June 2024 Quarterly Activities Report

NewPeak Metals Limited (NPM:ASX) (NewPeak, NPM or the Company) is pleased to provide a summary of the Company's activities for the quarter ended 30 June 2024.

CORPORATE STRATEGY

NewPeak achieved some significant milestones during the quarter as a part of the Company's Rejuvenation Strategy, including project acquisitions, divestments, cleaning up the balance sheet and board and management changes. The Company has further plans in place and is now well on the way to concluding these plans by the end of 2024.

PROJECT ACQUISITIONS

Canada

George River Uranium & REE Project – as announced on 15 July 2024, NewPeak has concluded the acquisition of the George River Uranium, Rare Earth Elements (REE) and Scandium project (George River Project):

- The George River Project consists of a large portfolio of claims totalling an expansive area of 23,184 hectares across Quebec and Labrador, Canada, residing in NewPeak's 100% owned Quebec registered subsidiary, NewPeak Metals (Canada) Ltd.
- For this acquisition NewPeak issued \$500,000 in NPM shares at an issue price of 1.5 cents to the vendors, Ms Emma Fairhurst and Wayne Holmstead, and granted them a 2% net smelter royalty, with buyout provisions, on any future production.
- Mineralisation highlights (as identified in historic exploration programs) from the four main project areas: Stewart Lake, Nanuk, Strange Lake North and Crater Lake include:
 - **Stewart Lake project** – four zones of anomalous Uranium mineralisation identified within an area of **12 kms by 6 kms**. Outcrop results include high grade Uranium mineralisation of **0.8% U₃O₈** in the Centurion Ridge and **0.46% U₃O₈** in the Kogaluk Zone.
 - **Nanuk project** – three zones of high anomalous Uranium mineralisation identified within an area of **10 kms by 4 kms**, with results as high as **1.18% U₃O₈**.
 - **Crater Lake project** – adjacent to Misery Lake Deposit where Imperial Mining have identified anomalous Total Rare Earth Oxides (TREO) and Scandium mineralisation within a high level syenite porphyry intrusion. Crater Lake has similar geology and sampling has recorded a maximum of **23.9% TREO** and **985 ppm Scandium**.
 - Tenements are close to **Torngat Metals Inc. Strange Lake Rare Earth and Zircon Project** and Vale's tier-1 Voisey Bay nickel mine.
- Wayne Holmstead, an experienced Canadian geologist and the person responsible for staking the ground, has been engaged to lead a team to immediately commence exploration on the properties, with objectives to move the project towards defining JORC mineral resources. The program has commenced with an evaluation of all historical exploration data, with field work intended later this year.

Australia

Treuer Range Uranium-Vanadium Project – *as announced on 19 July 2024*, NewPeak has entered into a binding term sheet to acquire the Treuer Range Uranium-Vanadium Project in the Northern Territory, Australia (Treuer Range Project):

- The Treuer Range Project is located in the Northern Territory's Ngalia Basin. It surrounds the Bigrlyi Uranium-Vanadium Deposit where a JORC Indicated and Inferred mineral resource of 7.5 MT grading 0.13% U_3O_8 and 1.12% V_2O_5 has been defined within the Mount Eclipse Sandstone. (The Bigrlyi Deposit is held by other parties and is excluded from the Treuer Range project).
- The consideration for the acquisition is \$350,000 by way of the issue of 23,333,333 NPM shares at an issue price of \$0.015 (1.5 cents) per share to the vendor or its nominee, and the granting of a 2% net smelter royalty, with buyout provisions.
- The vendor of the Treuer Range Project, Yacimiento Pty Ltd, had determined the ground has the potential for structural repetitions and strike extensions of Bigrlyi-style Uranium-Vanadium mineralisation, with much of the project's southern portion having concealed drainages that may be prospective for paleochannel-type Uranium mineralisation.
- Airborne radiometric data shows several anomalous responses associated with the Mount Eclipse Sandstone in the central and eastern parts of the project, which mirror the radiometric footprint of Bigrlyi. Also, there are several subtle Uranium responses associated with Quaternary sediments that overlie the Mount Eclipse Sandstone in the project's western, central, and eastern parts. These responses justify further investigations.
- Transaction documentation is being prepared with a view to progressing to completion of the transaction within several weeks.

PROJECT CHANGES

Finland

Somero & Tampere Gold Project – *as announced on 18 June 2024*, NewPeak has settled the transaction of the sale of its total interest in the Company's Finnish subsidiary companies NewPeak Finland Oy and Kultatie Holding Oy, which hold the portfolio of Finland Gold permits.

NewPeak has been issued CAD\$1,000,000 ordinary shares in Golcap Resources Corp (4,347,826 GCP:CSE shares) as consideration of settlement and will be paid CAD\$100,000 cash during August 2024. This represents 17.6% of Golcap's issued capital and makes NewPeak a substantial shareholder. NewPeak is restricted from trading the shares until October 2024.

Golcap has also granted NewPeak a milestone payment of CAD\$1.5million in cash or shares on reporting of a JORC Indicated 500,000 oz gold resource at any of the tenements.

Sweden

Sweden Strategic Metals Project – *as announced on 24 June 2024*, NewPeak has entered into a Binding Term Sheet to sell 100% of its interest in the Company's Finnish subsidiary company (NewPeak Sweden Oy) which holds the portfolio of Sweden Strategic Mineral permits.

The sale is being made to 1459992 BC Ltd, a Canadian unlisted private company run by corporate resource entrepreneur Ms Emma Fairhurst. The transaction has been structured to close by 31 August 2024. NewPeak understands 1459992 BC will assign its rights from the private company into a publicly listed Canadian entity by transaction close.

As consideration for the sale, NewPeak will receive:

- Upon execution of the Transaction Documents, NewPeak will receive CAD\$250,000 in shares of the Canadian listed company, then

- A milestone payment will be paid to NewPeak of CAD\$750,000 in cash or shares on reporting a JORC Inferred Resource of minimum 3mt at 0.3% WO₃Eq, i.e. a resource of either just Tungsten (WO₃) or a combination of minerals totalling this resource amount.

Argentina

Las Opeñas Gold Project and Cachi Gold Project – The Argentina Gold projects are the only remaining historical assets for which the Company has not secured divestment. The Company is in discussions for potential divestment, though NewPeak maintains its position that these projects have good potential, and it may progress them itself depending on funding availability.
