Exceptional acquisition value

## ACQUISITION VALUE COMPARISON

**Majestic North acquisition at \$86/oz\*** represents exceptional value compared to industry averages

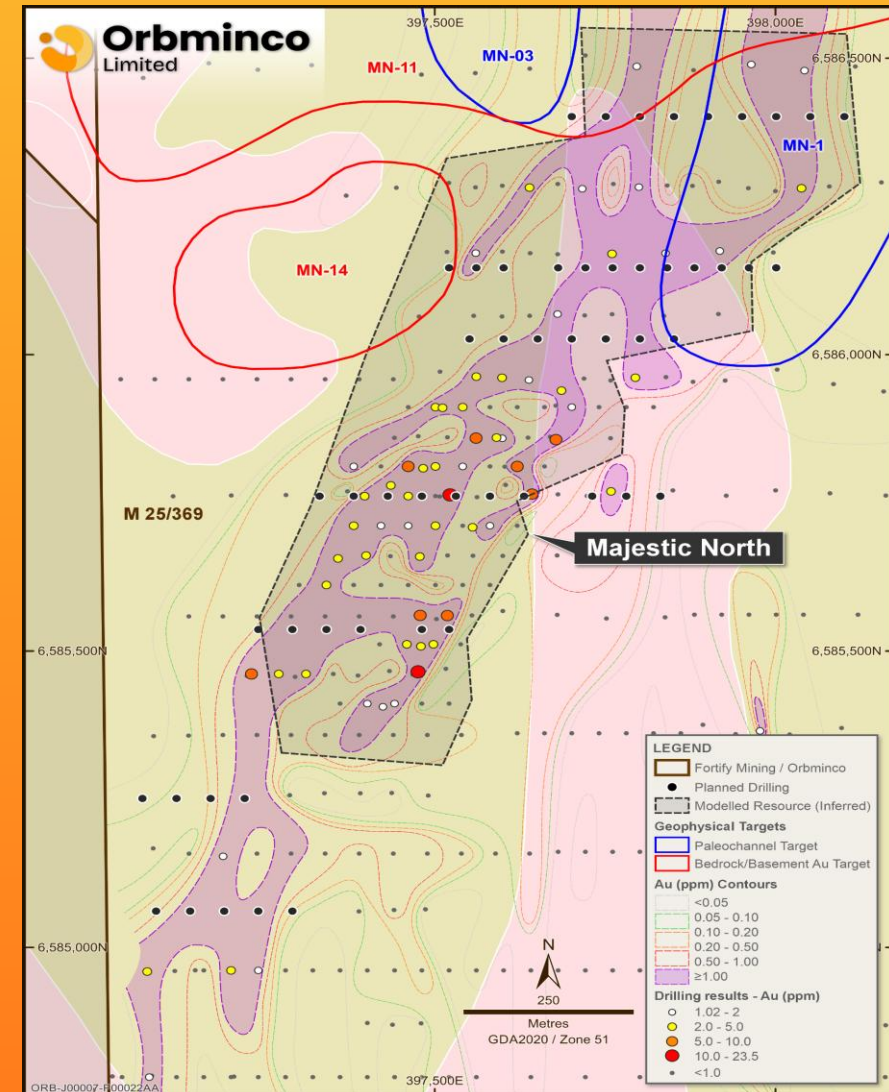

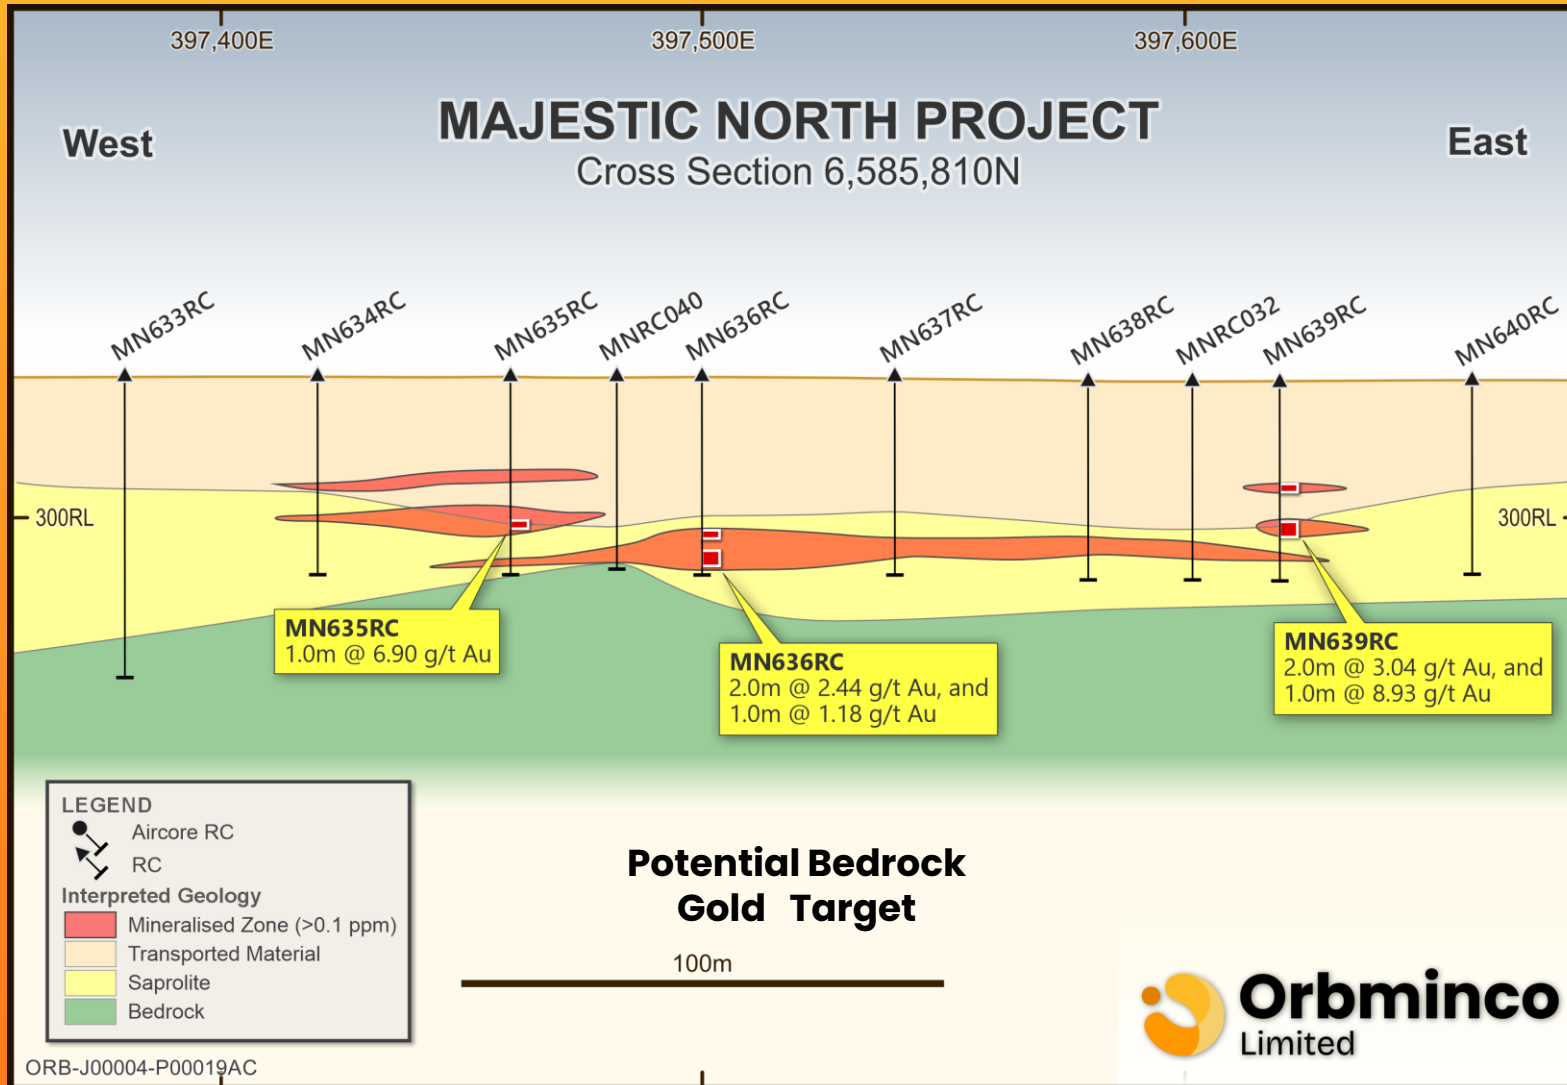

# STAGE 1 MAJESTIC NORTH DRILLING

## STAGE 1

- Approximately 50 aircore holes for 3000m of drilling – completed
- Designed to validate the existing Resource<sup>1</sup> and test for extensions to the north and south
- Drilling commenced and expected to be completed in July 2025
- Assay results expected to be received in late August 2025

# MAJESTIC NORTH DRILLING 2025

**Majestic North Cross Section showing the existing supergene mineralisation and bedrock gold target**

**Drilling will target both the supergene mineralisation and bedrock targets in two stages**

# SIGNIFICANT EXPLORATION UPSIDE

**95% of historical drilling limited to top 40m** – Primary gold source remains virtually untested

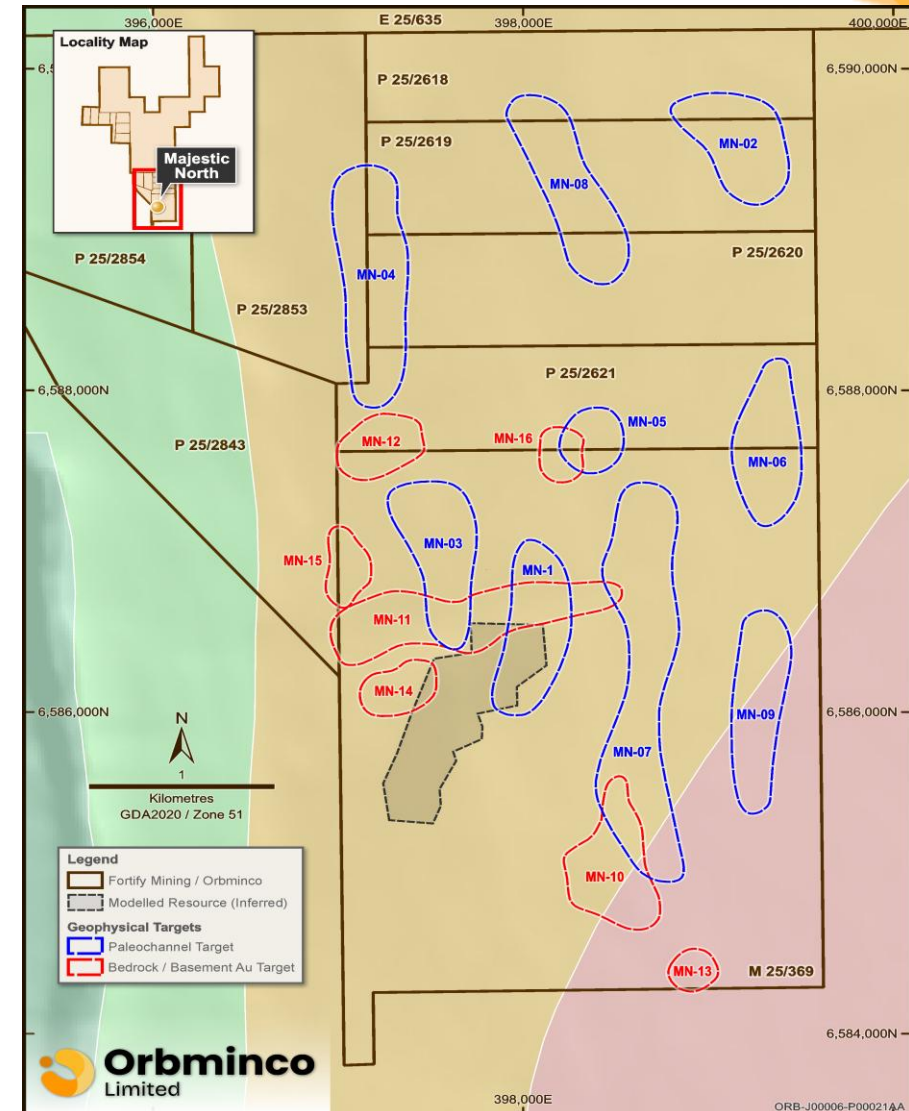

## EXPLORATION OPPORTUNITIES

- 
**Resource Extensions:** Potential to extend known resource envelope, particularly to the north and east
- 
**Primary Targets:** Limited drilling below the supergene zone provides significant scope to discover primary lode-gold mineralisation at depth
- 
**Regional Potential:** Multiple structural targets identified from geophysical data across the broader tenement package
- 
**Extensive Database:** Over 670 drill holes (approx. 37,000m) to leverage for target refinement and prioritization
- 
**Untested Targets:** Many targets concealed by shallow cover (5–30m) remain untested by drilling

# STAGE 2 MAJESTIC NORTH DRILLING

## STAGE 2

- Further infill Aircore drilling to upgrade resource classification
- Test for further extensions of supergene mineralisation
- RC drilling to test multiple supergene and primary mineralisation targets including source of current resource
- Numerous targets identified for immediate follow-up
- Expected to commence in September 2025

# NEXT STEPS
