In such instance, the rules for multiple single holdings (above) apply.

The Company reserves the right to reject any Application to the extent that it considers that the Application (whether alone or in conjunction with other Applications) does not comply with the requirements set out above.

The Company also reserves the right to reject Applications in accordance with the terms and conditions of this Prospectus.

4.7 CHESS and issuer sponsorship

The Company participates in the Clearing House Electronic Sub-register System (**CHESS**), operated by ASX Settlement (a wholly owned subsidiary of ASX), in accordance with the ASX Listing Rules and ASX Settlement Rules. The Company operates an electronic issuer-sponsored sub-register and an electronic CHESS sub-register. The two sub-registers together make up the Company's principal register of its Securities.

Under CHESS, the Company does not issue certificates to the holders of Securities. Instead, the Company provides holders with a Holding Statement (similar to a bank account statement) that sets out the number of New Securities allotted and issued to them under this Prospectus.

This Holding Statement also advises investors of either their Holder Identification Number (**HIN**) in the case of a holding on the CHESS sub-register or Security Holder Reference Number (**SRN**) in the case of a holding on the issuer sponsored sub-register.

A Holding Statement is routinely sent to holders at the end of any calendar month during which their holding changes. A holder may request a statement at any other time; however, a charge may be incurred for additional statements.

4.8 Taxation implications

The Directors do not consider that it is appropriate to give potential Applicants advice regarding the taxation consequences of applying for New Securities under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions for potential Applicants.

Neither the Company nor any of its advisers or officers accept any responsibility or liability for any taxation consequences to potential Applicants in relation to the Offers. Potential Applicants should, therefore, consult their own tax adviser in connection with the taxation implications of the Offers.

4.9 Privacy disclosure

The Company collects information about each Applicant from the Application Forms for the purpose of processing the Application and, if the Applicant is successful, for the purposes of administering the Applicant's Security holding in the Company. By submitting an Application Form, each Applicant agrees that the Company may use the information in the Application

Form for the purposes set out in this privacy disclosure statement. The Company and the Share Registry may disclose an Applicant's personal information for purposes related to the Applicant's investment to their agents and service providers including those listed below or as otherwise authorised under the Privacy Act:

- (a) the Share Registry for ongoing administration of the Company's register;
- (b) the Company's Related Bodies Corporate, agents, contractors and third party service providers, as well as to ASX, ASIC and other regulatory authorities (including the Australian Taxation Office); and
- (c) the printers and the mailing house for the purposes of preparing and distributing Holding Statements and for the handling of mail.

If an Applicant becomes a Security holder of the Company, the Corporations Act requires the Company to include information about the security holder (name, address and details of the Securities held) in its public register. This information must remain in the Company's register of Shareholders even if that person ceases to be a Security holder of the Company. Information contained in the Company's register of Shareholders is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its Security holders) and compliance by the Company with legal and regulatory requirements.

If an Applicant does not provide the information required on the Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, a person may request access to their personal information held by (or on behalf of) the Company or the Share Registry. An Applicant can request access to their personal information by writing to the Company through the Share Registry.

5 Purpose and effect of the SPP and Placement

5.1 Company's objectives and purpose of the Offers

The Company's objective is to rapidly advance Microba's commercialisation of its core tests MetaXplore and MetaPanel including:

- (a) Advancing the product development roadmap to support expanded clinical adoption in Australia and the UK;
- (b) Advancing scalable sales, marketing and commercial operations in Australia and the UK;
- (c) Developing targeted clinical evidence to underpin the product roadmap and drive clinical adoption;
- (d) Strengthening working capital and balance sheet flexibility.

The purpose of the SPP Offer is to raise up to \$2.0 million being the 'SPP Offer Amount'.

The purpose of the Placement Options Offer is to ensure that all New Options are offered with disclosure under section 713 of the Corporations Act.

5.2 Principal effects of the SPP and Placement on the Company

The principal effects of the SPP Offer and the Placement, assuming the SPP Offer is subscribed to the SPP Offer Amount will be to:

- (a) increase the number of Shares on issue by 161,111,112 Shares, from 447,851,977 Shares immediately prior to the Placement, to 608,963,089 Shares, representing a dilution of approximately 26.5% based on the total Shares on issue after completion of both the Placement and the SPP (assuming that the SPP is subscribed to the SPP Offer Amount and none of the Existing Options or New Options are exercised);
- (b) increase the number of Options on issue by 80,555,555 from 26,849,744 Options immediately prior to the Placement, to 107,405,299 Options; and
- (c) increase cash reserves by approximately \$14.5 million immediately after completion of the SPP and the Placement and payment of the costs and expenses set out in Section 9.9, including the estimated expenses of the SPP and the Placement.

5.3 The Sonic Option

Further, subject to Shareholder approval, Microba will also issue Sonic with 1 Sonic Option exercisable within 17 months following its issue.

The Sonic Option entitles Sonic (**Optionholder**) to subscribe for:

- (a) fully paid ordinary shares in the capital of Microba (**Shares**) with such number of Shares calculated by dividing the \$A equivalent of £2m (being \$4.166 million¹) by the greater of:
 - (i) 90% of the 30-day VWAP calculated for the 30 days prior to the date on which Microba receives the Notice of Exercise (as that term is defined in section 6.3); and
 - (ii) \$0.09.

(**Exercise Price**); and

¹ Based on 1GBP to A\$2.08 exchange rate

- (b) one further Option (**Sonic Attaching Option**) for every four Shares issued. The Sonic Attaching Options has an exercise price of a 20% premium to the Exercise Price and is exercisable within 36 months following their issue.

Exercise of the Sonic Option will result in a maximum of 46,296,296 Shares being issued to Sonic and a maximum of 11,574,074 Sonic Attaching Options being issued to Sonic. Each Sonic Attaching Option is exercisable into one Share.

Refer to Sections 6.3 and 6.4 for the terms of issue of the Sonic Option and Sonic Attaching Option.

5.4 Substantial holdings

A “substantial holding” is defined under section 9 of the Corporations Act to mean a relevant interest in 5% or more of the voting shares in a company. The table below sets out the Shareholders with a substantial holding based on the Company’s register of Shareholders as at the Prospectus Date. This includes the issue of the New Shares in the Placement (Tranche 1):

Shareholder ^{1&2}	Shares	% Interest
Sonic Healthcare Limited ³	98,597,402	19.14%
Perennial Value Management ⁴	70,777,434	13.74%
SA Microba Holdings Pty Ltd	33,480,799	6.50%
Thorney Investment Group ⁴	34,165,905	6.63%

Note:

- The information in the above table has been extracted from the Company’s register of Shareholders as at the Prospectus Date, and not from substantial holding notices received from, or otherwise required to be provided, by the relevant Shareholders.
- The information in this table includes the issue of the New Shares under the Placement (Tranche 1).
- Sonic acquired New Shares in the Placement (Tranche 1) and will acquire additional New Shares in the Placement (Tranche 2). Refer to Section 5.8 for detail of the take-up by Sonic up to 21.68% of Microba in reliance of the ‘Creep Exception’ as part of the Placement (Tranche 2).
- Following completion of the Placement (Tranche 2), it is anticipated that Perennial Value Management will hold 12.07% of Microba, Thorney Investment Group will hold 6.74% of Microba and SA Microba Holdings Pty Ltd (an entity controlled by Director, Richard Bund) will hold 5.5% of Microba.

5.5 Use of funds

The funds raised from the SPP Offer, together with the Placement, are planned to be used to rapidly advance Microba’s commercialisation of its core tests, MetaXplore and MetaPanel, including:

Proceeds of the SPP Offer and Placement	Assuming the SPP is subscribed to the SPP Offer Amount of \$2.0m (\$m)	%
Advancing the product development roadmap to support expanded clinical adoption in Australia and the UK	13,745,020	94.8%
Advancing scalable sales, marketing and commercial operations in Australia and the UK		
Developing targeted clinical evidence to underpin the product roadmap and drive clinical adoption		
Strengthening working capital and balance sheet flexibility		
Expenses of the SPP and Placement	\$754,980	5.2%
Total	\$14.5 million	100%

Notes:

- Refer to Section 9.9 of this Prospectus for further details relating to the estimated expenses of the SPP Offer and the Placement.

The above table is a statement of current intentions as of the date of this Prospectus. As with any budget, intervening events and new circumstances have the potential to affect the manner in which the funds are ultimately applied. The Board reserves the right to alter the way funds are applied on this basis.

Actual expenditure may differ significantly from the above estimates due to a change in market conditions, the development of new opportunities and other factors (including risk factors outlined in Section 7).

On completion of the Offers, the Board believes the Company will have sufficient working capital to achieve the above objectives. However, to the extent the New Shares or New Options under an Offer are not all issued because a relevant Shareholder approval is not passed at the General Meeting, the Company will scale back and/or delay some of the activities detailed above, while it seeks alternative sources of funding.

For more information on the resolutions to be put to Shareholders at the General Meeting, please refer to Section 9.2.

3. New Options expiring two years following their issue exercisable at \$0.14 per New Option.
4. The issue of the New Options is subject to the Company obtaining Shareholder approval at the General Meeting. Any exercise by Sonic is subject to compliance with the takeover prohibitions of the Corporations Act.
5. The Sonic Option is exercisable into Shares and Sonic Attaching Options and subject to compliance with the takeover prohibitions of the Corporations Act.
5. These Sonic Attaching Options are exercisable into Shares on a 1:1 basis and subject to compliance with the takeover prohibitions of the Corporations Act.

Refer to Section 5.8, detailing implications on control along with detail of the regulatory requirements in order for Sonic to be able to exercise its New Options, Sonic Option and Sonic Attaching Option.

The terms of issue of the New Options, Sonic Option and Sonic Attaching Options are contained in Sections 6.2, 6.3 and 6.4.

5.7 Escrow

Subject to completing the Offers, it is not anticipated that any Securities will be classified by the ASX as restricted securities or be required to be held in escrow for a period of time following the date of quotation.

5.8 Effect of the SPP, Placement and the Sonic Option on control of the Company

The Placement and the SPP

As at the Prospectus Date, the Company has:

- (a) 515,029,773 Shares on issue (this includes 67,177,796 New Shares issued to Placement Subscribers under the Placement (Tranche 1)); and
- (b) 26,849,744 unquoted Options on issue (this does not include New Options proposed to be issued to Placement Subscribers under the Placement (Tranche 1) and Placement (Tranche 2), given all New Options are to be issued following Shareholder approval).

Under section 606 of the Corporations Act, a person cannot acquire a relevant interest in the issued voting shares of a company if, because of a transaction in relation to securities of that company, a person's Voting Power in the company increases from 20% or below to more than 20% (or from a starting point that is above 20% and below 90%).

There are certain exceptions to the above prohibition in section 611 of the Corporations Act.

Item 9 of the table in section 611 of the Corporations Act provides an exception for an acquisition of securities pursuant to 'creep'. In essence, an acquisition can be made by a person if:

- (a) throughout the 6 months before the acquisition that person, or any other person, has had voting power in the company of at least 19%; and
- (b) as a result of the acquisition, none of the persons referred to in paragraph (a) would have voting power in the company more than 3 percentage points higher than they had 6 months before the acquisition,

(Creep Exception).

The Company has managed the Placement such that other than Sonic, none of the Applicants will obtain a relevant interest in Shares of 20% or more.

With respect to Sonic, given Sonic has maintained a 19.14% Voting Power in Microba for the past 6 months, on completion of the Placement (Tranche 2) and the fully underwritten SPP, it will increase its holding to a 21.68% in reliance of the Creep Exception.

The Company will manage the SPP, including the underwriting, such that such that none of the Applicants under the SPP will obtain a relevant interest in Shares of 20% or more. The Company therefore does not anticipate that the SPP will have any material effect on control of the Company.

Sonic is not a sub-underwriter to the SPP Offer.

The Sonic Option

Microba notes that subject to Shareholder approval, Sonic will also be issued with the Sonic Option. The Sonic Option is exercisable into a maximum of 46,296,296 Shares and 11,574,074 Sonic Attaching Options.

The exercise of the Sonic Option is at all times subject to section 606 of the Corporations Act and will only be exercised in circumstances where section 606 of the Corporations Act is not triggered or otherwise in compliance with section 611 item 9 or section 611 item 7 of the Corporations Act.

Given the SPP is fully underwritten to the SPP Offer Amount, a table is provided below, detailing the implications on control of the take-up by Sonic. This assumes:

- (a) The SPP Offer is subscribed to the SPP Offer Amount and the New Shares under the SPP are issued immediately prior to the New Shares under Placement (Tranche 2) (given the SPP is fully underwritten to the SPP Offer Amount).
- (b) No New Options under the Placement or SPP are exercised with the exception of the New Options issued to Sonic as part of the Placement (subject to satisfaction of all regulatory requirements).
- (c) Sonic exercises the Sonic Option and Sonic Attaching Option (subject to satisfaction of all regulatory requirements).

Take-up	Shares	Percentage (%)
Sonic holding prior to the issue of New Shares under the Placement (Tranche 1)	85,736,872	19.14%
Sonic holding following the issue of New Shares under the Placement (Tranche 1)	98,597,402	19.14%
Sonic holding following the issue of New Shares under the Placement (Tranche 2) and the New Shares under the SPP	132,033,168	21.68%
Holding following the exercise of the New Options held by Sonic and issued as part of the Placement ^{1&2}	155,181,316	24.55%
Holding following the exercise of the Sonic Option ^{1&2}	201,477,612	29.70%
Holding following the exercise of the Sonic Attaching Options ^{1&2}	213,051,686	30.88%

Note 1 - Any exercise by Sonic is subject to compliance with the takeover prohibitions of the Corporations Act. See further detail below.

Note 2 - This assumes that no other securities are issued to any other holder and Sonic has complied with all regulatory approvals for the Shares to be issued on exercise of the relevant Option by Sonic.

All Shares to be issued to Sonic on exercise of the:

- (a) New Options;
- (b) Sonic Option; and
- (c) Sonic Attaching Options,

are subject to compliance with the Corporations Act. What this means is that Sonic will not be able to exercise the Sonic Option or the Sonic Attaching Options and increase its Voting

Power in Microba in excess of that detailed in section 606 of the Corporations Act, unless such issue is in accordance with:

- (a) the Creep Exception in section 611 item 9 of the Corporations Act; or
- (b) the prior Shareholder approval, pursuant to section 611 item 7 of the Corporations Act.

5.9 Potential dilution to Shareholders

Shareholders should note that if they do not participate in the SPP Offer, their shareholdings are likely to be diluted by approximately 3.6% (as compared to their holdings and number of Shares on issue as at the Record Date (but assuming the New Shares under the Placement (both Tranche 1 and Tranche 2) are already issued)).

Examples of how the dilution may impact Shareholders is set out in the table below.

SPP subscribed to the SPP Offer Amount (\$2.0m)

Holder	Holding as at Record date	Percentage at Record Date	Percentage as at the Record Date (but assuming all New Shares under the Placement are issued) ¹	Percentage on completion of the SPP Offer and the Placement ^{2&3}	
				If SPP Offer is accepted for maximum entitlement (\$30,000)	If SPP Offer is not accepted
Shareholder 1	10,000	0.002%	0.002%	0.056%	0.002%
Shareholder 2	100,000	0.022%	0.017%	0.071%	0.016%
Shareholder 3	1,000,000	0.223%	0.170%	0.219%	0.164%
Shareholder 4	10,000,000	2.233%	1.704%	1.697%	1.642%

Notes:

1. The dilutive effect shown in the table assumes that Shareholders did not participate in the Placement.

2. The dilutive effect shown in the table is the maximum percentage on the assumption that the Company raises the SPP Offer Amount under the SPP Offer.

3. The dilutive effect shown in the table assumes that no Existing Options are exercised prior to the completion of the Offers.

5.10 Potential dilutive effect of New Options

The table below sets out the potential dilutive effect on Shareholders if Shares are issued on the exercise of all Existing Options and all proposed New Options following completion of the SPP and the Placement Option Offer.

The below table assumes:

- (a) 100% subscriptions under the SPP to the SPP Offer Amount (given the SPP is fully underwritten);
- (b) the New Shares under the Placement (Tranche 1) and Placement (Tranche 2) have been issued;
- (c) the Sonic Option is not exercised.

Event	Number of Shares pre-exercise of any Options	Shares issued on Option exercise	Number of Shares post-exercise of relevant Options	Dilution (rounded)
100% subscription under the SPP Offer – New Shares to the \$2.0m SPP Offer Amount				
100% issue of New Shares under the Placement				

Event	Number of Shares pre-exercise of any Options	Shares issued on Option exercise	Number of Shares post-exercise of relevant Options	Dilution (rounded)
Exercise of Existing Options	608,963,089	26,849,744	635,812,833	4.22%
Exercise of New Options issued under the Placement Options Offer	608,963,089	69,444,444	678,407,533	10.24%
Exercise of New Options issued under the SPP Offer	608,963,089	11,111,111	620,074,200	1.79%

Note: The interests shown in the table above assumes that:

1. Existing Options do not lapse prior to exercise or conversion; and
2. other Shares are not issued prior to exercise of Existing Options or New Options.

Shareholders should note that they will be further diluted, should the Sonic Option and Sonic Attaching Option be exercised. Refer to Section 5.8 for detail on control implications.

5.11 Pro-forma balance sheet

Set out below is the:

- (a) reviewed balance sheet of the Company as at 31 December 2024;
- (b) unaudited pro forma balance sheet of the Company as at 31 December 2024 incorporating the effect of the Offers and the Placement, assuming full participation in the Placement and 100% subscription under the SPP up to the SPP Offer Amount of \$2.0 million.

The unaudited pro forma balance sheet has been derived from the reviewed financial statements of the Company, for the six months ended 31 December 2024, and adjusted to reflect pro forma assets and liabilities of the Company as if completion of the Offers and Placement had occurred by 31 December 2024, and also for material adjustments noted below.

The pro-forma information is presented in an abbreviated form. It does not include all of the disclosures required by the Australian Accounting Standards applicable to annual financial statements.

The pro forma balance sheet has been adjusted for the following material movements in the assets and liabilities of the Company between 31 December 2024 and the Prospectus Date:

- (a) a Placement to issue 67,177,796 New Shares at \$0.09 per New Share, to Placement Subscribers to raise \$6.046 million (before costs);
- (b) a Placement to issue 71,711,093 New Shares at \$0.09 per New Share, to Placement Subscribers that are subject to shareholder approval to raise \$6.454 million (before costs);
- (c) a 100% subscription under the SPP for the issue of 22,222,223 New Shares at \$0.09 per New Share to raise up to \$2.0 million (before costs) pursuant to this Prospectus; and
- (d) costs of the Placement and Offers will be approximately \$735,500.

The Company will issue 69,444,444 New Options under the Placement Options Offer and 11,111,111 New Options under the SPP Offer pursuant to the Prospectus at an exercise price of \$0.14 per New Option with an expiry date that is 2 years following their issue, assuming full

participation in the Placement and 100% subscription under the SPP (up to the SPP Offer Amount). 6 Rights and liabilities attaching to Securities

6.1 Shares

The following is a summary of the more significant rights and liabilities attaching to the Shares in the Company are the terms of issue of the New Shares and the Shares (being the underlying securities of the New Options to be issued under the SPP Offer and the Placement Options Offer to be issued pursuant to this Prospectus).

This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. You should seek independent legal advice to obtain such a statement.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available on the Company's website and for inspection at the Company's registered office during normal business hours.

Voting:	<p>At a meeting of Shareholders, except where otherwise provided by the Corporations Act or the Constitution or to comply with governance recommendations of the ASX Corporate Governance Council in respect of when a poll is to be demanded, resolutions are to be decided by a show of hands. A poll may be demanded by the Chairman at any time, by not less than five Shareholders having the right to vote on the resolution present at the meeting, or by any one or more Shareholders present at the meeting holding shares conferring a right to vote on the resolution, being shares on which an aggregate sum has been paid up equal to not less than 5% of the total sum paid up on all the shares conferring that right.</p> <p>A Shareholder holding shares in respect of which all sums due and payable to Microba have not been paid is not entitled to attend and vote at general meetings in respect of such shares, but is entitled to attend general meetings and vote in respect of all other shares held in respect of which no sums are due and payable to Microba.</p> <p>The Chairman does not have a casting vote.</p>
Proxy:	<p>An instrument appointing a proxy or any power of attorney is to be forwarded to Microba no less than 48 hours before the meeting is held. Any instrument deposited outside the timeframe is invalid.</p>
General meetings and notices:	<p>Microba shall call an annual general meeting in accordance with the Corporations Act. The Directors shall convene a meeting of Microba on requisition of a majority of a Directors, on requisition by a person entitled to requisition such meeting under the law, or by resolution of the Board.</p> <p>Ordinary shareholders and preference shareholders are entitled to receive notice of and attend meetings, and receive reports and financial statements (as that term is defined in section 9 of the Corporations Act). Ordinary shareholders are entitled to vote at meetings in the ordinary course, and preference shareholders can only vote on the limited issues outlined in the Constitution.</p> <p>The quorum for a meeting of Shareholders is three Shareholders present in person, via proxy or virtually.</p>
Virtual meetings and electronic signatures	<p>The Constitution permits meetings to be held wholly or partly online, virtually or electronically (though, does not permit a meeting where attendees cannot engage and participate), and permits an individual to be "present" or "in attendance" at such meeting electronically or via the use of any technology.</p> <p>Further, where a document is required to be signed by a chairperson, Director, Secretary, Shareholder, a person consenting to be or resigning as a Director, Secretary or public officer of Microba, or a Shareholder's proxy, attorney or body corporate representative, the electronic signature, whether digital or encrypted, of that person has the same force and effect as his or her manual 'wet ink' signature.</p>
Dividends and share plans:	<p>Subject to the Corporations Act, the Constitution and the special conditions or rights attaching to shares, the Directors may distribute the equity of Microba by way of a dividend. Payment of dividends on the shares are to be in proportion to</p>

	<p>the amounts paid up on such shares respectively at the date of declaration of the dividend.</p> <p>Payment of dividends may be by cheque or electronic funds transfer, or as otherwise determined by the Directors.</p> <p>Subject to the provisions of section 544 of the Corporations Act and the <i>Public Trustee Act 1978</i> (Qld), any unclaimed dividends may be invested and used by Directors for the benefit of Microba until claimed. Microba is not a trustee in respect of unclaimed dividends.</p> <p>The Board may adopt a dividend reinvestment plan at its discretion whereby ordinary shareholders may forego their right to share in dividends and instead receive an issue of fully paid shares in Microba.</p>
Issue of shares:	<p>Subject to the Constitution, the issue of shares in Microba is under the control of the Directors who may issue, allot or dispose of shares in Microba on the terms and conditions and with such rights and privileges as they see fit. Subject to the Constitution and any resolution made with respect to the alteration of capital, the Directors may issue new shares with or without special conditions, preferences or priority either as to dividends or capital or both and with any other special rights or advantages. In the absence of any special conditions or rights, such new shares when issued shall be held on the same conditions as if they had been ordinary shares in the original capital of Microba, and shall be subject to the provisions of the Constitution that relate to ordinary shares in Microba.</p> <p>Subject to the Corporations Act and without prejudice to any special rights previously conferred on the holders of any existing shares or classes of shares, the Directors may issue any shares: a) with a preferential, deferred or qualified right to dividends, or in the distribution of assets of Microba, or both; b) with a special or qualified right of voting or without a right of voting; or c) with any other special privileges or advantages over or equally with any shares previously issued or then about to be issued. Such shares may be issued with conditions or on terms that the Directors determine. Any preference share may be issued on the terms that it is or at the option of Microba is liable to be redeemed.</p>
Transfer of Shares:	<p>Generally, all shares are freely transferrable subject to the procedural requirements of the Constitution and to the provisions of the Listing Rules. If permitted by the Listing Rules or the ASX Settlement Operating Rules, the Directors may decline to register a transfer of shares or apply a holding lock. In such cases, Microba shall give to the lodging party written notice of the refusal and the precise reasons for such action within five business days after the date on which the transfer was lodged with Microba.</p>
Shareholder liability:	<p>Fully paid shares are not subject to any calls for money by the Directors and will therefore not become liable for forfeiture.</p> <p>Microba may, in the future, issue Shares that are partly paid and issue a call on those Shares. Any such obligations will be outlined at the time the Shares are offered.</p>
Proportional takeover provisions:	<p>The registration of a transfer of Shares which would give effect to a proportional takeover bid is prohibited unless and until an approving resolution approving the proportional takeover bid is passed. The proportional takeover provisions will cease to have effect at the end of three years starting when the provisions were inserted in the Constitution or starting when the provisions were last renewed.</p>
Winding up:	<p>If Microba is wound up and assets remain after the payment of debts and liabilities of Microba and the costs of winding up, these assets (Surplus Assets) can be distributed by the liquidator in accordance with the procedure set out in the Constitution and outlined below.</p> <p>They are to be distributed first, in repayment of paid-up capital in accordance with the respective rights of the shareholders and, second, the balance remaining shall be distributed among the ordinary shareholders in proportion to the paid-up capital or which ought to have been paid up at the commencement of the winding up on the shares held by them respectively (other than amounts paid in advance of calls).</p> <p>If the Surplus Assets are insufficient to repay the whole of the paid up capital, those assets are to be distributed so that the losses shall be borne by the shareholders in proportion to the paid-up capital or which ought to have been</p>

	paid up at the commencement of the winding up on the shares held by them respectively (disregarding amounts paid in advance of calls).
Variation of rights:	If share capital is divided into different classes of shares, preference capital (other than redeemable preference capital) shall not be repaid. Further, the rights attaching to any class cannot be varied without the written consent of the holders of 75% of the issued shares of that class or the sanction of a special resolution passed at a separate general meeting of the holders of the shares of that class.
Directors – appointment, retirement and removal:	<p>Microba may by resolution increase or decrease the number of Directors, with the minimum number of Directors being three (3) and the maximum being nine (9).</p> <p>Directors may appoint another person qualified to be a Director to either fill a casual vacancy or as an addition to the Board. A Director who is so appointed only holds office until the next annual general meeting, where they are eligible for re-election.</p> <p>At a general meeting Microba may, by resolution, remove a Director before the end of their term, appoint another qualified person as Director, or remove any Director before the expiration of their term and appoint a qualified person in their stead.</p> <p>A Director must not continue in office in excess of three (3) consecutive years or until the third annual general meeting following their appointment, whichever is longer, without submitting to re-election.</p>
Decisions of Directors:	The quorum for a meeting of Directors is two (2). Questions arising at any meeting of Directors shall be decided by a majority of votes. A determination of a majority of Directors is for all purposes taken to be a determination of the Directors. The Chairman of the meeting, when more than two Directors including the Chairman are present, has a second casting vote.
Alteration to the constitution:	In accordance with section 136 of the Corporations Act, the Constitution can only be amended by a special resolution passed by at least 75% of Shareholders present and voting at a general meeting or by a court order pursuant to the Corporations Act.

7 Risk factors

7.1 Introduction

The Securities offered under this Prospectus are considered speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this Section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Securities.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Company specific risks

Regulatory and compliance risk

Microba operates in the highly regulated healthcare, diagnostics and therapeutic development environments and works with expert advisors related to these activities. Changes in laws, regulations, or industry standards related to healthcare, therapeutic development, patient privacy, data protection, and medical diagnostic testing could impact Microba's operations. Non-compliance with these regulations could result in legal liabilities, fines, reputational damage, and delays in product development.

These include FDA approval for therapeutic trials in the US, CLIA certification for laboratory operations, and compliance with UK & EU regulations including IVDR for diagnostics.

Jurisdictional risk and new and unfamiliar markets

Microba intends to launch its products into the United States and the European Union. Delays in launching into each of these jurisdictions, which could occur for various reasons, due to delays in regulatory approvals and adoption by healthcare practitioners, could materially impact the anticipated revenue generation of the Microba Group.

In expanding into new jurisdictions, Microba is exposed to a range of different legal and regulatory regimes including risks associated with doing business in regions that may have political, legal and economic instability or less sophisticated legal and regulatory systems and frameworks including:

- (i) unexpected changes in, or inconsistent application or enforcement of applicable foreign laws and regulatory requirements;
- (ii) less sophisticated technology standards;
- (iii) difficulties engaging local resources; and
- (iv) potential for political upheaval or civil unrest.

As Microba enters newer and less familiar regions, there is a risk that it fails to understand the law, regulations and business customs of these regions. This gives rise to risks relating to labour practices, foreign ownership restrictions, tax regulation, difficulty in enforcing contracts, changes to or uncertainty in the relevant legal and regulatory regimes and other issues in foreign jurisdictions in which Microba may operate. This could interrupt or adversely affect parts of Microba's business and may have an adverse effect on Microba's business operations and financial performance.

Competition

The microbiome industry is rapidly evolving, attracting competitors globally. Intensified competition can lead to pressure on pricing, margins, and market share, which reinforces the need to maintain Microba's leading technological position and to continually invest in innovation and the product roadmap. Further, there are other companies seeking to develop microbiome-based therapeutics directed to similar indications that are being targeted by Microba.

Clinical trial and delays and failures

Developing new drug products can be complex, costly and uncertain. Clinical trials involve inherent risks, including delays due to patient recruitment, lack of efficacy, safety concerns, regulatory hold-ups, and unforeseen adverse effects. The failure of clinical trials to meet endpoints or obtain regulatory approval could lead to extended project timelines, requirement of increased levels of capital or cessation of programs.

Intellectual property protection

Microba relies on the ongoing protection of Microba's proprietary technologies, patents, and trade secrets and actively engages with expert intellectual property lawyers to manage this. The international granting of patent claims, risk of intellectual property infringement or challenges from competitors could impact Microba's ability to protect Microba's innovations and maintain a competitive advantage.

If Microba identifies that a third party has infringed its intellectual property rights, Microba may incur significant costs in prosecuting such action, whether or not it ultimately prevails. Typically, intellectual property litigation is expensive. Costs that Microba incurs in prosecuting third party infringement actions would also include diversion of management's and technical personnel's time.

In addition, while Microba may be able to obtain injunctive or other equitable relief to prevent an infringing third party from further developing discoveries or commercialising its products, the granting of such an injunction is subject to the relevant Court's discretion and is not assured, and, if not granted, Microba may incur risk of unfair competition until such time as judgment is made on the question of infringement. Additionally, the Court may direct, as a condition of such an injunction, that Microba provide a guarantee or undertaking to pay the third party's losses should judgment be that the third party has not infringed Microba's intellectual property rights. There is also a risk that the third party may seek, and obtain, a declaration that Microba's relevant intellectual property rights are invalid, which would impact upon Microba's relative market position and the value of its intangible assets.

If a third party accuses Microba of infringing its intellectual property rights or if a third party commences litigation against Microba for the infringement of patents or other intellectual property rights, Microba may incur significant costs in defending such action, whether or not it ultimately prevails. Typically, intellectual property litigation is expensive. Costs that Microba incurs in defending third party infringement actions would also include diversion of management's and technical personnel's time.

In addition, parties making claims against Microba may be able to obtain injunctive or other equitable relief that could prevent Microba from further developing discoveries or commercialising its products. In the event of a successful claim of infringement against Microba, it may be required to pay damages and obtain one or more licenses from the prevailing third party. If it is not able to obtain these licenses at a reasonable cost, if at all, it could encounter delays in product introductions and loss of substantial resources while it attempts to develop alternative products.

Access to capital risk

Microba's ability to deliver on its diagnostic, therapeutic, and international expansion objectives depends on timely access to external funding. These activities are capital-intensive and require sustained investment across clinical adoption, evidence generation, and product development.

Market volatility, economic conditions, or weak investor sentiment may limit Microba's ability to raise capital when needed, or on acceptable terms. A failure to secure sufficient funding may delay execution, reduce the scale or scope of planned commercial activities, or impact Microba's ability to meet financial targets.

Cybersecurity

Microba products and services all have digital components and as such Microba's business must confront the risks of a cybersecurity breach. As we continuously advance the Microba Group, new threats can and will emerge, necessitating a robust information and IT security framework.

A malicious attack on Microba's systems, processes or people from external or internal sources could put the integrity and privacy of customers' data and business systems used by Microba at risk. The impact of loss or leakage of customer or business data could include costs for rebates, potential service disruption, litigation, and brand damage resulting in reduced or failing revenues. Microba follows best practice in relation to security policies, procedures, automated and manual protection, encryption systems and staff screening to minimise this risk. While Microba complies with all applicable privacy legislation, ultimately risk can flow from the integrity of the systems on which the information is housed.

Supply chain disruption

Microba's operations rely on a consistent supply of digital infrastructure, laboratory equipment, consumables, reagents, and other materials. Supply chain disruptions due to factors like global events or regulatory issues can lead to delays and increased costs.

Dependency on key personnel
Microba's success is tied to the expertise and experience of its founders, key scientific and management personnel. The loss of key individuals could disrupt Microba's operations, hinder product development and innovation, and impact Microba's business strategy.
Market acceptance and adoption
The adoption of new healthcare testing methods and products may be slower than anticipated due to practitioner scepticism, patient preferences, or limited reimbursement support. Delays in clinical uptake or market acceptance could negatively affect Microba's revenue forecasts and growth trajectory. Microba's international revenue assumptions are based on a cash-pay model and currently exclude reimbursement. Limited patient willingness to pay out-of-pocket, or challenges in demonstrating sufficient value to support pricing, may constrain test adoption—particularly in the US, where out-of-pocket costs are highly variable and price sensitivity is significant.
Distribution partners
Microba's global strategy includes partnering with global healthcare providers to distribute Microba's products and services in selected territories. Distribution partners are generally responsible for marketing, sales, operations, regulatory and legal considerations surrounding the distribution of the products and services in their defined territory. Distribution partners are separate entities to Microba, and this strategy inherently involves risk that Microba's partners will not meet the commercial, quality or performance objectives or the aforementioned responsibilities of the distribution partnership. The success or failure of these distribution partnerships may have a direct impact on Microba's brand and future financial performance
Execution risk – Revenue milestones and scaling
There is a risk that Microba may not achieve the test volume growth, pricing assumptions or cost efficiencies required to meet projected break-even milestones. Any shortfall in clinical adoption, commercial execution or operating leverage may delay financial performance targets and materially impact investor returns.
Assumption sensitivity risk – FX and pricing
Microba's financial forecasts are sensitive to foreign exchange rates and pricing assumptions. Adverse currency fluctuations or downward pricing pressure could negatively impact revenue realisation and profitability, particularly in the UK market where test pricing is GBP-denominated.
Partner dependency – Lab and logistics execution
Microba's ability to service test volumes in the US, UK and Europe is dependent on execution by third-party logistics and laboratory partners. Delays or underperformance from these partners may impact Microba's ability to deliver services, realise revenue, or meet quality standards, particularly in early-stage market penetration.
Data privacy and sovereignty risk
As Microba expands internationally, compliance with data protection regulations (e.g. GDPR in the EU, HIPAA in the US) becomes increasingly complex. Non-compliance, data breaches, or conflicts with data sovereignty laws could result in legal exposure, regulatory action, or reputational damage.
Litigation risk
Microba may also be subject to litigation in the future and there can be no assurance that the outcome of legal proceedings from time to time will not have an adverse effect on Microba's businesses, financial performance, financial condition or prospects.
Restraints on innovation
The emergence of technical developments providing an alternative to Microba's product offerings could result in the acquisition by competitors to Microba of intellectual property rights (e.g. patents) which may prevent Microba from developing or commercialising its own discoveries in countries in which the third party has those intellectual property rights. Such third party intellectual property rights could impact the market share that Microba is able to acquire in the affected countries.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems (including information security systems), or from external events. Microba is exposed to a variety of risks including those arising from process error, fraud, technology failure, security and physical protection, staff skills, workplace safety, compliance, business continuity and crisis management.

Reputation risk

The reputation and brand of Microba and its individual products are important in attracting potential customers. Any reputational damage or negative publicity around Microba or its products could adversely impact on Microba's business.

Failure of risk management strategies

Microba has implemented risk management strategies and internal controls involving processes and procedures intended to manage business risks as they arise. However, there are inherent limitations with any risk management framework as risks may arise that Microba has not anticipated or identified. Additionally, if any of Microba's risk management processes and procedures prove ineffective or inadequate or are otherwise not appropriately implemented, Microba could suffer unexpected losses and reputational damage which could adversely impact Microba's financial performance, financial position and prospects.

Changes to accounting policies and/or methods in which they are applied may adversely affect Microba's business, operations and financial condition

The accounting policies and methods that Microba applies are fundamental to how it records and reports its financial position and results of operations. Microba must exercise judgment in selecting and applying many of these accounting policies and methods as well as estimates and assumptions applied so that they not only comply with generally accepted accounting principles but they also reflect the most appropriate manner in which to record and report on the financial position and results of operations. In recording and reporting its financial position there is a risk that these accounting policies may be applied inaccurately, and/or incorrect assumptions or judgments made, resulting in a misstatement of financial position and results of operations. This may lead to an adverse impact on Microba's financial performance, financial position and prospects.

Insurance risk

Microba maintains a level of insurance coverage. If Microba's third-party providers fail to perform their obligations and/or its third-party insurance cover is insufficient for a particular matter or group or related matters, or there is an adverse event in respect of the third-party insurer or Underwriters, the net loss to Microba could adversely impact Microba's financial performance, financial position and prospects. Future changes to insurance market conditions may also result in material or significant increases in the cost of obtaining insurance, and/or impact the ability for Microba to obtain insurance coverage:

- (i) in respect of certain risks;
- (ii) to the extent to which it had previously obtained; or
- (iii) to a level it considers prudent for the scope and scale of its activities.

Strategic risk

A failure to execute Microba's strategic objectives may result in a failure to achieve anticipated benefits and ultimately adversely impact Microba's operations, financial performance, financial position and prospects.

Merger, acquisitions and divestments

Microba may engage in merger, acquisition or divestment activities which facilitate Microba's strategic direction. Whilst Microba recognises that benefits may arise from merger, acquisition or divestment activities, significant risks exist in both the execution and implementation of such activities. In the event of any future mergers or acquisitions, it is likely that Microba would raise additional debt equity finance and this would cause Microba to face the financial risks and costs associated with additional debt or equity.

Any acquisition or divestment may result in a material positive or negative impact on Microba's financial position. There can be no assurance that any acquisition (or divestment) would have the anticipated positive results, including results relating to the total cost of integration (or separation), the time required to complete the integration (or separation), the amount of longer-term cost savings, the overall

performance of the combined (or remaining) entity, or an improved price for Microba's shares. Microba's operating performance, risk profile and capital structure may be affected by these transactions.

Integration (or separation) of an acquired (or divested) business can be complex and costly, sometimes including combining (or separating) relevant accounting and data processing systems, and management controls, as well as managing relevant relationships with employees, customers, regulators, counterparties, suppliers and other business partners. Integration (or separation) efforts could create inconsistencies in standards, controls, procedures and policies, as well as diverting management attention and resources. This could adversely affect Microba's ability to conduct its business successfully and impact Microba's financial performance, financial position and prospects. Additionally, there can be no assurance that employees, customers, counterparties, suppliers and other business partners of newly acquired (or retained) businesses will remain post-acquisition (or post-divestment), and the loss of employees, customers, counterparties, suppliers and other business partners could adversely affect Microba's financial performance, financial position and prospects.

Reliance on external parties

Microba's operations depend on performance by a number of external parties under contractual arrangements with Microba, this includes its contracted arrangements with Sonic. Non-performance of contractual obligations and poor operational performance of external parties may have an adverse effect on Microba's business and financial performance.

Environmental and climate change risk

Microba and its customers operate businesses in a range of sectors and geographical locations which are exposed to environmental risks as well as risks related to climate change. A failure to manage these risks and respond appropriately could adversely impact Microba's reputation and financial performance.

7.3 General risks

Market price of ordinary shares will fluctuate

Ordinary shares trade on ASX. The market price of ordinary shares on ASX may fluctuate due to various factors, including:

- Australian and international general economic conditions (including inflation rates, the level of economic activity, interest rates and currency exchange rates), changes in government policy, changes in regulatory policy, the expressed views of regulators, investor sentiment and general market movements, which may or may not have an impact on Microba's actual operating performance;
- operating results that vary from expectations of securities analysts and investors;
- changes in expectations as to Microba's future financial performance, including financial estimates by securities analysts and investors;
- changes in market valuations of competitors;
- changes in dividends paid to shareholders, Microba's dividend payout policy or Microba's ability to frank dividends;
- announcement of the results of tenders, entry into or cessation of contracts, acquisitions, strategic partnerships, joint ventures or capital commitments by Microba or its competitors;
- changes in the market price of ordinary shares and / or other securities issued by Microba or by other issuers, or changes in the supply of equity securities or capital securities issued by Microba or by other issuers;
- changes in institutional or shareholder (including director) portfolio management or shareholding strategies;
- changes in fiscal policies in jurisdictions where Microba does business, including the introduction or increases in tariffs;
- changes in laws, regulations and regulatory policy;
- Microba's failure to comply with law, regulations or regulatory policy;
- other major Australian and international events such as hostilities and tensions, and acts of terrorism; and
- other events set under the heading "Key risks associated with Microba's business".

It is possible that the price of ordinary shares will trade at a market price below the price under the Placement as a result of these and other factors. It is also possible that new risks might emerge as a result of Australian or global markets experiencing extreme stress or existing risks may manifest themselves in ways that are not currently foreseeable. There have been in recent months, and may be in the future, significant fluctuations and volatility in the prices of shares. In particular, recent announcements in the US relating to tariffs, and the continuing uncertainty as to its future impact on the Australian and global economies, has contributed to significant market falls and volatility, including on the prices of shares trading on the ASX (including the price of Microba shares) and other foreign securities exchanges, which may materially adversely impact the market price of New Shares.

Liquidity risk

Microba Shareholders who wish to sell their ordinary shares may be unable to do so at an acceptable price, or at all, if insufficient liquidity exists in the market for ordinary shares. Microba does not guarantee the market price or liquidity of ordinary shares and there is a risk that you may lose some of the money you invested.

Dividends may fluctuate or may not be paid

Dividends are discretionary and do not accrue. The rate of dividends may fluctuate or Microba may not pay dividends at all. There is a risk that dividends may become less attractive compared to returns on comparable securities or investments. None of Microba, Microba's directors or any other person guarantees any particular rate of return on ordinary shares.

Taxation

Any change to the current rate of company income tax or tax law in jurisdictions where Microba operates may impact on Microba Shareholder returns. Any changes to the current rates of income tax or tax law applying to Microba Shareholders, whether they are individuals, trusts or companies may similarly impact on Microba Shareholder returns. Current income tax laws may result in changes both beneficial and adverse to Microba Shareholder returns to tax attributes (including but not limited to future deductions, tax losses, and available tax credits and offsets) of Microba.

Shareholders are subordinated and unsecured investors

In a winding up of Microba, Microba Shareholders' claims will rank after the claims of creditors preferred by law, secured creditors and general creditors. Microba Shareholders' claims will rank equally with claims of holders of all other ordinary shares. If Microba were to be wound up and, after the claims of creditors preferred by law, secured creditors, general creditors and holders of subordinated instruments (if any) are satisfied, there are insufficient assets remaining, you may lose some or all of the money you invested in ordinary shares.

Future issues of debt or other securities by Microba

Microba may, at its absolute discretion, issue additional securities in the future that may rank ahead of, equally with or behind ordinary shares, whether or not secured. Any issue or conversion of securities may dilute the relative value of existing ordinary shares and affect your ability to recover any value in a winding up. An investment in ordinary shares confers no right to restrict Microba from raising more debt or issuing other securities (subject to restrictions imposed under the ASX Listing Rules), to require Microba to refrain from certain business changes, or to require Microba to operate within potential certain ratio limits.

An investment in ordinary shares carries no right to participate in any future issue of securities (whether equity, hybrid, debt or otherwise), other than future pro rata issues if the Microba Shareholder is eligible to participate in the pro rata issue under relevant laws. No prediction can be made as to the effect, if any, such future issues of debt or other issues of securities may have on the market price or liquidity of ordinary shares.

Other external events

Acts of terrorism, an outbreak of international hostilities, new or increased tariffs, labour strikes, civil wars or fires, floods, earthquakes, cyclones and other natural disasters (including where the frequency and severity of such events increase as a result of the effects of climate change), and outbreaks of disease and biosecurity threats may cause an adverse change in investor sentiment with respect to Microba specifically or the share market more generally, which could have a negative impact on the value of an investment in ordinary shares.

7.4 Speculative investment

The risk factors described above, and other risks factors not specifically referred to, may have a materially adverse impact on the performance of Microba and the value of the Securities.

Prospective investors should consider that an investment in Microba is highly speculative.

There is no guarantee that the Securities offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Securities.

Before deciding whether to subscribe for Securities under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
