## BEYONDIE SOP PROJECT - COMMISSIONING UPDATE

---

### Milestones

- Gas power station fully commissioned and performance test completed
- 10kt of Halite harvested to seal dedicated haul roads between ponds and plant
- Potassium mixed salt harvesting continues in preparation for product commissioning
- More than 93,000 tonnes of contained SOP pumped as at the end of April
- Commercial production of SOP on track for September 2021

*“The power station for the Beyondie SOP Project has now been commissioned and is ready to provide power for the process plant commissioning that is due to start in the next few weeks. This milestone, combined with harvesting activities that are in full swing and an operations team that is ready for production, represents a major step forward and significantly de-risks the project in meeting its first production targets. Importantly the Beyondie SOP Project remains on budget and on schedule to achieve first SOP sales next quarter.*”

*“The SOP plant is also entering final stages of construction, with work fronts open to all disciplines, including electrical, instrumentation and piping work. Completion of the standard grade SOP plant is being prioritised and this will be closely followed by completion of the compaction plant, which will use the standard SOP to produce granular SOP.”*

**Rudolph van Niekerk - Chief Executive Officer**

---

### Commissioning Activities

#### Power Station

Kalium Lakes Limited has successfully completed the commissioning of the Beyondie Sulphate of Potash Project's 7.5MW Power Station. Following on-site performance testing, each of the three 2.5MW gas engines and its associated equipment is fully operational, with all necessary operating licences and permits in place.

Technical specialists from power station contractor, Clarke Energy, have worked closely with the Kalium Lakes' team to achieve this important milestone as the Project prepares for commencement of the process plant commissioning activities in the next few weeks.

### SOP Purification Plant

Construction of the standard grade SOP plant is now in the final stages, with the focus of construction activities for this part of the plant now shifting to piping, electrical and instrumentation works. Erection of the granular SOP plant has also commenced and is on schedule to be completed when the first standard grade SOP is ready for granulation.

## Brine Supply and Evaporation Ponds

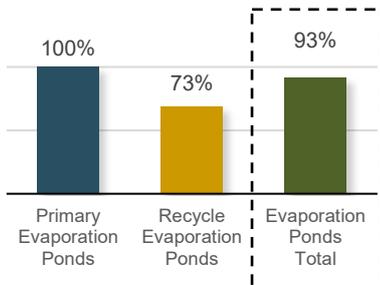

More than 93,000 tonnes of contained SOP has been pumped from the bore field and trenches into the primary evaporation ponds since 2019.

Construction of the ROM pad has been completed and lined with halite in readiness to receive potassium salt stockpiles.

Harvesting of potassium salts is in progress and potassium salts are being transferred to the ROM pad in preparation for commissioning and commencement of production.

### Evaporation Ponds Progress

- ✓ 60.1 Ha pre-concentrator ponds complete
- ✓ 163.1 Ha sodium chloride ponds complete
- ✓ 57.6 Ha primary potassium ponds complete
- 72 Ha recycle ponds commissioned with remaining ponds on schedule

A short video showing the salt harvesting process will be posted on the Company's website ([kaliumlakes.com.au](http://kaliumlakes.com.au)) in the near future.

## Forward looking statements

Certain information in this document refers to the intentions of Kalium Lakes, but these are not intended to be forecasts, forward looking statements or statements about the future matters for the purposes of the Corporations Act or any other applicable law. The occurrence of the events in the future are subject to risk, uncertainties and other actions that may cause Kalium Lakes' actual results, performance or achievements to differ from those referred to in this document. Accordingly, Kalium Lakes and its affiliates and their directors, officers, employees and agents do not give any assurance or guarantee that the occurrence of these events referred to in the document will actually occur as contemplated. Statements contained in this document, including but not limited to those regarding the possible or assumed future costs, performance, dividends, returns, revenue, exchange rates, potential growth of Kalium Lakes, industry growth or other projections and any estimated company earnings are or may be forward looking statements. Forward-looking statements can generally be identified by the use of words such as 'project', 'foresee', 'plan', 'expect', 'aim', 'intend', 'anticipate', 'believe', 'estimate', 'may', 'should', 'will' or similar expressions. These statements relate to future events and expectations and as such involve known and unknown risks and significant uncertainties, many of which are outside the control of Kalium Lakes. Actual results, performance, actions and developments of Kalium Lakes may differ materially from those expressed or implied by the forward-looking statements in this document. Such forward-looking statements speak only as of the date of this document.

There can be no assurance that actual outcomes will not differ materially from these statements. To the maximum extent permitted by law, Kalium Lakes and any of its affiliates and their directors, officers, employees, agents, associates and advisers:

- disclaim any obligations or undertaking to release any updates or revisions to the information to reflect any change in expectations or assumption;
- do not make any representation or warranty, express or implied, as to the accuracy, reliability or completeness of the information in this document, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement; and disclaim all responsibility and liability for these forward-looking statements (including, without limitation, liability for negligence).
