DISCLAIMER

This presentation prepared by Xantippe Resources Limited (“Company”) does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). To the maximum extent permitted by law, none of the Company its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

This presentation may contain forward looking statements that are subject to risk factors associated with mineral exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

This presentation also contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. In particular, there is a risk that the Company will not be able to expand or upgrade its existing JORC resource. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company’s actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended.

COMPETENT PERSONS STATEMENT

The Exploration Results reported in this announcement are based on, and fairly represent, information and supporting documentation prepared by Mr Greg Cunnold. Mr Cunnold who is a Member of the Australasian Institute of Mining and Metallurgy and is a Director of Xantippe Resources Ltd. Mr Cunnold has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which has been undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Cunnold consents to the form and context in which the Exploration Results are presented in this announcement. Additionally, Mr Cunnold confirms that the entity is not aware of any new information or data that materially affects the information contained in the ASX releases referred to in this presentation.

XANTIPPE INVESTMENT OPPORTUNITY

We are a lithium developer aspiring to supply sustainable, high purity lithium from its flagship Carachi Project in Argentina

Exceptional Land Position

Located in the heart of the Lithium Triangle in Argentina, surrounded by major lithium developers

High Quality Lithium Project

Access to top tier, scalable, diversified, rich sources of lithium brine

Strong In-Country Partnerships

Local partners with a long-standing relationships with landowners. Excellent political relationships local to state to federal

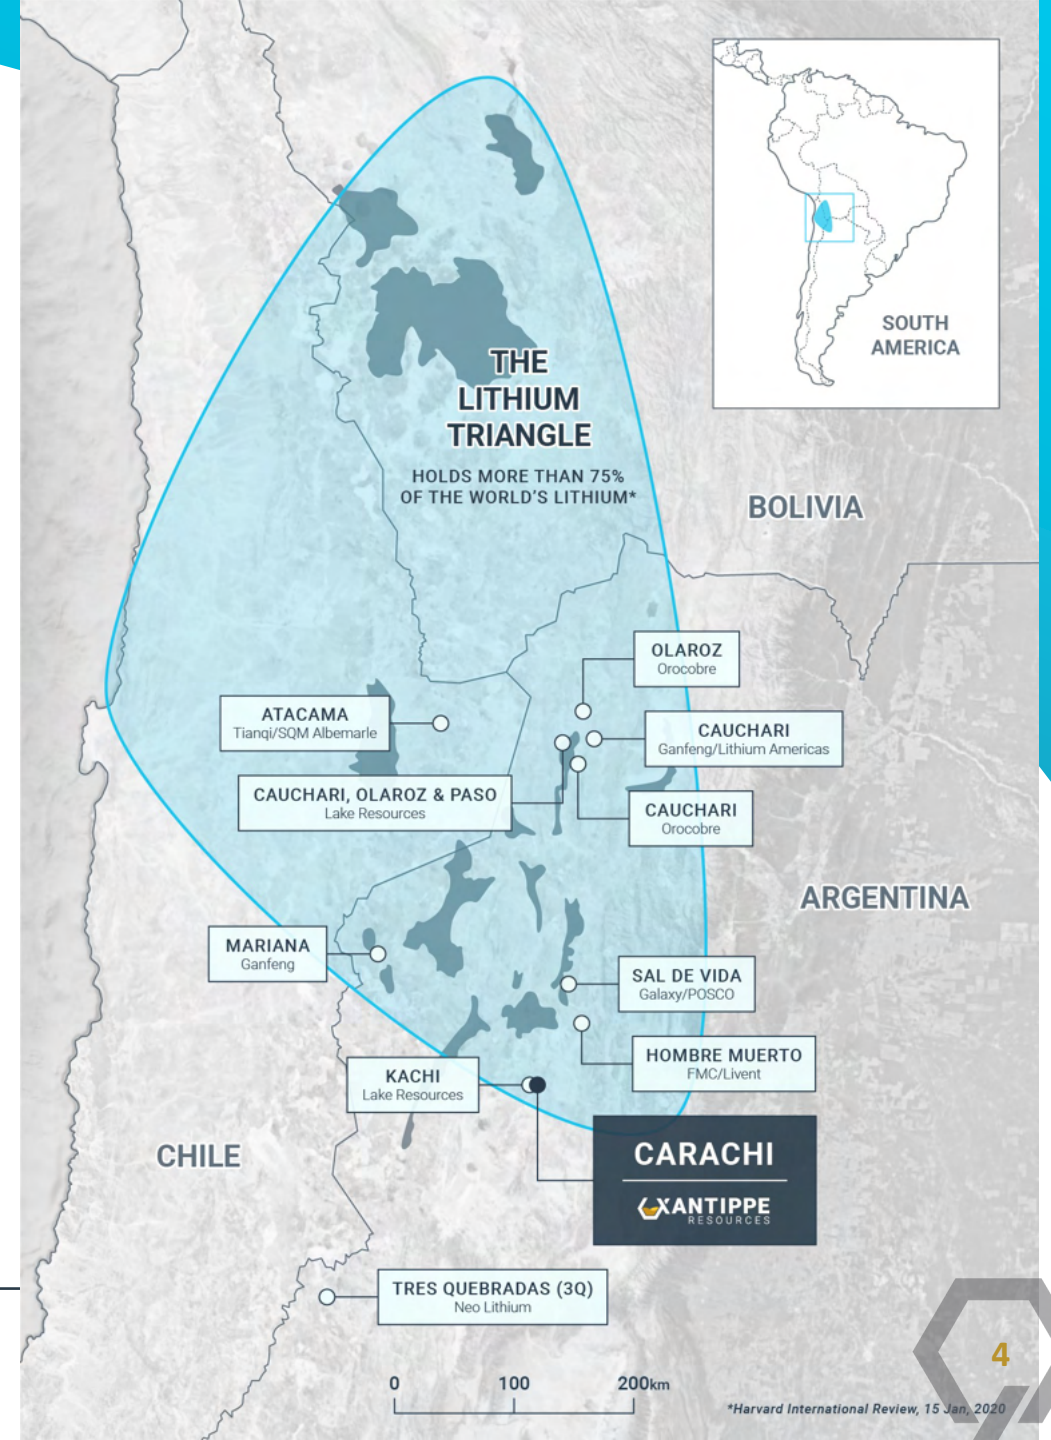

Best of Class Technologies

High purity/battery grade lithium sustainably locally-sourced and produced; with a clear commercialisation strategy

CARACHI LITHIUM PROJECT

Exceptional land position in the heart of the Lithium Triangle

- Xantippe tenements are located in Argentina in the heart of the renowned Lithium Triangle comprising Argentina, Chile and Bolivia
- The Lithium Triangle has the world's largest concentration of Lithium brines
- At present XTC owns 8 tenements over land totalling 21,900Ha (21.9 km²)
- Considerable upside - XTC is located proximal to lithium brine explorer and developer, Lake Resources (ASX: LKE; A\$1.75bn mkt cap¹)

HIGH QUALITY LITHIUM

XTC has 8 tenements totalling 21,900 Ha
Rita, Rita1, La Sofia, Luz Maria, Justina,
La Fortuna, La Fortuna 1 and La Potola

- Located proximal to lithium brine explorer and developer, Lake Resources (ASX: LKE; A\$1.75bn mkt cap)
- Luz Maria shares the same reservoir as LKE - lithium grade is similar to that existing on LKE tenement
- Work previously completed by LKE will fast-track development for XTC
- Acquisition of Carolina Lithium allowed XTC to access tenements not otherwise available

1. LKE market capitalisation as at 13 September 2022

Refer ASX announcement 25 February 2022 for further information

PROSPECTIVITY

Composite interpretative resistivity section A-B and B-C shows low resistivity anomalies within the Salar de Carachi Pampa and postulated paleo salar, to the Northeast

STRONG IN-COUNTRY PARTNERSHIPS

Local management

- Board comprises of two Argentina-based, experienced business persons:
 - Ms Carolina Arecco (Non-Executive Director)
 - Mr Juan Manual Santos (Non-Executive Director)

Local partners

- Led by Juan Manuel Santos, long-standing relationships with local landowners benefits XTC by priority access to acquiring new tenements and enabling community approval and involvement.

Highly professional local team

- Led by geologist Jose Luis Gonzalez, a highly experienced Lithium geologist in Argentina. Formerly with RTZ and Galaxy (now Allkem).

INVESTING IN CLEAN TECHNOLOGY

Producing sustainable
lithium to meet global
demand

An innovative process called Direct Lithium Extraction (DLE) has shown that lithium can be processed in a more time-efficient and environmentally responsible way than using evaporation ponds (which require a large land 'footprint' and can take up more than 18 months to harvest the lithium).

DLE has several potential benefits:

- Eliminating/reducing the footprint of evaporation ponds
- Decreasing production times compared with conventional brine operation
- Increasing recoveries from around 40 percent to over 80 percent
- XTC conducting preliminary assessment of all DLE technologies
- Advanced discussions underway with parties on DLE technologies

There are approximately 9 DLE methods being trialled throughout South America.
