Helix Resources Limited (ASX:HLX) is pleased to announce that drilling has commenced at the Company's 100% owned Blanco y Negro Project in Region IV, Chile.

A program of up to 7 Reverse Circulation (RC) holes for up to 1,000m is planned. Drilling will test a further 250m of strike of the main shear target and shallow zones within the known mineralised envelope to improve geological knowledge and confirm grade continuity closer to surface.

The program is expected to be completed during August with assay results to follow.
