

# WAVENET INTERNATIONAL LIMITED

ABN 50 087 139 428

**Wavenet International is an exploration company with coal tenements in Queensland as well as gold concessions in West Kalimantan, Indonesia.**

## **Update**

*In Queensland a maiden Inferred Coal Resource on EPC2044 at Gayndah was identified with approximately 79 million tonnes exceeding 6000 kcal/kg estimated. The coal has high ash content but initial recovery tests indicate that about 24% by volume can be recovered as a market product.*

*Sintang Gold Project, West Kalimantan is within sediments and andesite/ diorite intrusions. Soil sampling revealed many gold anomalies, with some assays returning up to 1.68 g/t Gold. An area of the Bangun River drainage over 4 kilometres length has been identified as potential gold-bearing alluvium. A Bangka drilling program of 20 holes has been completed to date.*

## **QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDING MARCH 31<sup>st</sup> 2015**

### **HIGHLIGHTS**

#### **Queensland Coal**

- **No field work was completed this quarter**
- **Compulsory area reductions on EPC2264 have been lodged with the Queensland Department of Natural Resources and Mines**
- **The coal exploration licences at Gayndah have been offered for sale and several interested parties are reviewing the data.**

#### **Indonesian Gold**

- **Currently the Sintang tenement is in the process of re-application for a reduction in area from 11,000 hectares to 5000 hectares. This is in order to concentrate on the alluvial and hard rock prospective areas.**
- **No field work was conducted during this quarter as WAL is awaiting results of the government processes**

#### **Corporate**

**The Company undertook a 1 for 1 entitlement rights issue as at 27 January 2015 of 55,477,660 ordinary shares at an issue price of \$0.01 per share. The issue was fully taken up by a combination of subscriptions and underwriting and raised \$554,777.**

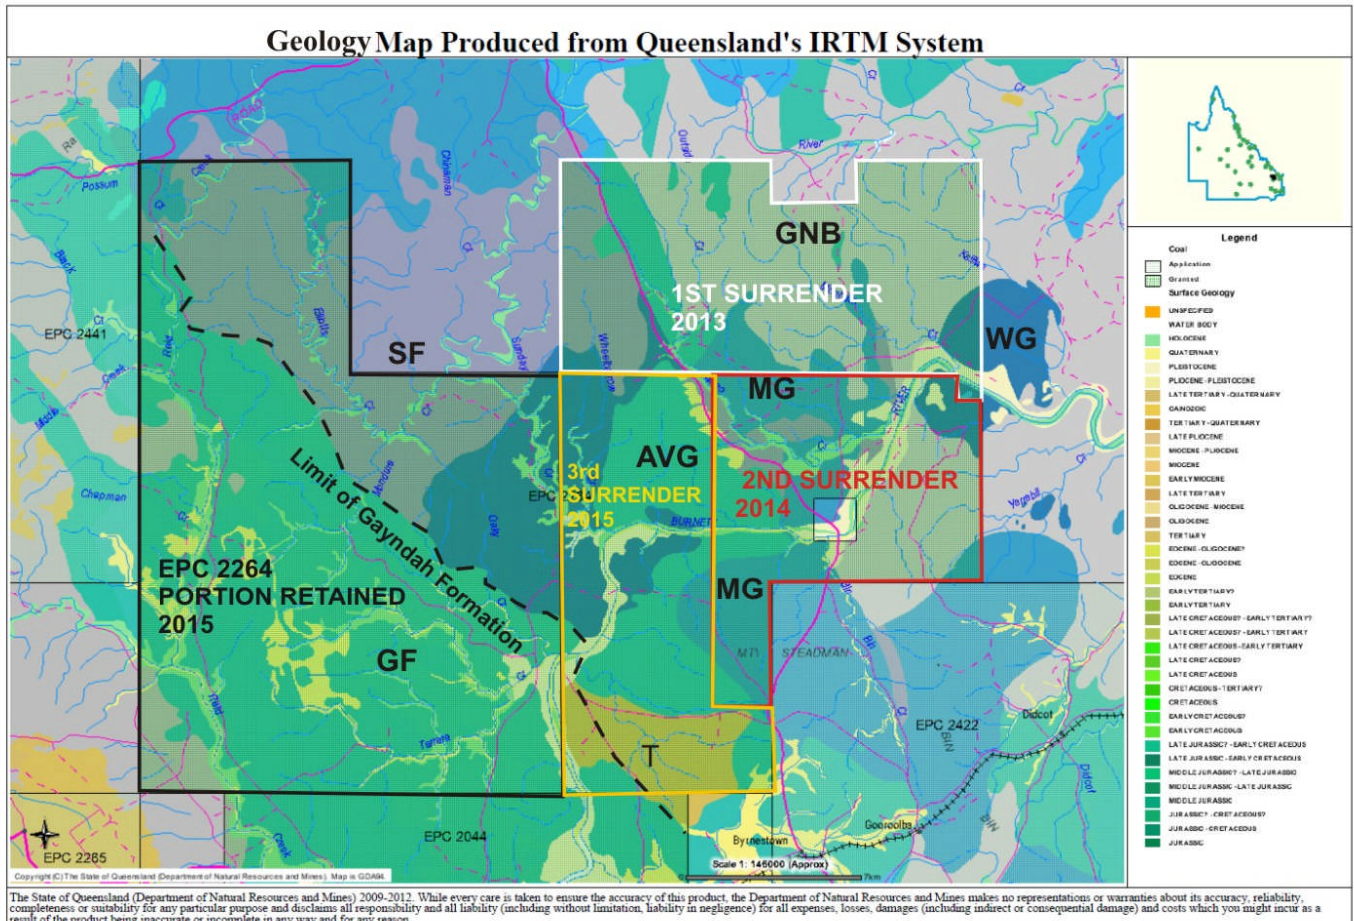

**The Company has listed its real estate assets for sale in order to free up liquid assets. We estimate this would realize \$1.2 million, after repayment of secured loans.**

## DETAILS

### GAYNDAH COAL PROJECT, QUEENSLAND

Area reductions for EPC2264 have been submitted to Queensland DNRM for statutory sub-block relinquishment.

EPC2264 was reduced from 159 sub-blocks to 125 sub-blocks. The retained blocks encompass the area where the Gayndah Formation is known to occur. See Figure 1 for location of surrendered blocks.

- T** Tertiary gravels and alluvium
- GF** Gayndah Formation (Triassic coal-bearing)
- AVG** Aranbanga Volcanic Group (Triassic)
- WG** Waterango Gabbro (Permo-Trias)
- MG** Mingo Granite (Permian)
- GNB** Good Night Beds (Carboniferous-Permian)
- SF** Shoalwater Formation (Carboniferous)

### SINTANG PROJECT – WEST KALIMANTAN

An area of approximately 4 kilometres in length on the Bangun River drainage has been identified as potential for alluvial gold mining. Reconnaissance sampling using panning concentrates indicated that most of the Bangun river system is mineralized with gold. Some locations along this drainage are currently being mined by artisans using primitive sluicing and jig equipment. There are several alluvial deposits occurring in the Bangun river valley ranging from recent fine sand and silt to older alluvial terraces of coarse sand and gravel as well as some areas of pebble conglomerates - all known to be gold-bearing.

Exploration results from the Sintang concession were reviewed and an application submitted to the Department of Mines to reduce the area of tenement holding by relinquishing the eastern portion and the northern section from the original 11,000 hectares to approximately 5,000 hectares. The application is still in process and WAL is awaiting confirmation so that exploration can continue. See Figure 2 for areas of the concession involved.

#### Comment

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. In addition surface sampling assays and drill sample results may also be discussed in the context of information describing the presence of anomalous mineral content. The above information relating to an Exploration Target should not be misunderstood or misconstrued as an estimate of Mineral Resources or Mineral Reserves. Hence the terms Resource (s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient exploration to define a Mineral Resource. It is uncertain if further exploration will result in the determination of a Mineral Resource.

#### Declaration

The information in this statement that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by independent consulting geologist Brian Davis who is a Member of The Australian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. Mr Davis is employed by Geologica Pty Ltd and has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which is undertaken to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Davis consents to the inclusion in the report of the matters based on the information made available to him, in the form and context in which it appears".

### ***Notes***

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage

interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3        **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4        The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.

5        **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
