**Introduction**

**GBM Gold Limited (ASX: GBM) ("GBM Gold")** GBM Gold has entered into an agreement with V-Infinity Capital Ltd for a \$7.0 million Convertible Note that may be converted to shares at an issue price of \$0.006 per share. The main terms of this agreement had been reported in the March quarter Appendix 5B report. The Company is working with the lender to effect its first drawdown.

The judicial review hearings on the Company's appeal against the decision of Earth Resources (i) to increase the rehabilitation bond sum to be deposited by the Company and (ii) not to renew the mining licenses of the Company in the Bendigo Mine area was heard on 4 September 2020 before The Honourable Justice Ginnane in the Supreme Court of Victoria. At the end of a one day hearing judgement was reserved in the licence proceedings while the Company withdrew its Original Motion on the bond proceedings.

## 1.0 Mining and Exploration

Pending the outcome of the judicial review the Company was not able to undertake any mining activity during the quarter covered by this report.

- **Harvest Home (MIN 5510)**  
(50% Joint Venture with Truelight Mining Pty Ltd)

MIN 5510 is located approximately 5 kilometres north of Dunolly in Central Victoria on the eastern margin of the Goldsbrough – Wehla Shear. A broad zone of gold mineralisation trending north-northwest through MIN 5510 is approximately 3.5 km long and up to 0.4 km wide. Moran's Luck, Harvest Home, Mother O'Gold and Appleton's Gold mines have produced in excess of 60,000 oz. (1,860kg) of gold between them (Whitehouse and Watts 2009). A number of discrete smaller prospects are also contained within the tenement. The historical mine workings reached depths of up to 122m. These areas are being re-evaluated based on the results of the new geological interpretation.

The production pit will encompass and extend the existing bulk sample pit. Approximately 44,000 tonnes of ore will be excavated in the next phase of the operation. Contiguous with this, a selective program of costeaning and in-fill drilling will build resource potential at Harvest Home and other prospects on the tenement. Mining will be conventional drill & blast utilising hydraulic excavator and articulated trucks. Ore will be hauled from the pit to a stockpile location on site for progressive transfer to an offsite processing facility. The work plan was approved by Earth Resources Regulation in September 2019.

Mining operation would commence as soon as working capital becomes available.

- **McIntyre (MIN 5093)**

The McIntyre project is located 50 kilometres northwest of Maldon just to the east of the Goldsbrough Wehla Shear Zone. Mining Licence MIN 5093 is centred on the Matrix Reef Mine, which is part of the Berlin goldfield. GBM is awaiting finalisation of the transfer of the tenement.

## 2.0 Activities Planned for the September Quarter

Mining operation at the Open Pit Mine expansion at Harvest Home would commence as soon as working capital becomes available.
