Uscom appoints new Company Secretary

Sydney, Australia: 24th May 2016: Uscom (ASX code: UCM) (the **Company** or **Uscom**), a revenue stage, cardiovascular and pulmonary health technology company, today announced the appointment of Mr Brett Crowley as Company Secretary.

Mr Crowley is a practicing solicitor and a former Partner of Ernst & Young in Hong Kong and Australia, and of KPMG in Hong Kong, and has worked in China establishing and managing JV companies there. Mr Crowley is an experienced chairman, finance director and company secretary of ASX-listed companies, and is a former Senior Legal Member of the NSW Civil and Administrative Tribunal.

Mr Crowley has over 30 years' experience in advising companies on taxation, corporate strategy, international structuring, capital raising and commercial negotiations.

Mr Crowley replaces Ms Catherine Officer who has resigned as Uscom Company Secretary after 3 years, to take up a new role with an NFP organisation.

Uscom CEO Associate Professor Rob Phillips said, *"Brett's appointment is another step in the globalization of Uscom. His experience and understanding of corporate law in China will be particularly valuable as we expand our reach and distribution there. His understanding of cross-border corporate structures will also guide our next steps as we plan to bring two new product suites to global markets in FY 2017. Increasingly we are in discussion with large multinationals and Brett's experience will be vital to ensure that we maximize value from negotiations to distribute, sell and license our practice leading technologies. We thank Catherine for her support and service over the last 3 years and wish her well in her new role."*

Uscom manufactures and markets the USCOM 1A, the Uscom BP+, and Uscom SpiroSonic digital ultrasonic spirometry technologies. These premium digital devices are changing the way we diagnose and treat cardiovascular and pulmonary diseases, including hypertension, heart failure, asthma, COPD and sleep disorders. The products are integral for optimising management of sepsis, guidance of fluid, inotropes and vasoactive therapies in critical care monitoring, and in clinical and home care delivered asthma and COPD medications.

About Uscom

Uscom Limited (UCM) is an ASX listed innovative medical technology company specialising in development and marketing of premium non-invasive cardiovascular and pulmonary medical devices. Uscom has three practice leading suites of devices in the field of cardiac, vascular and pulmonary monitoring; the USCOM 1A, Uscom BP+ and the Uscom SpiroSonic spirometers. All Uscom devices are premium resolution, and deploy innovative and practice leading technologies with FDA, CE, CFDA and TGA regulatory approval, and which are currently being marketed into global distribution networks.

The USCOM 1A is a simple to use, cost-effective and non-invasive advanced haemodynamic monitor that measures cardiovascular function, detects irregularities and is used to guide treatment. The USCOM 1A device has major applications in Paediatrics, Emergency, Intensive Care Medicine and Anaesthesia, and is the device of choice for management of adult and paediatric sepsis, hypertension, heart failure and for the guidance of fluid, inotrope and vasoactive cardiovascular therapy.

The Uscom BP+ is a supra-systolic oscillometric Central Blood Pressure monitor which measures blood pressure and blood pressure waveforms only previously available using cardiac catheterisation. The Uscom BP+ replaces conventional and more widespread sub-systolic blood pressure monitors, and is the emerging standard of care measurement in hypertension, heart failure and vascular health. The Uscom BP+ provides a highly accurate and repeatable measurement of central and brachial blood pressure and pulse pressure waveforms using a familiar upper arm cuff. The BP+ is simple to use and requires no complex training with applications in hypertension, heart failure, intensive care, general practice and home care.

Uscom SpiroSonic digital ultrasonic spirometers are high fidelity, digital, pulmonary function testing devices based on multi path ultrasound technology. They are simple and accurate to use and provide research quality pulmonary function testing in small hand held devices that can be used in research, clinical and home care environments. The devices are specialised for assessment of COPD, sleep disordered breathing, asthma, industrial diseases and monitoring of pulmonary therapeutic compliance.
