Supplementary Prospectus No. 3 to the Prospectus dated 2 August 2013

iShares Asia 50 ETF (ASX: IAA)

Dated 24 June 2014

iShares Trust ARBN 125 632 411

This Supplementary Prospectus No. 3 supplements the prospectus dated 2 August 2013 ("Prospectus"), as amended by Supplementary Prospectus No. 1 dated 2 October 2013 ("Supplementary Prospectus No. 1") and Supplementary Prospectus No. 2 dated 18 December 2013 ("Supplementary Prospectus No. 2"), for the iShares Asia 50 ETF (the "Fund"), issued by iShares Trust (the "Company") and relating to shares of the Company referable to the Fund and CDIs over such shares. **This Supplementary Prospectus No. 3 must be read together with the Prospectus, Supplementary Prospectus No. 1 and Supplementary Prospectus No. 2.**

A copy of this Supplementary Prospectus No. 3 has been lodged with the Australian Securities and Investments Commission ("ASIC") and released to the Australian Securities Exchange ("ASX"). Neither ASIC nor ASX take any responsibility for the contents of this Supplementary Prospectus No. 3.

The Company does not consider the modifications in this Supplementary Prospectus No. 3 to be materially adverse from the point of view of an investor.

This Supplementary Prospectus No. 3 is dated 24 June 2014 and was lodged with ASIC on that date and sets out the following changes in respect of the Fund:

Purpose of this Supplementary Prospectus No. 3

This Supplementary Prospectus No. 3 sets out changes to the Fund's Statement of Additional Information ("SAI"). In this Supplementary Prospectus No. 3, the updates to the SAI relate solely to the Fund and therefore the relevant amendments below refer to the Fund in the singular.

Changes to the Statement of Additional Information

The SAI, lodged with ASIC in respect of the Fund and referred to in the Prospectus, is amended as follows:

A. Change to General Description of the Trust and the Fund

The final sentence of the third paragraph of the section titled "General Description of the Trust and the Fund", on page 1 of the SAI, is deleted and replaced with the following"

"Creation Units typically are a specified number of shares, generally ranging from 50,000 to 250,000 shares or multiples thereof."

B. Change to Investment Strategies and Risks

The section titled "Investment Strategies and Risks", on pages 2 to 8 of the SAI, is amended as follows:

- i. the following new paragraph is added to page 2 of the SAI immediately following the fourth paragraph of the section:

"Although the Fund does not seek leveraged returns, certain instruments used by the Fund may have a leveraging effect as described below."
- ii. the subsection titled "Lending Portfolio Securities", on page 5 of the SAI, is deleted and replaced with the following:

"Lending Portfolio Securities. The Fund may lend portfolio securities to certain borrowers determined to be creditworthy by BFA, including borrowers affiliated with BFA. The borrowers provide collateral that is maintained in an amount at least equal to the current market value of the securities loaned. No securities loan shall be made on behalf of the Fund if, as a result, the aggregate value of all securities loans of the Fund exceeds one-third of the value of the Fund's total assets (including the value of the collateral received). The Fund may terminate a loan at any time and obtain the return of the securities loaned. The Fund receives the value of any interest or cash or non-cash distributions paid on the loaned securities.

With respect to loans that are collateralized by cash, the borrower may be entitled to receive a fee based on the amount of cash collateral. The Fund is compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Fund is compensated by a fee paid by the borrower equal to a percentage of the market value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of the Fund or through one or more joint accounts or money market funds, including those affiliated with BFA; such investments are subject to investment risk.

The Fund conducts its securities lending pursuant to an exemptive order from the SEC permitting it to lend portfolio securities to borrowers affiliated with the Fund and to retain an affiliate of the Fund as lending agent. To the extent that the Fund engages in securities lending, BlackRock Institutional Trust Company, N.A. ("BTC") acts as securities lending agent for the Fund, subject to the overall supervision of BFA. BTC administers the lending program in accordance with guidelines approved by the Trust's Board of Trustees (the "Board" or the "Trustees").

The Fund retains a portion of the securities lending income and remits a remaining portion to BTC as compensation for its services as securities lending agent. Securities lending income is equal to the total of income earned from the reinvestment of cash collateral (and excludes collateral investment fees as defined below), and any fees or other payments to and from borrowers of securities. As securities lending agent, BTC bears all operational costs directly related to securities lending. The Fund is responsible for fees in connection with the investment of cash collateral received for securities on loan in a money market fund managed by BFA; however, BTC has agreed to reduce the amount of securities lending income it receives in order to effectively limit the collateral investment fees the Fund bears to an annual rate of 0.04% until December 31, 2014 and 0.05% thereafter (the "collateral investment fees"). Such money market fund shares will not be subject to a sales load, redemption fee, distribution fee or service fee.

Pursuant to the current securities lending agreement:

- (i) the Fund retains 75% of securities lending income (which excludes collateral investment fees); however, commencing January 1, 2015 the Fund will retain 70% of securities lending income (which excludes collateral investment fees); and
- (ii) these amounts can never be less than 65% of the sum of securities lending income plus collateral investment fees.

Under the securities lending program the Fund is categorized into a specific asset class. The determination of a Fund's asset class category (fixed income, domestic equity, international equity or fund-of-funds), each of which may be subject to a different fee arrangement, is based on a methodology agreed to between the Trust and BTC.

In addition, commencing the business day following the date that the aggregate securities lending income earned across the Exchange-Traded Fund Complex (as defined under "Management – Trustees and Officers") in a calendar year exceeds the aggregate securities lending income earned across the Exchange-Traded Fund Complex in calendar year 2013 (the "Hurdle Date") (or lesser amount as may be agreed to by the Fund and BTC), the Fund, pursuant to the securities lending agreement, will receive for the remainder of that calendar year securities lending income as follows:

- (i) 80% of securities lending income (which excludes collateral investment fees); however, for the remainder of the calendar year following any Hurdle Date after January 1, 2015, the Fund will retain 75% of securities lending income (which excludes collateral investment fees) and

- (ii) these amounts can never be less than 65% of the sum of securities lending income plus collateral investment fees.

Securities lending involves exposure to certain risks, including operational risk (i.e., the risk of losses resulting from problems in the settlement and accounting process), "gap" risk (i.e., the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. If a securities lending counterparty were to default, the Fund would be subject to the risk of a possible delay in receiving collateral or in recovering the loaned securities, or to a possible loss of rights in the collateral. In the event a borrower does not return the Fund's securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated, plus the transaction costs incurred in purchasing replacement securities. This event could trigger adverse tax consequences for the Fund. The Fund could lose money if its short-term investment of the collateral declines in value over the period of the loan. Substitute payments for dividends received by the Fund for securities loaned out by the Fund will not be considered qualified dividend income. BTC will take into account the tax effects on shareholders of this difference in connection with the Fund's securities lending program. Substitute payments received on tax-exempt securities loaned out will not be tax-exempt income."

C. Change to Determination of Net Asset Value

The following new section, titled "Determination of Net Asset Value", is added to page 64 of the SAI immediately following the section titled "Investment Advisory, Administrative and Distribution Services".

"Determination of Net Asset Value

Valuation of Shares. The NAV of the Fund is generally calculated as of the close of regular trading hours on the NYSE (currently 4:00 p.m. Eastern Time) on each business day the NYSE is open. Valuation of securities held by the Fund is as follows:

Equity Investments. Equity securities traded on a recognized securities exchange (e.g., NYSE), separate trading boards of a securities exchange or through a market system that provides contemporaneous transaction pricing information (an "Exchange") are valued using information obtained via independent pricing services, generally the Exchange closing price, or if an Exchange closing price is not available, the last traded price on that Exchange prior to the time as of which a Fund's assets or liabilities are valued. However, under certain circumstances other means of determining current market value may be used. If an equity security is traded on more than one Exchange, the current market value of the security where it is primarily traded generally will be used. In the event that there are no sales involving an equity security held by the Fund on a day on which the Fund values such security, the prior day's price will be used, unless, in accordance with valuation procedures approved by the Fund's Board (the "Valuation Procedures"), BlackRock determines in good faith that such prior day's price no longer reflects the fair value of the security, in which case such asset would be treated as a Fair Value Asset (as defined below).

Fixed Income Investments. In accordance with the Valuation Procedures, fixed income securities for which market quotations are readily available are generally valued using such securities' most recent bid prices provided directly from one or more broker-dealers, market makers, or independent third-party pricing services, each of which may use matrix pricing and valuation models, as well as recent market transactions for the same or similar assets to derive values. The amortized cost method of valuation may be used with respect to debt obligations with sixty days or less remaining to maturity unless BlackRock determines in good faith that such method does not represent fair value. Loan participation notes are generally valued at the mean of the last available bid prices from one or more brokers or dealers as obtained from independent third party pricing services. Certain fixed income investments, including asset-backed and mortgage-related securities, may be valued based on valuation models that consider the estimated cash flows of each tranche of the entity, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Fixed income securities for which market quotations are not readily available may be valued by third-party pricing services that make a valuation determination by securing transaction data (e.g., recent representative bids), credit quality information, perceived market movements, news, and other relevant information and by other methods, which may include consideration of yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions.

Options, Futures, Swaps and Other Derivatives. Exchange-traded equity options for which market quotations are readily available are valued at the mean of the last bid and ask prices as quoted on the Exchange or the board of trade on which such options are traded. In the event that there is no mean price available for an exchange traded equity option held by a Fund on a day on which the Fund values such option, the last bid (long positions) or ask (short positions) price, if available, will be used as the value of such option. If no such bid or ask price is available on a day on which the Fund values such option, the prior day's price will be used, unless BlackRock determines in good faith that such prior day's price no longer reflects the fair value of the option in which case such option will be treated as a Fair Value Asset (as defined below). Over-the-counter ("OTC") derivatives may be valued using a mathematical model which may incorporate a number of market data factors. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their settle price as of the close of such exchanges. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the Valuation Procedures.

Underlying Funds. Shares of underlying exchange-traded funds will be valued at their most recent closing price on an Exchange. Shares of underlying money market funds will be valued at their net asset value.

General Valuation Information. In determining the market value of portfolio investments, the Fund may employ independent third-party pricing services, which may use, without limitation, a matrix or formula method that takes into consideration market indexes, matrices, yield curves and other specific adjustments. This may result in the securities being valued at a price different from the price that would have been determined had the matrix or formula method not been used. All cash, receivables and current payables are carried on a Fund's books at their face value.

Prices obtained from independent third-party pricing services, broker-dealers or market makers to value the Fund's securities and other assets and liabilities are based on information available at the time the Fund values its assets and liabilities. In the event that a pricing service quotation is revised or updated subsequent to the day on which the Fund valued such security or other asset or liability, the revised pricing service quotation generally will be applied prospectively. Such determination will be made considering pertinent facts and circumstances surrounding the revision.

Certain types of securities, including many fixed income securities, trade infrequently and there may be no current market transactions or recent representative bids for such securities. To the extent that prices for such securities are not reflective of current market transactions or recent representative bids, the Fund will value such securities in good faith in accordance with the Valuation Procedures.

In the event that application of the methods of valuation discussed above result in a price for a security which is deemed not to be representative of the fair market value of such security, the security will be valued by, under the direction of or in accordance with a method specified by the Fund's Board as reflecting fair value. All other assets and liabilities (including securities for which market quotations are not readily available) held by the Fund (including restricted securities) are valued at fair value as determined in good faith by the Fund's Board or by BlackRock (its delegate) pursuant to the Valuation Procedures. Any assets and liabilities which are denominated in a foreign currency are converted into U.S. dollars at the prevailing rates of exchange at such times as may be determined by the Fund from time to time.

Certain of the securities acquired by the Fund may be traded on foreign exchanges or over-the-counter markets on days on which the Fund's net asset value is not calculated. In such cases, the net asset value of the Fund's shares may be significantly affected on days when investors can neither purchase nor redeem shares of the Fund.

Use of fair value prices and certain current market valuations could result in a difference between the prices used to calculate the Fund's NAV and the prices used in the Underlying Index, which, in turn, could result in a difference between the Fund's performance and the performance of the Underlying Index.

Fair Value. When market quotations are not readily available or are believed in good faith by BlackRock to be unreliable, the Fund's investments are valued at fair value ("Fair Value Assets"). Fair Value Assets are valued by BlackRock in accordance with the Valuation Procedures. BlackRock may reasonably conclude that a market quotation is not readily available or is unreliable if, among other things, a security or other asset or liability does not have a price source due to its lack of trading, if BlackRock believes in good faith that a market quotation from a broker-dealer or other source is unreliable (e.g., where it varies significantly from a recent trade, or no longer reflects the fair value of the security or other asset or liability subsequent to the most recent market quotation), where the security or other asset or liability is only thinly traded or due to the occurrence of a significant event subsequent to the most recent market quotation. For this purpose, a "significant event" is deemed to occur if BlackRock determines, in its reasonable business judgment, that an event has occurred after the close of trading for an asset or liability but prior to or at the time of pricing the Fund's assets or liabilities, and that the event is likely to cause a material change to the closing market price of the assets or liabilities held by the Fund. Non-U.S. securities whose values are affected by volatility that occurs in U.S. markets for related or highly correlated assets (e.g., American Depositary Receipts, Global Depositary Receipts or ETFs) on a trading day after the close of non-U.S. securities markets may be fair valued. On any date the NYSE is open and a foreign market or the primary exchange on which a foreign asset or liability is traded is closed, such asset or liability will be valued using the prior day's price, provided that BlackRock is not aware of any significant event or other information that would cause such price to no longer reflect the fair value of the asset or liability, in which case such asset or liability would be treated as a Fair Value Asset.

BlackRock, with input from the BlackRock Investment Strategy Group, will submit its recommendations regarding the valuation and/or valuation methodologies for Fair Value Assets to BlackRock's Valuation Committee. The Valuation Committee may accept, modify or reject any recommendations. In addition, a Fund's accounting agent periodically endeavors to confirm the prices it receives from all third-party pricing services, index providers and broker-dealers, and, with the assistance of BlackRock, to regularly evaluate the values assigned to the securities and other assets and liabilities held by the Fund. The pricing of all Fair Value Assets is subsequently reported to and, where appropriate, ratified by the Board.

When determining the price for a Fair Value Asset, the BlackRock Valuation Committee (or BlackRock's Pricing Group) will seek to determine the price that the Fund might reasonably expect to receive upon the current sale of that asset or liability in an arm's-length transaction on the date on which the assets or liabilities are being valued, not on what the Fund might expect to receive for selling the asset or the cost of extinguishing a liability at a later time or if it holds the asset or liability to maturity. Fair value determinations will be based upon all available factors that the Valuation Committee (or Pricing Group) deems relevant at the time of the determination, and may be based on analytical values determined by BlackRock using proprietary or third party valuation models.

Fair value represents a good faith approximation of the value of an asset or liability. When determining fair value of an asset, one or more of a variety of fair valuation methodologies may be used (depending on factors including the asset type). For example, the asset may be priced on the basis of the original cost of the investment or, alternatively, using proprietary or third-party models (including models that rely upon direct portfolio management pricing inputs and which reflect the significance attributed to the various factors and assumptions being considered). Prices of actual, executed or historical transactions in the relevant asset and/or liability (or related or comparable assets and/or liabilities) or, where appropriate, an appraisal by a third party experienced in the valuation of similar assets and/or liabilities, may also be used as a basis for establishing the fair value of an asset or liability. The fair value of one or more assets or liabilities may not, in retrospect, be the price at which those assets or liabilities could have been sold during the period in which the particular fair values were used in determining the Fund's net asset value. As a result, the Fund's sale or redemption of its shares at net asset value, at a time when a holding or holdings are valued at fair value, may have the effect of diluting or increasing the economic interest of existing shareholders.

The Fund's annual audited financial statements, which are prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP"), follow the requirements for valuation set forth in Financial Accounting Standards Board Accounting Standards Codification Topic 820, "Fair Value Measurements and Disclosures" ("ASC 820"), which defines and establishes a framework for measuring fair value under US GAAP and expands financial statement disclosure requirements relating to fair value measurements. Generally, ASC 820 and other accounting rules applicable to funds and various assets in which they invest are evolving. Such changes may adversely affect the Fund. For example, the evolution of rules governing the determination of the fair market value of assets or liabilities to the extent such rules become more stringent would tend to increase the cost and/or reduce the availability of third-party determinations of fair market value. This may in turn increase the costs associated with selling assets or affect their liquidity due to the Fund's inability to obtain a third-party determination of fair market value."

D. Change to Miscellaneous Information

The section titled “Miscellaneous Information”, on page 99 of the SAI, is amended by adding to the following new subsection to the end of the section:

“Investors’ Rights. The Fund relies on the services of its investment adviser and other service providers, including the distributor, administrator, custodian and transfer agent. Further information about the duties and roles of these service providers is set out in this SAI. Investors who acquire shares of the Fund are not parties to the relevant agreement with these service providers and do not have express contractual rights against the Fund or its service providers, except certain institutional investors that are Authorized Participants may have certain express contractual rights with respect to the Distributor under the terms of the relevant authorized participant agreement. Investors may have certain legal rights under federal or state law against the Fund or its service providers. In the event that an investor considers that it may have a claim against the Fund, or against any service provider in connection with its investment in the Fund, such investor should consult its own legal advisor.

By contract, Authorized Participants irrevocably submit to the non-exclusive jurisdiction of any New York State or U.S. federal court sitting in New York City over any suit, action or proceeding arising out of or relating to the authorized participant agreement. Jurisdiction over other claims, whether by investors or Authorized Participants, will turn on the facts of the particular case and the law of the jurisdiction in which the proceeding is brought.”

Terms used in this Supplementary Prospectus No. 3 have the same meanings as in the Prospectus, Supplementary Prospectus No. 1 and Supplementary Prospectus No. 2. Prior to investing in the Fund, a prospective investor must take into account and accept the foregoing information, as well as the information disclosed in the Prospectus, Supplementary Prospectus No. 1 and Supplementary Prospectus No. 2.

This Supplementary Prospectus No. 3 is prepared by, or on behalf of, the Company.

Signed for the purpose of section 351 of the Corporations Act 2001 (Cth):
