

## ASX Release – 1 March 2017

### Middle Island completes A\$1.76m Placement to progress Exploration & Development Strategy for Sandstone Gold Project in Western Australia

#### Placement

Middle Island Resources Ltd (**Middle Island** or the **Company**) is pleased to announce that the Company has received binding commitments from existing institutional and sophisticated shareholders for a private placement of 117,256,757 fully paid ordinary shares at A\$0.015 per share to raise \$1,758,851 (before costs) (**Placement**). The proceeds from the Placement are to be used to further advance the revised exploration and development strategy for the Company's wholly-owned Sandstone Gold Project in Western Australia, and for working capital.

Bell Potter Securities Limited acted as Lead Manager to the Placement which was made pursuant to the 15% placement capacity under ASX Listing Rule 7.1 and additional 10% placement capacity in accordance with ASX Listing Rule 7.1A.

#### Sandstone Gold Project 2017 Exploration & Development Strategy

The additional funding will allow Middle Island to implement the 2017 exploration and development strategy (refer ASX release 23 February 2017) with a view to recommissioning the Sandstone Gold Operation in Western Australia at the earliest opportunity. The initial priority, to identify near-term, higher grade gold resources that can be incorporated into the front end of the production schedule for the Sandstone mill, will be pursued via a multi-faceted approach in order to increase the likelihood of success as follows:-

- Testing of higher priority gold targets identified in the empirical 'weights of evidence' targeting study;
- Complete an underground mining Concept Study on the high grade, BIF-hosted deposit adjacent to the Two Mile Hill tonalite, to be completed in March 2017;
- RC drilling of greenfields targets, including Macintyre, Shillington West and Turley prospect which is scheduled to commence in March 2017;
- Diamond core drilling to assess deeper elements of the three BIF units, intruded by the Two Mile Hill tonalite, which is scheduled to commence in March 2017;
- Continue to review and negotiate on a number of adjacent properties with a view to accessing additional quantified gold resources and/or exploration targets, and;

- Reviews and discussions with the owners of stranded third-party gold deposits located within the broader Sandstone district to assess toll milling or production sharing opportunities via Middle Island's Sandstone processing plant.

The Company remains confident that a combination of these approaches will ultimately lead to a successful outcome. Each aspect of the strategy will be regularly reassessed to ensure funding is directed appropriately.

## Comment

The Directors of Middle Island are extremely grateful for the continued strong support from key shareholders, who have once again proven to be exceedingly loyal.
