**ASX RELEASE****VECTION SIGNS \$2.6m AI AGREEMENT**

Vection Technologies Ltd (ASX:VR1, OTC:VCTNY), ("Vection" or the "Company"), the INTEGRATEDXR<sup>®</sup> company, is pleased to announce the signing of a \$2.6m agreement with Area12 Consulting. This collaboration aims to co-develop and implement an AI-driven safety compliance platform named SAFE-XR, tailored for a prominent industrial client in Italy

This marks the second strategic partnership between Vection and Area12 Consulting, building on the recently announced \$0.5m annual Algho software agreement (ASX: 12 May 2025). This expanding collaboration reflects robust partner confidence in Vection's AI capabilities and the scalability of its B2B2C enterprise model.

**HIGHLIGHTS:**

- Vection secures a \$2.6m agreement to deliver an AI & XR compliance platform for industrial safety inspections.
- Marks a second agreement with Area12 Consulting, expanding on the \$0.5m annual Algho license deal (ASX: 12 May 2025).
- Algho AI powers real-time voice interaction, regulation parsing, and contextual support through smart glasses.
- Smart glasses enable hands-free inspections with AR overlays, guided checklists, and remote expert collaboration.
- Includes a perpetual Algho license, 3-year support, and delivery of custom software and hardware.
- Strengthens Vection's position in AI-driven compliance and industrial automation amid rising global regulation.

**OVERVIEW**

SAFE- XR is a custom solution designed to digitise industrial safety inspections, leveraging artificial intelligence ("AI"), augmented reality ("AR"), and wearable technology. This project highlights Vection's capacity to scale AI implementations through reliable channel partners.

The system integrates smart glasses with real-time voice interaction powered by Algho's AI platform, allowing operators to execute audits hands-free. Users benefit from contextual guidance through natural language prompts and AR overlays, which streamline inspection processes and enhance accuracy. Algho's emotional intelligence adapts support based on user behaviour and environmental context.

Field teams can access interactive checklists, regulatory materials, and remote collaboration tools right within their line of sight, simplifying compliance workflows and minimising the necessity for expert on-site presence. A perpetual license for Algho, combined with a three-year technical support commitment, provides lasting value to the client.

This second agreement with Area 12 Consulting expands upon an existing \$0.5m annual recurring license partnership, broadening the collaboration from platform licensing to complete deployment in safety-critical operations. SAFE-XR strengthens Vection's position in AI-driven automation within regulated sectors.

Revenue from the \$2.6m agreement will be recognised in phased milestones throughout FY26. The project offers a three-year support and maintenance term, marking the initial contractual period. After this three-year phase, the agreement may be renewed on an annual basis. Either party may terminate the agreement by providing three months' written notice, effective at the end of the third year or any subsequent renewal term.

Gianmarco Biagi, Managing Director of Vection Technologies, commented: *"This second agreement with Area12 Consulting signifies the evolution of a strong strategic partnership. SAFE-XR fulfils the potential of AI and XR to revolutionise industrial safety management, making it more intelligent, efficient, and humane."*
