
Exploration Target	Lower	400	2.0%
Central Carbonatite	Upper	800	2.7%

Cautionary Statement: The potential quantity and grade of the Exploration Target is conceptual in nature and therefore is an approximation. There has been insufficient exploration to estimate a Mineral Resource in the area considered an exploration target and it is uncertain if further exploration will result in the estimation of a Mineral Resource. The Exploration Target has been prepared and reported in accordance with the 2012 edition of the JORC Code.

The Exploration Target has been considered following the successful Phase 2 deep drilling program that showed the continuity of high-grade rare-earth mineralisation up to 800 metres beneath the limits of the Mineral Resource Estimate. The Central Carbonatite exploration target will be evaluated by drill programs aimed at creating a reportable resource. This work is anticipated to be conducted on a staged basis in conjunction with mine development over future years and consistent with staged operation expansion planning.

The Exploration Target is based on the current geological understanding of the mineralisation geometry supported by more than 17,000 metres of drilling, resource estimation modelling and surface mapping but does not consider factors related to geological complexity, possible mining method or metallurgical recovery factors. This estimate provides an assessment of the potential scale of the Kangankunde project mineralisation beyond the existing MRE and the work programs needed to convert this estimate to a resource in the future.

The reported Kangankunde Central Exploration Target is defined by:

- The resource model for Kangankunde Central which is based on three-dimensional geological domains defined by drilling and surface mapping.
- The reported resource from this model was limited by data density to an inferred classification with the depth limit ranging from 200 metres (800mRL to the 600mRL) to 400 metres (750mRL to 350mRL) below surface.
- Beneath the inferred resource limit mineralisation has been identified by drill holes KGKRCDD074 and KGKDD009 to extend to -200mRL, 600 to 800 metres below current MRE limit.
- In addition to depth extension, the margins of the mineralisation have not been fully tested with surrounding wall rock/carbo natite breccias shown to be mineralised where drilled. To date drilling has not tested fully the lateral extents of this mineralisation.
- The Exploration Target lower tonnage range of 400 million tonnes assumes a depth limitation to the 200m RL. This material was included in the assessment of the existing resource model estimation but has insufficient drilling data to be classified according to JORC guidelines.
- The Exploration Target upper tonnage range projects the mineralisation below the current model limit from the 200mRL to the -200mRL, a further 400 vertical metres beyond the Exploration Target lower tonnage range depth limit. This depth extent is supported by drill holes KGKRCDD074 and KGKDD009 that both contained consistent rare earths mineralisation to this depth. This upper range tonnage assumes the tonnes of the lower 400 metres of the existing resource model (600mRL to 200mRL) will be replicated from 200mRL to -200mRL.
- The Exploration Target lower grade range is based on a 10% reduction of the MRE grade to account for the halo of surrounding lower grade mineralisation, while the upper grade range is based on an approximation of the higher-grade contiguous carbonatite grades assayed from KGKDDRC74 and KGKDD009 at depth.

Competent Persons' Statement: The information in this report that relates to the Exploration Target for the Kangankunde Rare Earths Project is based on information compiled by Mr. Alistair Stephens, who is a Member of the Australian Institute of Mining and Metallurgy (AusIMM). Mr. Stephens is CEO of Lindian Resources Limited. Mr. Stephens has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code). Mr. Stephens consents to the inclusion in this report of the matters based on the information in the form and context in which it appears.

Unless otherwise stated, where reference is made to previous releases of exploration results in this announcement, the Company confirms that it is not aware of any new information or data that materially affects the information included in those announcements and all material assumptions and technical parameters underpinning the exploration results included in those announcements continue to apply and have not materially changed.

The information in this report that relates to previous exploration results for the Kangankunde Rare Earths Project was prepared and first disclosed under the JORC Code 2012 and has been properly and extensively cross-referenced in the text to the date of the original announcement to the ASX. The Company is not aware of any new information or data that materially affects these exploration results as originally referenced.

LINDIAN

RESOURCES LTD.

Becoming a globally significant critical minerals producer.
