8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The Company has confirmed a viable operational model for gold mining and production, set up the full range of machinery and equipment in optimal condition, and also developed a stable and good relationship with the mining community during the gold trial program. The Company expects and continues to work to bring new investment or partners on board to inject cash or provide machinery and equipment for ongoing and upcoming projects to formally initiate full scale mining.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: The Company has confirmed a stable model for gold mining operation via the several-month trial gold production program, and the Company is continuously actively looking forward to new capital injections.

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*

**SOON MINING LIMITED (ASX: SMG)**

**QUARTERLY ACTIVITIES REPORT  
FOR THE QUARTER ENDED 30 June 2022**

**Kwahu Praso Project (100% SMG)**

During the quarter, Soon Mining Limited ("SMG" or the "Company") continues its trial gold production program at its flagship Kwahu Praso project in Ghana. Due to the bad general environment, the trial gold production was periodically terminated at the end of June.

The Company has confirmed a viable operational model for gold mining and production, set up the full range of machinery and equipment in optimal condition, and also developed a stable and good relationship with the mining community during the several-month gold trial program that began in late September last year. However, due to the impact of global financial environment, major operating costs including machine lease increases, rising oil prices and other related labor and material costs, the Company is currently overstretched in terms of capital. The Company has temporarily stopped mining activities pending the addition of new working capital.

The Company expects and continues to work to bring new investment or partners on board to inject cash or provide machinery and equipment for ongoing and upcoming projects to formally initiate full scale mining. However, the prolonged suspension of trading in SMG's stock has caused potential partners to pull back, making it more difficult for new capital to be brought in or for a mining partnership to be formed.

With the current temporary suspension of mining activities, the Company will continue to conduct exploration activities in the hope of finding areas of higher grade at minimal cost and making better preparations for formal mining in the future.

**Disclosure of Information relating to Listing Rule 5.3**

5.3.1: Refer to the 'Quarterly Activities Report' above for more details.

5.3.2: There are no existing activities relating to production as at 30 June 2022.

5.3.3: The Company held a project near Kwahu Praso in the Kwahu South District, which is in the Eastern Region of Ghana. It is approximately 130 km northwest of Accra, the capital of Ghana.

The Project concession covers an area of 82.74 km<sup>2</sup> including 63.0 km<sup>2</sup> within the mining lease area and the surrounding 19.74 km<sup>2</sup> retained under a prospecting license. The mining lease has a mining tenure of 14 years with a current expiry date of 11 July 2027. The prospecting license is currently in the process of renewal.

There were no mining tenements acquired or disposed of during the quarter.

There are no beneficial percentage interests held in farm-in or farm-out agreements at the end of the quarter.

There were no beneficial percentage interests in farm-in or farm-out agreements acquired or disposed of during the quarter.
