Exploration Update:

During the quarter exploration work consisted of continuous near mine compilation work as well as developing localized exploration drill programs to implement this summer to optimize long term mine planning.

The Company completed the acquisition of Altona Mining Limited on April 18, 2018. With the acquisition the Company holds minerals tenures over approximately 4,000km² along the Rose Bee fault complex spanning 250 km that is a dominate land position in the Eastern Mt. Isa Inlier area. The Company is planning to follow up on some of the successful drilling from Altona's 2017 drilling program on the Companion, Veiled and Quamby prospects. These prospects add to an emerging cluster of copper-gold discoveries south of the proposed Eva Copper Project.
