BLUGLASS TECHNOLOGY & COMPANY UPDATE - INVESTOR VIDEO PRESENTATION

Australian technology developer, BluGlass Limited (ASX: BLG) is pleased to announce that as part of its 2019 Investor Roadshow, the Company is preparing a Technology and Company update via a video presentation which will be available for investors to stream from the BluGlass website (www.bluglass.com.au/brr) from 10am, **Friday 22 March**.

Investors will hear from Giles Bourne, Managing Director, Dr Ian Mann, Chief Operations and Technology Officer, and Brad Siskavich, VP of Business Development.

Interested investors can register to receive an alert once the presentation is published at:
www.bluglass.com.au/registration.

The Company also invites investors to submit any questions they would like to see covered in the update to swinwood@bluglass.com.au by no later than 5pm AEDT Friday 15 March. The Company will seek to ensure any common themes are addressed.

About BluGlass

BluGlass Limited (ASX: BLG) is a global leader commercialising a breakthrough technology using Remote Plasma Chemical Vapour Deposition (RPCVD) for the manufacture of high-performance LEDs and other devices. BluGlass has invented a new process using RPCVD to grow advanced materials such as gallium nitride (GaN) and indium gallium nitride (InGaN). These materials are crucial to the production of high-efficiency devices such as power electronics and high-brightness light emitting diodes (LEDs) used in next-generation vehicle lighting, virtual reality systems and device backlighting.

The RPCVD technology, because of its low temperature and flexible nature, offers many potential benefits over existing technologies including higher efficiency, lower cost, substrate flexibility (including GaN on silicon) and scalability. BluGlass was spun off from Macquarie University in 2005 and listed in 2006.
