

## Emefcy Group Limited (ASX: EMC) Expands Team with Key Board and Executive Appointments

April 5, 2016

**Melbourne, Australia and Caesarea, Israel:** The Directors of Emefcy Group Limited (ASX: EMC), a global leader in energy efficient waste water treatment, are delighted to announce the appointment of Mr Robert Wale as a Non-Executive Director, effective immediately. Mr. Phillip Hains will retire from the Board effective immediately.

Emefcy also confirms the appointment of Mr Uri Keynan as its Vice President of Global Sales & Business Development and Ms. Ashleigh Talberth as Special Advisor for Strategic Projects.

**Robert Wale** brings over 30 years of executive-level experience in the global water industry including strategic, business, sales, marketing and operations roles in Australia, USA, China and throughout the Asia Pacific region. Rob has managed international businesses ranging from early-stage start-ups to companies generating revenues of \$400m per annum. He has served as General Manager of the Water Group at Lucas Engineering & Construction, Vice President for Asia-Pacific for Siemens Water Group, Managing Director for Veolia Water Services & Systems, Vice President, Sales & Marketing Asia-Pacific for US Filter, and General Manager and Vice President Technical and Business Development at Memtec Ltd. Since 2008, he has been Managing Director of BlueSand Consulting Pty Ltd, developing & reviewing water business strategies for companies, investors, multinational companies and banks.

**Uri Keynan** is a former senior executive at Alfa Laval, a Forbes Global 2000 Company focused on energy optimization and environmental protection systems. With a proven track record of success at the multibillion dollar entity, Uri led the sales of the Process Technology Division in North Andina, Central America and the Caribbean. Prior to that, as Vice President, he led the company's entry and subsequent immense success in China, building one of Alfa Laval's fastest growing business units.

"Uri is a well respected and experienced senior executive with deep market sector knowledge. Uri has regional, as well as global experience in the Americas, Caribbean and China, three core geographies driving our growth and where Emefcy has developed a strong pipeline of potential projects" said Eytan Levy, Emefcy CEO.

Also appointed as Special Advisor for Strategic Projects is **Ms. Ashleigh Talberth** who will split her time between Israel and the U.S.

Ashleigh is a co-founder of the Israel-California Green-Tech Partnership, a joint Israel – State of California partnership focused largely on sustainable water technology solutions for California. Former President Clinton is among the strongest supporters of this initiative. Emefcy's SABRE system represents a key energy efficient waste water treatment solution for California's agriculture industry where farming claims a massive

55% of water usage Statewide. This partnership effort was the subject of a “Water Summit” held on 23 March 2016 at the White House where a US\$5 billion dollar private investment in new water technology solutions was announced.

“On behalf of the Board we thank Phillip Hains for his contribution in the roles of Non-Executive Director and Joint Company Secretary, especially during the transition of Savcor Group Limited to acquire Emefcy Limited (Israel). As our pipeline of projects across all geographies grows, building an experienced senior leadership team is key to successfully implementing our global strategy at Emefcy. We look forward to leveraging Rob’s considerable water industry background to help us grow in Australia and other key geographies,” said Richard Irving, Executive Chairman of the Company. “We are thrilled with the appointments of Uri and Ashleigh as well as several high-quality hires in team leadership, project management and marketing communications. They will enhance our range of available skills, expand our reach and ensure the implementation of our global ambitions.”

**About Emefcy Group Limited (EMC)**

Emefcy offers a commercially-proven wastewater treatment solution potentially disrupting large existing markets and addressing the growing global need for clean water. Its initial technology, SABRE – The Spiral Aerobic Biofilm Reactor is a modular decentralised wastewater treatment solution using 90% less energy than conventional technology. Future generation SABRE2 and SUBRE are higher capacity solutions being developed for broader markets. Emefcy’s future technology under development, EBR - The Electrogenic Bioreactor will harvest electricity from highly-loaded industrial wastewater that is typically very costly to treat. The energy’s value has the potential to completely offset other treatment operating costs.
