2 CHAIRMAN'S LETTER

27 October 2021

Dear Shareholders

SHARE PURCHASE PLAN OFFER

On behalf of the Board, we are pleased to offer you the opportunity to participate in the Share Purchase Plan (SPP) recently announced by Chase Mining Corporation Limited (**the Company or CML**)).

The offer

The SPP provides Eligible Shareholders, being Shareholders as at 7.00 pm (Sydney time) on 26 October 2021 (**Record Date**) with a registered address in Australia or New Zealand, with an opportunity to apply for up to \$30,000 in new Shares irrespective of the number of Shares they currently own. The offer price is \$0.016, being a 8% discount to the volume weighted average market price for the Company's Shares calculated over the last 5 days on which sales in the Company's Shares were recorded before the SPP was announced.

The SPP targets to raise a maximum of \$1,000,000, and the Board has the discretion to scale back applications accordingly.

Background and Planned Activities

Currently the Company has three active projects, two in Australia and one in Quebec Canada. All three have been affected to some degree by COVID-19 related restrictions.

In Australia, the Company continues to progress its Torrington Minerals (NSW) Topaz and Tungsten Project where it has undertaken advanced exploration on expansive occurrences of silicite which nominally consists of 80% quartz and 20% topaz with minor tungsten. Due to its high SG, the topaz can simultaneously be recovered during gravity separation used to recover tungsten. Topaz is an alumina silicate mineral ($\text{Al}_2\text{SiO}_4(\text{FOH})_2$), which given its hardness, can be used in abrasive applications and as a raw material for castable refractory and ceramic production. The latter was the subject of an earlier CSIRO study. Previous incomplete research at the UNSW also showed it was possible to produce mullite fibre from the topaz. This occurs due to its unique composition resulting in the formation of a gas phase (akin to sublimation) instead of a liquid phase which most solid materials go through during 'melting'.

This potential of producing mullite fibres from topaz formed the platform for CML's wholly owned subsidiary TopFibre Pty Ltd as the industry partner through an Australian Research Council (ARC) Linkage Grant to form a collaboration research agreement with the UNSW to investigate the mullite fibres application as a filler and reinforcing in composite materials. This almost 4-year research project which ended earlier this year, resulted in the demonstration of proof-of-concept that the Torrington topaz derived mullite-fibre reinforced composites can be processed into MMCs using different alloys suitable for different products. These applications include the automotive, mining, chemical, and military industries. Following this work, a range of commercial trajectories became apparent.

After receiving final copies of all the research reports, the Company in conjunction with third-party consultants agreed it is worthwhile to continue with the topaz derived mullite fibre research. The Company management has been undertaking a review of the cumulative research results, final report and recommendations before deciding on the best strategy going forward. This includes how best to finance the future research to progress the proof-of-concept outcomes with the best commercial application potential and to complete patenting thereof.

Also in Australia, The Company made a strategic investment of \$600,000 to become a 40% shareholder in the private Queensland focused advanced exploration Company Red Fox Resources Pty Limited (Red Fox) in November 2020. Red Fox Resources

As previously announced (ASX Announcement 3 November 2020), CML invested

Progress during the year has been slow due to a range of issues, but field work has now commenced to generate targets for drilling in early 2022.

In Quebec (Canada), the Company has 100% ownership of two Project Areas, namely Alotta (Ni, Cu, PGEs) and Lorraine (predominantly Au) where since acquiring the holding company in October 2018, CML has conducted exploration, geophysical surveys and drilling. Based on the outcome of a very thorough evaluation process and data review assessment, the projects are currently on hold and no immediate additional drilling is planned. The Directors and management continue to review how best to extract value for the Company from these Project areas.

New project opportunities and planned activities

As a result of the Board's decision to focus on acquiring exploration assets with large scale potential to add value for all shareholders, two agreements have been entered into which will give the Company exposure to highly prospective tenements in Queensland.

Although there are no existing mineral resources within the tenements, they have indicated potential for gold, copper, zinc, lead, silver, nickel, cobalt and bauxite mineralisation. There are several drill ready targets, and this fits well with CML's existing exposure in Queensland through its 40% holding in Red Fox.

The following exploration activities will commence on the new tenements as soon as possible, subject to availability of equipment and contractors.

Under the Auburn Resources option and JV agreement terms, funding from CML will be used for the following activities:

1. Conduct ground EM over a previously completed aerial VTEM survey in the Mundubbera area to refine drill targets for magmatic related sulphide Ni, Cu, Co and PGE mineralisation.
2. Investigate supergene copper workings which appear to be part of a poorly outcropping 13km zone of copper gold and PGEs in another separate layered intrusive in the Mundubbera area.
3. Two other extensive copper molybdenum and gold zones are interpreted as potential (undrilled) porphyry copper occurrences. Pending additional ground exploration these too will be drilled.

Under the Prophet Resources option and acquisition agreement terms, funding from CML will be used for the following activities:

4. Test the gold mineralisation potential under shallow cover associated with a major structural junction evidenced in regional magnetic data within a coincident embayment of a Gravity High about 24km north of the historic Croydon goldfield (~1Moz). A recently undertaken ground Sub-Audio Magnetism (SAM) geophysical survey over the structural junction area and the data from its interpretation will be the basis for drill testing of any priority targets.
5. Drill test historically reported high-grade zinc and gold mineralisation southeast of the famous historic Mount Morgan gold-copper mine.

How to participate in the SPP

To apply for Shares under the SPP, please follow the instructions on the enclosed personalised Application Form. You can obtain a copy of your personalised Application Form and Offer Booklet and apply online from the SPP website at <https://www.chasemining.com.au>.

This document and its attachments set out the details and Terms and Conditions of the SPP. We encourage you to read the enclosed material, including in particular the summary of key risks in section 4, and seek your own financial and tax advice in relation to the SPP before you decide whether to participate.

The SPP opens at 9.00 am (Sydney time) on Monday 1 November 2021 and will close at 5.00 pm (Sydney time) on Monday 15 November 2021. Late applications will not be accepted. However, Chase Mining reserves the right to scale-back investors, withdraw the SPP, or vary the Closing Date without prior notice subject to the Corporations Act and the ASX Listing Rules.

On behalf of the Board, we invite you to consider participation in the SPP.

Yours sincerely

3 PROPOSED USE OF FUNDS

Under the Auburn Resources option and JV agreement terms, funding from CML will be used for the following activities:

1. Conduct ground EM over a previously completed aerial VTEM survey in the Mundubbera area to refine drill targets for magmatic related sulphide Ni, Cu, Co and PGE mineralisation.
2. Investigate supergene copper workings which appear to be part of a poorly outcropping 13km of copper gold and PGEs in another separate layered intrusive in the Mundubbera area.
3. Two other extensive copper molybdenum and gold zones are interpreted as potential (undrilled) porphyry copper occurrences. Pending additional ground exploration these too will be drilled.

Under the Prophet Resources option and acquisition agreement terms, funding from CML will be used for the following activities:

4. Test the gold mineralisation potential under shallow cover associated with a major structural junction evidenced in regional magnetic data within a coincident embayment of a Gravity High about 24km north of the historic Croydon goldfield (~1Moz). A recently undertaken ground Sub-Audio Magnetics (SAM) geophysical survey over the structural junction area and the data from its interpretation will be the basis for drill testing of any priority targets.
5. Drill test historically reported high-grade zinc and gold mineralisation southeast of the famous historic Mount Morgan gold-copper mine. Funds raised from the SPP will be applied to the activities below as part of the terms of the new option agreements and for working capital.

4 KEY RISKS

Shares are a speculative investment and the market price may change between the dates you apply for new Shares and the issue of new Shares to you. Accordingly, the value of new Shares applied for may rise or fall. This Offer Booklet is not a prospectus and does not require the types of disclosures required under the Corporations Act for a prospectus. You must rely on your own knowledge of the Company previous disclosures made by the Company to ASX, and, if necessary, should consult your professional advisor when deciding whether or not to participate in the offer.

There are a number of general and specific risks which may affect the future operating and financial performance and financial position of Chase Mining along with the trading price of the Shares and dividends (if any) paid on them in the future.

These risks include and are not limited to the following:

- (a) Exploration and development risks generally

Whilst the Company has identified certain exploration targets it has not announced a mineral resource. The exploration for, and development of, mineral deposits involve a high degree of risk. Few properties which are explored are ultimately developed into producing mines. Resource exploration and development is a speculative business, characterized by several significant risks, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits, but also from finding minerals deposits that, although present, are insufficient in quantity and quality to return a viable profit from production. Whether a mineral deposit will be commercially viable depends on a number of factors, which include, without limitation, the particular attributes of the deposit, such as size, grade and

proximity to infrastructure, metal prices (which fluctuate widely), and government regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection.

(b) Title to properties

There can be no assurances that Chase Mining's interest in its properties is free from defects. Chase Mining has investigated its rights and believes that these rights are in good standing. There is no assurance, however, that such rights and title interests will not be revoked or significantly altered to the detriment of Chase Mining. All of the tenements in which Chase Mining has, or may have, an interest are expected to be subject to applications for renewal or grant (as the case may be). The renewal or grant of the term of each tenement requires the approval of the relevant government authority. If a tenement is not renewed or granted, Chase Mining may suffer significant damage.

(c) Financial risks

As disclosed in the Company's 30 June 2021 Annual Report, the Company achieved a net loss of \$1,003,174 and net operating cash outflows of \$374,782 for the year ended 30 June 2021. The Company's ability to continue as a going concern is dependent upon the ability of the Company to raise capital as and when necessary and / or the successful exploration and subsequent exploitation of the company's tenements. There are considerable financial risks in this.

(d) Overall market risk including supply and demand

The Company's operations may be affected by global mineral prices, mineral supply and demand, and economic and geopolitical events that may affect international trade and demand.

These risks are associated with an investment in Shares but are not an exhaustive list. In addition and as with an investment in any ASX listed company, the future prospects, operating and financial performance of the Company and the value of its Shares may be affected by a variety of factors, including changes in investor sentiment and overall performance or the Australian and overseas securities markets, and changes in general business, industry cycles and economic conditions.

As a Shareholder, you will continue to be exposed to such risks.

There may also be additional risks and uncertainties not currently known which may have an adverse effect on Chase Mining's business and the value of the Shares.

Where possible, Chase Mining will seek to minimise its exposure to, and mitigate the effects of, these risks. However, certain risks relate to matters that are outside the control of Chase Mining, and there can be no assurance that any steps that Chase Mining takes will successfully protect it from any particular risk.

These risks do not take into account the investment objectives, financial situation, tax position or other circumstances of any particular Shareholder.

Shareholders should have regard to their own investment objectives and financial circumstances and seek professional advice from their legal, financial or other independent adviser before determining whether or not to participate in the SPP.

If two or more persons are recorded in Chase Mining’s share register as jointly holding Shares, they are taken to be a single registered holder of Shares for the purposes of the SPP. If as joint holders you receive more than one offer under the SPP due to multiple identical holdings, you may still only contribute a maximum of \$30,000 in applying for Shares. An agreement, representation,

If you are an Eligible Shareholder, your rights under this offer are personal to you and non-renounceable, so you may not transfer them.

The offer under the SPP is made on the same Terms and Conditions to each Eligible Shareholder (whether you are a custodian or hold Shares on your own account).

Participation in the SPP is entirely optional. If you are an Eligible Shareholder, you can choose whether or not to participate. If you are a Custodian, you can choose whether to extend the offer to your Eligible Beneficiaries.

6.5 Parcel price and number of Shares

If you apply for Shares under the SPP, you will apply for a certain value, rather than a certain number, of Shares. You agree to pay the total application price of:

- (a) \$6,000;
- (b) \$12,000;
- (c) \$18,000;
- (d) \$24,000;
- (e) \$30,000.

Chase Mining shall determine the number of Shares to be issued to each Eligible Shareholder who applies for a Parcel, by dividing the value of that Parcel by the Issue Price. If the Issue Price cannot be divided into your Nominated Subscription to give a whole number of Shares, there will be a rounding down of the number of Shares. In accordance with section 6.4(f)(xix) above, any remaining balance of your payment will be donated to a registered charity of Chase Mining’s choosing. You will not receive a refund for this amount, which will always be less than the Issue Price of one Share.

The SPP is targeting to raise a maximum of \$1,000,000, and the Company may in its absolute discretion, scale back applications accordingly.

6.6 Issue of Shares

On the Issue Date, Chase Mining will issue the number of Shares to each Eligible Shareholder on the basis set out in section 6.5.

Shares issued under the SPP will, at the time of issue, rank equally with, and have the same voting rights, distribution rights and other entitlements as existing Shares.

Chase Mining will apply for Shares issued under the SPP to be quoted on ASX.

- (e) not accept an Application, not issue Shares, or issue Shares to a value less than that applied for under the SPP by an Eligible Shareholder (including a Custodian applying on behalf of one or more Eligible Beneficiaries).

Any such amendment, variation, waiver, suspension, withdrawal, non-acceptance or termination will be binding on all Eligible Shareholders even where Chase Mining did not notify you of that event.

In the event the SPP is withdrawn or terminated, all application monies will be refunded. No interest will be paid on any money returned to you.

6.10 Privacy

Chapter 2C of the Corporations Act requires information about Shareholders (including their name, address and details of the securities they hold) to be included in the public register of the entity in which they hold securities. Chase Mining and the Registry may collect personal information to process the application and implement the SPP, and to administer holdings of Shares.

The personal information contained in Chase Mining's share register is also used to facilitate payments and corporate communications (including financial results, annual reports and other information to be communicated to Shareholders) and to ensure compliance with legal and regulatory requirements, including taxation laws and the Corporations Act.

The personal information Chase Mining collects in relation to Shareholders may include the name, address, other contact details, bank account details and details of their holdings of Shares.
