## QUARTERLY UPDATE ENDED MARCH 31<sup>st</sup> 2020

In releasing the Quarterly 4C Report today, PurifloH Limited (PO3, PurifloH or Company) (ASX: PO3; OTCQX: PUFLF) provides the following additional information.

The Company is pleased to report that, despite some minor interruption to its activities due to the COVID-19 crisis, product development and market research activities are continuing to progress. This includes manufacture and independent validation of prototypes to be used in OEM trials and the commissioning of an Air Industry advisor to assist with commercial strategy.

As a consequence of these activities, over the next two quarters PurifloH expects that expenditures will continue at similar or slightly elevated levels to that of the quarter ended March 31, 2020.

While continuing to work on the successful commercialization of the Free Radical Generation ("FRG") technology, the Company believes that it has sufficient access to sources of additional capital as may be required to fund its continuing operations.

As previously advised to shareholders, the Company has confidence in the viability and commercial validity of its FRG technology while understanding that established markets can be conservative in their acceptance of disruptive technology.

### Forward-Looking Statements

*This quarterly update may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on the current beliefs and expectations of the of the Company's management and are subject to significant risks and uncertainties. Actual results may differ from those set forth in the forward-looking statements. The Company's actual results could differ materially from those described in the forward-looking statements depending on various factors. Other than as required under applicable securities laws, the Company does not undertake to update the forward-looking statements to reflect the impact of circumstances or events that may arise after the date of the forward looking statements.*
